

Repurchase of AIG Common Stock

The following table presents repurchases of AIG Common Stock:

Six Months Ended June 30, (in millions)	2021		2020	
Aggregate repurchases of common stock	\$	592	\$	500
Total number of common shares repurchased		13		12
Aggregate repurchases of warrants	\$	-	\$	-
Total number of warrants repurchased		-		-

Shares may be repurchased from time to time in the open market, private purchases, through forward, derivative, accelerated repurchase or automatic repurchase transactions or otherwise. Certain of our share repurchases have been and may from time to time be effected through Securities Exchange Act of 1934 (Exchange Act) Rule 10b5-1 repurchase plans.

Our warrants to purchase shares of AIG Common Stock expired on January 19, 2021. In February 2020, we executed an accelerated stock repurchase (ASR) agreement with a third-party financial institution. The total number of shares of AIG Common Stock repurchased in the six months ended June 30, 2020, and the aggregate purchase price of those shares, reflect our payment of \$500 million in the aggregate under the ASR agreement and the receipt of approximately 12 million shares of AIG Common Stock in the aggregate. In the six months ended June 30, 2021, we repurchased approximately 13 million shares of AIG Common Stock for an aggregate purchase price of approximately \$592 million pursuant to Exchange Act Rule 10b5-1 repurchase plans. Approximately \$92 million of these share repurchases were funded with proceeds received from warrant exercises that occurred prior to the expiration of warrants to purchase shares of AIG Common Stock on January 19, 2021.

The timing of any future repurchases will depend on market conditions, our business and strategic plans, financial condition, results of operations, liquidity and other factors. The repurchase of AIG Common Stock is also subject to the terms of AIG's outstanding Series A Preferred Stock, pursuant to which AIG may not (other than in limited circumstances) purchase, redeem or otherwise acquire AIG Common Stock unless the full dividends for the latest completed dividend period on all outstanding shares of Series A Preferred Stock have been declared and paid or provided for.

For further discussion on the repurchases of AIG Common Stock see Note 16 to the Condensed Consolidated Financial Statement.

ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following table presents a rollforward of Accumulated other comprehensive income (loss):

	Unrealized Appreciation (Depreciation) of Fixed Maturity Securities on Which Allowance for Credit Losses Was Taken	Unrealized Appreciation (Depreciation) of All Other Investments	Foreign Currency Translation Adjustments	Retirement Plan Liabilities Adjustment	Fair Value of Liabilities Under Fair Value Option Attributable to Changes in Own Credit Risk	Total

Prior-service credit	(2)	(1)	*
Actuarial losses	(21)	(20)	*
Total	(23)	(21)	
Total reclassifications for the period	\$ 501	\$ 342	

* These AOCI components are included in the computation of net periodic pension cost. For additional information see Note 14 to the Condensed Consolidated Financial Statements.

13. Earnings Per Common Share (EPS)

The basic EPS computation is based on the weighted average number of common shares outstanding, adjusted to reflect all stock dividends and stock splits. The diluted EPS computation is based on those shares used in the basic EPS computation plus common shares that would have been outstanding assuming issuance of common shares for all dilutive potential common shares outstanding and adjusted to reflect all stock dividends and stock splits.

The following table presents the computation of basic and diluted EPS:

	Three Months Ended June 30,		Six Months Ended June 30,	
(dollars in millions, except per common share data)	2021	2020	2021	2020
Numerator for EPS:				
Income (loss) from continuing operations	\$ 150	\$ (7,765)	\$ 4,080	\$ (6,111)
Less: Net income from continuing operations attributable to noncontrolling interests	51	162	105	67
Less: Preferred stock dividends	8	8	15	15
Income (loss) attributable to AIG common shareholders from continuing operations	91	(7,935)	3,960	(6,193)
Loss from discontinued operations, net of income tax expense	-	(1)	-	(1)
Net income (loss) attributable to AIG common shareholders	\$ 91	\$ (7,936)	\$ 3,960	\$ (6,194)
Denominator for EPS:				
Weighted average common shares outstanding — basic	862,930,931	866,968,305	865,508,343	870,590,968
Dilutive common shares	9,946,372	-	9,057,937	-
Weighted average common shares outstanding — diluted ^{(a)(b)}	872,877,303	866,968,305	874,566,280	870,590,968
Income (loss) per common share attributable to AIG common shareholders:				
Basic:				
Income (loss) from continuing operations	\$ 0.11	\$ (9.15)	\$ 4.58	\$ (7.11)
Income (loss) from discontinued operations	\$ -	\$ -	\$ -	\$ -
Income (loss) attributable to AIG common shareholders	\$ 0.11	\$ (9.15)	\$ 4.58	\$ (7.11)
Diluted:				
Income (loss) from continuing operations	\$ 0.11	\$ (9.15)	\$ 4.53	\$ (7.11)
Income (loss) from discontinued operations	\$ -	\$ -	\$ -	\$ -
Income (loss) attributable to AIG common shareholders	\$ 0.11	\$ (9.15)	\$ 4.53	\$ (7.11)

(a) For the three- and six-month periods ended June 30, 2020, because we reported net losses attributable to AIG common shareholders, all common stock equivalents are anti-dilutive and are therefore excluded from the calculation of diluted shares and diluted per share amounts. The number of common shares excluded from the calculation was 3,226,882 shares and 3,939,732 shares, respectively, for the three- and six-month periods ended June 30, 2020.

(b) Dilutive common shares include our share-based employee compensation plans and a weighted average portion of the 10-year warrants issued to AIG shareholders as part of AIG's recapitalization in January 2011, which expired in January 2021. The number of common shares excluded from diluted shares outstanding was 5.5 million and 7.4 million for the three- and six-month periods ended June 30, 2021, respectively, and 68.6 million and 67.9 million for the three- and six-month periods ended June 30, 2020, respectively, because the effect of including those common shares in the calculation would have been anti-dilutive.

For information about our repurchases of AIG Common Stock see Note 12 to the Condensed Consolidated Financial Statements.

14. Employee Benefits

We sponsor various defined benefit plans for eligible employees and retirees in the U.S. and certain non-U.S. countries.

The following table presents the components of net periodic benefit cost (credit) with respect to pension benefits:

	Pension		
	U.S. Plans	Non-U.S. Plans	Total
<i>(in millions)</i>			
Three Months Ended June 30, 2021			
Components of net periodic benefit cost:			
Service cost	\$ 1	\$ 6	\$ 7
Interest cost	23	2	25
Expected return on assets	(61)	(5)	(66)
Amortization of prior service cost	-	1	1
Amortization of net loss	8	1	9
Net periodic benefit cost (credit)	\$ (29)	\$ 5	\$ (24)
Three Months Ended June 30, 2020			
Components of net periodic benefit cost:			
Service cost	\$ 2	\$ 5	\$ 7
Interest cost	33	2	35
Expected return on assets	(59)	(5)	(64)
Amortization of prior service cost	-	1	1
Amortization of net loss	8	2	10
Net periodic benefit cost (credit)	\$ (16)	\$ 5	\$ (11)
Six Months Ended June 30, 2021			
Components of net periodic benefit cost:			
Service cost	\$ 2	\$ 11	\$ 13
Interest cost	45	5	50
Expected return on assets	(122)	(11)	(133)
Amortization of prior service cost	-	2	2
Amortization of net loss	17	3	20
Net periodic benefit cost (credit)	\$ (58)	\$ 10	\$ (48)
Six Months Ended June 30, 2020			
Components of net periodic benefit cost:			
Service cost	\$ 3	\$ 10	\$ 13
Interest cost	67	5	72
Expected return on assets	(119)	(10)	(129)
Amortization of prior service cost	-	1	1
Amortization of net loss	16	4	20
Net periodic benefit cost (credit)	\$ (33)	\$ 10	\$ (23)

The service cost for our U.S. defined benefit plans only reflects administrative fees as the plans are frozen and no longer accrue benefits. We recognized net expense of \$2 million and \$4 million for our U.S. and non-U.S. postretirement benefit plans for the three- and six-month periods ended June 30, 2021, respectively. We recognized net expense of \$2 million and \$4 million for our U.S. and non-U.S. postretirement benefit plans for the three- and six-month periods ended June 30, 2020, respectively.

15. Income Taxes

U.S. TAX LAW CHANGES

On December 22, 2017, the U.S. enacted the Tax Cuts and Jobs Act (the Tax Act). The Tax Act includes provisions for Global Intangible Low-Taxed Income (GILTI) under which taxes are imposed on the excess of a deemed return on tangible assets of certain foreign subsidiaries and for Base Erosion and Anti-Abuse Tax (BEAT) under which taxes are imposed on certain base eroding payments to affiliated foreign companies. While the U.S. tax authorities issued formal guidance, including recently issued regulations for BEAT and other provisions of the Tax Act, there are still certain aspects of the Tax Act that remain unclear and subject to substantial uncertainties. Additional guidance is expected in future periods. Such guidance may result in changes to the interpretations and assumptions we made and actions we may take, which may impact amounts recorded with respect to international provisions of the Tax Act, possibly materially. Consistent with accounting guidance, we treat BEAT as a period tax charge in the period the tax is incurred and have made an accounting policy election to treat GILTI taxes in a similar manner.

On March 27, 2020, the U.S. enacted the Coronavirus Aid, Relief, and Economic Security (CARES) Act to mitigate the economic impacts of the COVID-19 crisis. The tax provisions of the CARES Act have not had and are currently not expected to have a material impact on AIG's U.S. federal tax liabilities.

RECLASSIFICATION OF CERTAIN TAX EFFECTS FROM ACCUMULATED OTHER COMPREHENSIVE INCOME

We use an item-by-item approach to release the stranded or disproportionate income tax effects in AOCI related to our available-for-sale securities. Under this approach, a portion of the disproportionate tax effects is assigned to each individual security lot at the date the amount becomes lodged. When the individual securities are sold, mature, or are otherwise impaired on an other-than-temporary basis, the assigned portion of the disproportionate tax effect is reclassified from AOCI to income from continuing operations.

INTERIM TAX CALCULATION METHOD

We use the estimated annual effective tax rate method in computing our interim tax provision. Certain items, including those deemed to be unusual, infrequent or that cannot be reliably estimated, are excluded from the estimated annual effective tax rate. In these cases, the actual tax expense or benefit is reported in the same period as the related item. Certain tax effects are also not reflected in the estimated annual effective tax rate, primarily certain changes in uncertain tax positions and realizability of deferred tax assets, and are recorded in the period in which the change occurs. While certain impacts of the Tax Act are included in our annual effective tax rate, we continue to refine our calculations as additional information becomes available, which may result in changes to the estimated annual effective tax rate. As of June 30, 2021, the annual effective tax rate includes the tax effects of actual and projected COVID-19 related losses and market developments.

INTERIM TAX EXPENSE (BENEFIT)

For the three-month period ended June 30, 2021, the effective tax rate on income from continuing operations was (2.0) percent. The effective tax rate on income from continuing operations differs from the statutory tax rate of 21 percent primarily due to tax benefits associated with the release of reserves for uncertain tax positions and interest related to a New York State tax settlement based on the completion of recent audit activity, tax exempt income, remeasurement of deferred taxes as a result of the increase in the UK corporate statutory income tax rate, and reclassifications from AOCI to income from continuing operations related to the disposal of available for sale securities. These tax benefits were partially offset by tax charges associated with the effect of foreign operations, state and local income taxes, and non-deductible transfer pricing charges. We also recognized a tax charge associated with reduction of net operating loss deferred tax assets in certain foreign jurisdictions, with a corresponding decrease in the related deferred tax asset valuation allowance. The effect of foreign operations is primarily related to income of our foreign operations taxed at statutory tax rates higher than 21 percent, other foreign taxes, and foreign income subject to U.S. taxation.

For the six-month period ended June 30, 2021, the effective tax rate on income from continuing operations was 16.3 percent. The effective tax rate on income from continuing operations differs from the statutory tax rate of 21 percent primarily due to tax benefits associated with the release of reserves for uncertain tax positions, penalties and interest related to the recent completion of audit activity by the IRS, release of reserves for uncertain tax positions and interest related to a New York State tax settlement based on the completion of recent audit activity, tax exempt income, remeasurement of deferred taxes as a result of an increase in the UK corporate income tax rate enacted during the second quarter, and reclassifications from AOCI to income from continuing operations related to the disposal of available for sale securities. These tax benefits were partially offset by tax charges associated with the

establishment of U.S. federal valuation allowance related to certain tax attribute carryforwards, the effect of foreign operations, excess tax charges related to share based compensation payments recorded through the income statement, state and local income taxes, and non-deductible transfer pricing charges. We also recognized a tax charge associated with reduction of net operating loss deferred tax assets in certain foreign jurisdictions, with a corresponding decrease in the related deferred tax asset valuation allowance. The effect of foreign operations is primarily related to income of our foreign operations taxed at statutory tax rates higher than 21 percent, other foreign taxes, and foreign income subject to U.S. taxation.

For the three-month period ended June 30, 2020, the effective tax rate on loss from continuing operations was 19.6 percent. The effective tax rate on loss from continuing operations differs from the statutory tax rate of 21 percent primarily due to tax effects of the Majority Interest Fortitude Sale, tax charges associated with the increase of U.S. federal valuation allowance related to certain tax attribute carryforwards, accrual of interest associated with IRS and other tax authority matters, the effect of foreign operations, state and local income taxes, and non-deductible transfer pricing charges, partially offset by tax benefits associated with tax exempt income, and reclassifications from AOCI to income from continuing operations related to the disposal of available for sale securities. The effect of foreign operations is primarily related to income in our foreign operations taxed at statutory tax rates higher than 21 percent, other foreign taxes, and foreign income subject to U.S. taxation.

For the six-month period ended June 30, 2020, the effective tax rate on loss from continuing operations was 14.0 percent. The effective tax rate on loss from continuing operations differs from the statutory tax rate of 21 percent primarily due to tax effects of the Majority Interest Fortitude Sale, tax charges associated with the establishment of U.S. federal valuation allowance related to certain tax attribute carryforwards, accrual of interest associated with IRS and other tax authority matters, excess tax charges related to share based compensation payments recorded through the income statement, the effect of foreign operations, state and local income taxes, and non-deductible transfer pricing charges, partially offset by tax benefits associated with tax exempt income, and reclassifications from AOCI to income from continuing operations related to the disposal of available for sale securities. The effect of foreign operations is primarily related to income in our foreign operations taxed at statutory tax rates higher than 21 percent, other foreign taxes, and foreign income subject to U.S. taxation.

For the six-month period ended June 30, 2021, we consider our foreign earnings with respect to certain operations in Canada, South Africa, the Far East, Latin America, Bermuda as well as the European, Asia Pacific and Middle East regions to be indefinitely reinvested. These earnings relate to ongoing operations and have been reinvested in active business operations. Deferred taxes, if necessary, have been provided on earnings of non-U.S. affiliates whose earnings are not indefinitely reinvested. Given the uncertainties around the impact from the COVID-19 crisis, including the significant global economic slowdown, we continue to monitor and review its impact on our reinvestment considerations, including regulatory oversight in the relevant jurisdictions.

ASSESSMENT OF DEFERRED TAX ASSET VALUATION ALLOWANCE

The evaluation of the recoverability of our deferred tax asset and the need for a valuation allowance requires us to weigh all positive and negative evidence to reach a conclusion that it is more likely than not that all or some portion of the deferred tax asset will not be realized. The weight given to the evidence is commensurate with the extent to which it can be objectively verified. The more negative evidence that exists, the more positive evidence is necessary and the more difficult it is to support a conclusion that a valuation allowance is not needed.

Our framework for assessing the recoverability of the deferred tax asset requires us to consider all available evidence, including:

- the nature, frequency, and amount of cumulative financial reporting income and losses in recent years;
- the sustainability of recent operating profitability of our subsidiaries;
- the predictability of future operating profitability of the character necessary to realize the net deferred tax asset, including forecasts of future income for each of our businesses and actual and planned business and operational changes;
- the carryforward periods for the net operating loss, capital loss and foreign tax credit carryforwards, including the effect of reversing taxable temporary differences; and
- prudent and feasible actions and tax planning strategies that would be implemented, if necessary, to protect against the loss of the deferred tax asset.

In performing our assessment of the recoverability of the deferred tax asset under this framework, we consider tax laws governing the utilization of the net operating loss, capital loss and foreign tax credit carryforwards in each applicable jurisdiction. Under U.S. tax law, a company generally must use its net operating loss carryforwards before it can use its foreign tax credit carryforwards, even though the carryforward period for the foreign tax credit is shorter than for the net operating loss. Our U.S. federal consolidated income tax group includes both life companies and non-life companies. While the U.S. taxable income of our non-life companies can be offset by our net operating loss carryforwards, only a portion (no more than 35 percent) of the U.S. taxable income of our life companies can be offset by those net operating loss carryforwards. The remaining tax liability of our life companies can be offset by the foreign tax credit carryforwards. Accordingly, we are able to utilize both the net operating loss and foreign tax credit carryforwards concurrently.

Recent events, including the impact of the recent completion of audit activity by the IRS, the COVID-19 crisis, changes in target interest rates by the Board of Governors of the Federal Reserve System, and significant market volatility, continue to impact actual and projected results of our business operations as well as our views on potential effectiveness of certain prudent and feasible tax planning strategies. In order to demonstrate the predictability and sufficiency of future taxable income necessary to support the realizability of the net operating losses and foreign tax credit carryforwards, we have considered forecasts of future income for each of our businesses, including assumptions about future macro-economic and AIG-specific conditions and events, and any impact these conditions and events may have on our prudent and feasible tax planning strategies. We also subjected the forecasts to a variety of stresses of key assumptions and evaluated the effect on tax attribute utilization.

The carryforward periods of our foreign tax credit carryforwards range from tax years 2021 through 2023. Carryforward periods for our net operating losses extend from 2028 forward. However, utilization of a portion of our net operating losses is limited under separate return limitation year rules. During the first quarter of 2021, the recent completion of audit activity by the IRS and subsequent release of certain reserves for uncertain tax positions resulted in an initial recognition of additional net operating loss and foreign tax credit carryforwards arising in prior years. Taking into account this initial recognition of additional carryforwards as well as other events and our analysis of their potential impact on utilization of our tax attributes, for the three months ended March 31, 2021, we recorded an increase of \$700 million in valuation allowance related to a portion of our net operating loss carryforwards that are no longer more-likely-than-not to be realized. No additional activity was recorded for the three-month period ended June 30, 2021. Accordingly, during the six months ended June 30, 2021, we have recorded a \$700 million valuation allowance through continuing operations.

To the extent that the valuation allowance is attributed to changes in forecast of current year taxable income, the impact is included in our estimated annualized effective tax rate. The valuation allowance related to changes in forecasts of income in future periods as well as other items not related to the current year was recorded discretely.

As of June 30, 2021, the balance sheet reflects a valuation allowance of \$850 million related to a portion of our foreign tax credit and net operating loss carryforwards that are no longer more-likely-than-not to be realized.

Estimates of future taxable income, including income generated from prudent and feasible actions and tax planning strategies, impact of settlements with taxing authorities, and any changes to interpretations and assumptions related to the impact of the Tax Act could change in the near term, perhaps materially, which may require us to consider any potential impact to our assessment of the recoverability of the deferred tax asset. Additionally, estimates of future taxable income, including prudent and feasible tax planning strategies, may be further impacted by market developments arising from the COVID-19 crisis and uncertainty regarding its outcome. Such potential impact could be material to our consolidated financial condition or results of operations for an individual reporting period.

For the six-month period ended June 30, 2021, recent changes in market conditions, including the COVID-19 crisis and interest rate fluctuations, impacted the unrealized tax gains and losses in the U.S. Life Insurance companies' available for sale securities portfolio, resulting in a deferred tax liability related to net unrealized tax capital gains. As of June 30, 2021, based on all available evidence, we concluded that no valuation allowance is necessary in the U.S. Life Insurance companies' available for sale securities portfolio.

For the six-month period ended June 30, 2021, recent changes in market conditions, including interest rate fluctuations, impacted the unrealized tax gains and losses in the U.S. non-life companies' available for sale securities portfolio, resulting in a deferred tax liability related to net unrealized tax capital gains. As of June 30, 2021, based on all available evidence, we concluded that no valuation allowance is necessary in the U.S. non-life companies' available for sale securities portfolio.

For the three- and six-month periods ended June 30, 2021, we recognized net increases (decreases) of \$(25) million and \$(39) million, respectively, in deferred tax asset valuation allowance associated with certain foreign and state jurisdictions, primarily attributable to current year activity. The decrease in valuation allowance includes a \$16 million decrease in deferred tax asset valuation allowance associated with certain foreign jurisdictions, primarily attributable to a corresponding reduction in foreign net operating loss deferred tax assets as a result of the expiration of a portion of net operating losses prior to utilization in Japan which was recorded during the three-month period ended June 30, 2021.

TAX EXAMINATIONS AND LITIGATION

We file a consolidated U.S. federal income tax return with our eligible U.S. subsidiaries. Income earned by subsidiaries operating outside the U.S. is taxed, and income tax expense is recorded, based on applicable U.S. and foreign laws.

We are currently under examination by the IRS for the tax years 2011 through 2013.

In September 2020, we received the IRS Revenue Agent Report containing agreed and disagreed issues for the audit of tax years 2007-2010. In October 2020, we filed a protest of the disagreed issues with the IRS Independent Office of Appeals (IRS Appeals). In March 2021, the IRS audit team issued their rebuttal to the protest of disagreed issues to IRS Appeals. We have also received notification that the disagreed issues were accepted for review by IRS Appeals.

In 2009, after paying amounts due on a statutory notice of deficiency related to the disallowance of foreign tax credits associated with cross border financing transactions, we filed a refund lawsuit in the Southern District of New York (Southern District) with respect to tax year 1997. In January 2018, the parties reached non-binding agreements in principle on issues presented in the dispute with respect to other relevant tax years. In 2019, we agreed with the IRS to execute an agreement for the tax years at issue in which AIG would waive restrictions on the assessment of additional tax related to the settlement of the underlying issues in those tax years. The litigation was stayed pending the outcome of the review process. During the fourth quarter of 2020, the parties concluded the review process and executed a binding settlement agreement with respect to the underlying issues. On October 22, 2020, the Southern District dismissed the case based upon the settlement reached between AIG and the government. The parties continue to review the related interest calculations based on the settlement agreement, which will become due upon the IRS' issuance of a Notice and Demand for Payment. During June 2021, AIG made an additional payment of \$354 million to the U.S. Treasury with respect to this matter. While we continue to finalize the interest calculations with the IRS, AIG expects to make the remaining payment as early as the third quarter of 2021.

ACCOUNTING FOR UNCERTAINTY IN INCOME TAXES

At June 30, 2021 and December 31, 2020, our unrecognized tax benefits, excluding interest and penalties, were \$1.1 billion and \$2.3 billion, respectively. At June 30, 2021 and December 31, 2020, our unrecognized tax benefits related to tax positions that, if recognized, would not affect the effective tax rate because they relate to such factors as the timing, rather than the permissibility, of the deduction were \$11 million and \$44 million, respectively. Accordingly, at June 30, 2021 and December 31, 2020, the amounts of unrecognized tax benefits that, if recognized, would favorably affect the effective tax rate were \$1.1 billion and \$2.3 billion, respectively. The decrease in the six-month period ended June 30, 2021 is primarily attributable to the recent completion of audit activity by the IRS and New York State.

Interest and penalties related to unrecognized tax benefits are recognized in income tax expense. At June 30, 2021 and December 31, 2020, we had accrued liabilities of \$73 million and \$286 million, respectively, for the payment of interest (net of the federal benefit) and penalties. For the six-month periods ended June 30, 2021 and 2020, we accrued expense (benefit) of \$(203) million and \$96 million, respectively, for the payment of interest and penalties. The activity in the six-month period ended June 30, 2021 is primarily related to the recent completion of audit activity by the IRS and New York State.

We believe it is reasonably possible that our unrecognized tax benefits could decrease within the next 12 months by as much as \$15 million, principally as a result of potential resolutions or settlements of prior years' tax items. The prior years' tax items include unrecognized tax benefits related to the deductibility of certain expenses.

16. Subsequent Events

DIVIDENDS DECLARED

On August 5, 2021, our Board of Directors declared a cash dividend on AIG Common Stock of \$0.32 per share, payable on September 30, 2021 to shareholders of record on September 16, 2021. On August 5, 2021, our Board of Directors declared a cash dividend on AIG's Series A Preferred Stock of \$365.625 per share, payable on September 15, 2021 to holders of record on August 31, 2021.

INCREASE IN SHARE REPURCHASE AUTHORIZATION

On August 3, 2021, our Board of Directors authorized a share repurchase authorization of AIG Common Stock of \$6.0 billion (inclusive of the approximately \$908 million remaining under the Board's prior share repurchase authorization).

SALE OF CERTAIN AIG LIFE AND RETIREMENT RETAIL MUTUAL FUNDS BUSINESS

On July 16, 2021, AIG completed its previously announced sale of certain AIG Life and Retirement retail mutual funds business to Touchstone at which time we received initial proceeds, and twelve retail mutual funds managed by SAAMCo, a member of AIG Life and Retirement, with \$6.8 billion in assets, were reorganized into Touchstone funds. Six retail mutual funds managed by SAAMCo and not included in the transaction were liquidated. AIG Life and Retirement will retain its fund management platform and capabilities dedicated to its variable insurance products.

STRATEGIC PARTNERSHIP WITH THE BLACKSTONE GROUP

On July 14, 2021, AIG and Blackstone announced that they have reached a definitive agreement for Blackstone to acquire a 9.9 percent equity stake in SAFG, which is the holding company for AIG's Life and Retirement business, for \$2.2 billion in an all cash transaction, subject to adjustment if the final pro forma adjusted book value is greater or lesser than the target pro forma adjusted book value. The transaction contemplates that most of AIG's investment operations would be transferred to SAFG or its subsidiaries as part of the separation. As part of this agreement, AIG also agreed to enter into a long-term strategic asset management relationship with Blackstone to manage an initial \$50 billion of Life and Retirement's existing investment portfolio upon closing of the equity investment, with that amount increasing by increments of \$8.5 billion per year for the next five years beginning in the third or fourth quarter of 2022, for an aggregate of \$92.5 billion. Following the closing of the transaction, Blackstone will be entitled to designate one member of the board of directors of the Life and Retirement holding company, which will consist of 11 directors. Pursuant to the definitive agreement, Blackstone will be required to hold its ownership interest in SAFG following the completion of the separation of the Life and Retirement business, subject to exceptions permitting Blackstone to sell 25%, 67% and 75% of its shares after the first, second and third anniversaries, respectively, of the initial public offering of SAFG (the IPO), with the transfer restrictions terminating in full on the fifth anniversary of the IPO. In the event that the IPO of SAFG is not completed prior to the second anniversary of the closing of the transaction, Blackstone will have the right to require AIG to undertake the IPO, and in the event that the IPO has not been completed prior to the third anniversary of the closing, Blackstone will have the right to exchange all or a portion of its ownership interest in SAFG for shares of AIG's common stock on the terms set forth in the definitive agreement. These transactions are subject to customary closing conditions, including the expiration or termination of the waiting period under the HSR Act, and are expected to close in the third quarter of 2021.

On July 14, 2021, AIG and BREIT, a long-term, perpetual capital vehicle affiliated with Blackstone, announced that they have reached a definitive agreement for BREIT to acquire AIG's interests in a U.S. affordable housing portfolio for approximately \$5.1 billion, subject to certain adjustments, in an all cash transaction. This transaction is subject to customary closing conditions and is expected to close in the fourth quarter of 2021.

ITEM 2 | Management's Discussion and Analysis of Financial Condition and Results of Operations

Glossary and Acronyms of Selected Insurance Terms and References

Throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), we use certain terms and abbreviations, which are summarized in the Glossary and Acronyms.

American International Group, Inc. (AIG) has incorporated into this discussion a number of cross-references to additional information included throughout this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the year ended December 31, 2020 (the 2020 Annual Report) to assist readers seeking additional information related to a particular subject.

In this Quarterly Report on Form 10-Q, unless otherwise mentioned or unless the context indicates otherwise, we use the terms "AIG," "we," "us" and "our" to refer to American International Group, Inc., a Delaware corporation, and its consolidated subsidiaries. We use the term "AIG Parent" to refer solely to American International Group, Inc., and not to any of its consolidated subsidiaries.

Cautionary Statement Regarding Forward-Looking Information

This Quarterly Report on Form 10-Q and other publicly available documents may include, and officers and representatives of AIG may from time to time make and discuss, projections, goals, assumptions and statements that may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These projections, goals, assumptions and statements are not historical facts but instead represent only a belief regarding future events, many of which, by their nature, are inherently uncertain and outside AIG's control. These projections, goals, assumptions and statements include statements preceded by, followed by or including words such as "will," "believe," "anticipate," "expect," "intend," "plan," "focused on achieving," "view," "target," "goal" or "estimate." These projections, goals, assumptions and statements may relate to future actions, prospective services or products, future performance or results of current and anticipated services or products, sales efforts, expenses, the outcome of contingencies such as legal proceedings, anticipated organizational, business or regulatory changes, the effect of catastrophes, such as the COVID-19 crisis, and macroeconomic events, anticipated dispositions, monetization and/or acquisitions of businesses or assets, or successful integration of acquired businesses, management succession and retention plans, exposure to risk, trends in operations and financial results.

It is possible that AIG's actual results and financial condition will differ, possibly materially, from the results and financial condition indicated in these projections, goals, assumptions and statements. Factors that could cause AIG's actual results to differ, possibly materially, from those in the specific projections, goals, assumptions and statements include:

- AIG's ability to successfully separate the Life and Retirement business from AIG and the impact any separation may have on AIG, its businesses, employees, contracts and customers;
- AIG's ability to close the transactions announced as part of a strategic partnership with Blackstone;
- changes in market and industry conditions, including the significant global economic downturn, volatility in financial and capital markets, fluctuations in interest rates, prolonged economic recovery and disruptions to AIG's operations driven by COVID-19 and responses thereto, including new or changed governmental policy and regulatory actions;
- the occurrence of catastrophic events, both natural and man-made, including COVID-19, other pandemics, civil unrest and the effects of climate change;
- the adverse impact of COVID-19, including with respect to AIG's business, financial condition and results of operations;
- AIG's ability to effectively execute on AIG 200 transformational programs designed to achieve underwriting excellence, modernization of AIG's operating infrastructure, enhanced user and customer experiences and unification of AIG;
- the impact of potential information technology, cybersecurity or data security breaches, including as a result of cyber-attacks or security vulnerabilities, the likelihood of which may increase due to extended remote business operations as a result of COVID-19;
- disruptions in the availability of AIG's electronic data systems or those of third parties;
- actions by rating agencies with respect to our credit and financial strength ratings;
- AIG's ability to successfully dispose of, monetize and/or acquire businesses or assets or successfully integrate acquired businesses;
- changes to the valuation of AIG's investments;
- changes in judgments concerning the recognition of deferred tax assets and the impairment of goodwill;
- availability and affordability of reinsurance;
- the effectiveness of our risk management policies and procedures, including with respect to our business continuity and disaster recovery plans;
- nonperformance or defaults by counterparties, including Fortitude Reinsurance Company Ltd. (Fortitude Re);
- changes in judgments concerning potential cost-saving opportunities;
- concentrations in AIG's investment portfolios;
- changes to our sources of or access to liquidity;
- changes in judgments or assumptions concerning insurance underwriting and insurance liabilities;
- the effectiveness of strategies to recruit and retain key personnel and to implement effective succession plans;
- the requirements, which may change from time to time, of the global regulatory framework to which AIG is subject;
- significant legal, regulatory or governmental proceedings; and
- such other factors discussed in:
 - Part I, Item 2. MD&A of this Quarterly Report on Form 10-Q;
 - Part I, Item 2. MD&A of the Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2021; and
 - Part I, Item 1A. Risk Factors and Part II, Item 7. MD&A of the 2020 Annual Report.

We are not under any obligation (and expressly disclaim any obligation) to update or alter any projections, goals, assumptions or other statements, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise.

Use of Non-GAAP Measures

Throughout this MD&A, we present our financial condition and results of operations in the way we believe will be most meaningful and representative of our business results. Some of the measurements we use are “non-GAAP financial measures” under Securities and Exchange Commission (SEC) rules and regulations. GAAP is the acronym for “generally accepted accounting principles” in the United States. The non-GAAP financial measures we present may not be comparable to similarly-named measures reported by other companies.

Book value per common share, excluding accumulated other comprehensive income (AOCI) adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets and deferred tax assets (DTA) (Adjusted book value per common share) is used to show the amount of our net worth on a per-common share basis after eliminating items that can fluctuate significantly from period to period including changes in fair value of AIG’s available for sale securities portfolio, foreign currency translation adjustments and U.S. tax attribute deferred tax assets. This measure also eliminates the asymmetrical impact resulting from changes in fair value of our available for sale securities portfolio wherein there is largely no offsetting impact for certain related insurance liabilities. In addition, we adjust for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets held by AIG in support of Fortitude Re’s reinsurance obligations to AIG post deconsolidation of Fortitude Re (Fortitude Re funds withheld assets) since these fair value movements are economically transferred to Fortitude Re. We exclude deferred tax assets representing U.S. tax attributes related to net operating loss carryforwards and foreign tax credits as they have not yet been utilized. Amounts for interim periods are estimates based on projections of full-year attribute utilization. As net operating loss carryforwards and foreign tax credits are utilized, the portion of the DTA utilized is included in these book value per common share metrics. Adjusted book value per common share is derived by dividing total AIG common shareholders’ equity, excluding AOCI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets, and DTA (Adjusted Common Shareholders’ Equity), by total common shares outstanding. The reconciliation to book value per common share, the most comparable GAAP measure, is presented in the Executive Summary section of this MD&A.

Return on common equity – Adjusted after-tax income excluding AOCI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets and DTA (Adjusted return on common equity) is used to show the rate of return on common shareholders’ equity. We believe this measure is useful to investors because it eliminates items that can fluctuate significantly from period to period, including changes in fair value of our available for sale securities portfolio, foreign currency translation adjustments and U.S. tax attribute deferred tax assets. This measure also eliminates the asymmetrical impact resulting from changes in fair value of our available for sale securities portfolio wherein there is largely no offsetting impact for certain related insurance liabilities. In addition, we adjust for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets since these fair value movements are economically transferred to Fortitude Re. We exclude deferred tax assets representing U.S. tax attributes related to net operating loss carryforwards and foreign tax credits as they have not yet been utilized. Amounts for interim periods are estimates based on projections of full-year attribute utilization. As net operating loss carryforwards and foreign tax credits are utilized, the portion of the DTA utilized is included in Adjusted return on common equity. Adjusted return on common equity is derived by dividing actual or annualized adjusted after-tax income attributable to AIG common shareholders by average Adjusted Common Shareholders’ Equity. The reconciliation to return on common equity, the most comparable GAAP measure, is presented in the Executive Summary section of this MD&A.

Adjusted after-tax income attributable to AIG common shareholders is derived by excluding the tax effected adjusted pre-tax income (APTI) adjustments described below, dividends on preferred stock, and the following tax items from net income attributable to AIG:

- deferred income tax valuation allowance releases and charges;
- changes in uncertain tax positions and other tax items related to legacy matters having no relevance to our current businesses or operating performance; and
- net tax charge related to the enactment of the Tax Cuts and Jobs Act (the Tax Act);

and by excluding the net realized gains (losses) and other charges from noncontrolling interests.

We use the following operating performance measures because we believe they enhance the understanding of the underlying profitability of continuing operations and trends of our business segments. We believe they also allow for more meaningful comparisons with our insurance competitors. When we use these measures, reconciliations to the most comparable GAAP measure are provided on a consolidated basis in the Consolidated Results of Operations section of this MD&A.

Adjusted revenues exclude Net realized gains (losses), income from non-operating litigation settlements (included in Other income for GAAP purposes) and changes in fair value of securities used to hedge guaranteed living benefits (included in Net investment income for GAAP purposes). Adjusted revenues is a GAAP measure for our segments.

Adjusted pre-tax income is derived by excluding the items set forth below from income from continuing operations before income tax. This definition is consistent across our segments. These items generally fall into one or more of the following broad categories: legacy matters having no relevance to our current businesses or operating performance; adjustments to enhance transparency to the underlying economics of transactions; and measures that we believe to be common to the industry. APTI is a GAAP measure for our segments. Excluded items include the following:

- changes in fair value of securities used to hedge guaranteed living benefits;
- changes in benefit reserves and deferred policy acquisition costs (DAC), value of business acquired (VOBA), and sales inducement assets (SIA) related to net realized gains and losses;
- changes in the fair value of equity securities;
- net investment income on Fortitude Re funds withheld assets;
- following deconsolidation of Fortitude Re, net realized gains and losses on Fortitude Re funds withheld assets;
- loss (gain) on extinguishment of debt;
- all net realized gains and losses except earned income (periodic settlements and changes in settlement accruals) on derivative instruments used for non-qualifying (economic) hedging or for asset replication. Earned income on such economic hedges is reclassified from net realized gains and losses to specific APTI line items based on the economic risk being hedged (e.g. net investment income and interest credited to policyholder account balances);
- income or loss from discontinued operations;
- net loss reserve discount benefit (charge);
- pension expense related to a one-time lump sum payment to former employees;
- income and loss from divested businesses;
- non-operating litigation reserves and settlements;
- restructuring and other costs related to initiatives designed to reduce operating expenses, improve efficiency and simplify our organization;
- the portion of favorable or unfavorable prior year reserve development for which we have ceded the risk under retroactive reinsurance agreements and related changes in amortization of the deferred gain;
- integration and transaction costs associated with acquiring or divesting businesses;
- losses from the impairment of goodwill; and
- non-recurring costs associated with the implementation of non-ordinary course legal or regulatory changes or changes to accounting principles.

• **General Insurance**

- **Ratios:** We, along with most property and casualty insurance companies, use the loss ratio, the expense ratio and the combined ratio as measures of underwriting performance. These ratios are relative measurements that describe, for every \$100 of net premiums earned, the amount of losses and loss adjustment expenses (which for General Insurance excludes net loss reserve discount), and the amount of other underwriting expenses that would be incurred. A combined ratio of less than 100 indicates underwriting income and a combined ratio of over 100 indicates an underwriting loss. Our ratios are calculated using the relevant segment information calculated under GAAP, and thus may not be comparable to similar ratios calculated for regulatory reporting purposes. The underwriting environment varies across countries and products, as does the degree of litigation activity, all of which affect such ratios. In addition, investment returns, local taxes, cost of capital, regulation, product type and competition can have an effect on pricing and consequently on profitability as reflected in underwriting income and associated ratios.
- **Accident year loss and accident year combined ratios, as adjusted:** both the accident year loss and accident year combined ratios, as adjusted, exclude catastrophe losses and related reinstatement premiums, prior year development, net of premium adjustments, and the impact of reserve discounting. Natural catastrophe losses are generally weather or seismic events having a net impact on AIG in excess of \$10 million each and man-made catastrophe losses, such as terrorism and civil disorders that exceed the \$10 million threshold. We believe that as adjusted ratios are meaningful measures of our underwriting results on an ongoing basis as they exclude catastrophes and the impact of reserve discounting which are outside of management's control. We also exclude prior year development to provide transparency related to current accident year results.

• **Life and Retirement**

- **Premiums and deposits:** includes direct and assumed amounts received and earned on traditional life insurance policies, group benefit policies and life-contingent payout annuities, as well as deposits received on universal life, investment-type annuity contracts, Federal Home Loan Bank (FHLB) funding agreements and mutual funds.

Results from discontinued operations are excluded from all of these measures.

Critical Accounting Estimates

The preparation of financial statements in accordance with GAAP requires the application of accounting policies that often involve a significant degree of judgment.

The accounting policies that we believe are most dependent on the application of estimates and assumptions, which are critical accounting estimates, are related to the determination of:

- loss reserves;
- valuation of future policy benefit liabilities and timing and extent of loss recognition;
- valuation of liabilities for guaranteed benefit features of variable annuity products;
- valuation of embedded derivatives for fixed index annuity and life products;
- estimated gross profits to value deferred acquisition costs for investment-oriented products, for example universal life, variable and fixed annuities, and fixed indexed annuities;
- reinsurance assets, including the allowance for credit losses;
- goodwill impairment;
- allowances for credit losses primarily on loans and available for sale fixed maturity securities;
- liability for legal contingencies;
- fair value measurements of certain financial assets and liabilities; and
- income tax assets and liabilities, including recoverability of our net deferred tax asset and the predictability of future tax operating profitability of the character necessary to realize the net deferred tax asset.

These accounting estimates require the use of assumptions about matters, some of which are highly uncertain at the time of estimation. To the extent actual experience differs from the assumptions used, our consolidated financial condition, results of operations and cash flows could be materially affected.

For a complete discussion of our critical accounting estimates, see Part II, Item 7. MD&A – Critical Accounting Estimates in the 2020 Annual Report.

Executive Summary

OVERVIEW

This overview of the MD&A highlights selected information and may not contain all of the information that is important to current or potential investors in our securities. You should read this Quarterly Report on Form 10-Q, together with the 2020 Annual Report, in their entirety for a more detailed description of events, trends, uncertainties, risks and critical accounting estimates affecting us.

Separation of Life and Retirement Business and Strategic Partnership with the Blackstone Group

On October 26, 2020, AIG announced its intention to separate its Life and Retirement business from AIG. On July 14, 2021, AIG and The Blackstone Group Inc. (Blackstone) announced that they have reached a definitive agreement for Blackstone to acquire a 9.9 percent equity stake in SAFG Retirement Services, Inc. (SAFG), which is the holding company for AIG's Life and Retirement business, for \$2.2 billion in an all cash transaction, subject to adjustment if the final pro forma adjusted book value is greater or lesser than the target pro forma adjusted book value. The transaction contemplates that most of AIG's investment operations would be transferred to SAFG or its subsidiaries as part of the separation. As part of this agreement, AIG also agreed to enter into a long-term strategic asset management relationship with Blackstone to manage an initial \$50 billion of Life and Retirement's existing investment portfolio upon closing of the equity investment, with that amount increasing by increments of \$8.5 billion per year for the next five years beginning in the third or fourth quarter of 2022, for an aggregate of \$92.5 billion. Following the closing of the transaction, Blackstone will be entitled to designate one member of the board of directors of the Life and Retirement holding company, which will consist of 11 directors. Pursuant to the definitive agreement, Blackstone will be required to hold its ownership interest in SAFG following the completion of the separation of the Life and Retirement business, subject to exceptions permitting Blackstone to sell 25%, 67% and 75% of its shares after the first, second and third anniversaries, respectively, of the initial public offering of SAFG (the IPO), with the transfer restrictions terminating in full on the fifth anniversary of the IPO. In the event that the IPO of SAFG is not completed prior to the second anniversary of the closing of the transaction, Blackstone will have the right to require AIG to undertake the IPO, and in the event that the IPO has not been completed prior to the third anniversary of the closing, Blackstone will have the right to exchange all or a portion of its ownership interest in SAFG for shares of AIG's common stock on the terms set forth in the definitive agreement. These transactions are subject to customary closing conditions, including the expiration or termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (the HSR Act), and are expected to close in the third quarter of 2021. While we currently believe the IPO is the next step in the separation of the Life and Retirement business from AIG, no assurance can be given regarding the form that future separation transactions may take or the specific terms or timing thereof, or that a separation will in fact occur. Any separation transaction will be subject to the satisfaction of various conditions and approvals, including approval by the AIG Board of Directors, receipt of insurance and other required regulatory approvals, and satisfaction of any applicable requirements of the SEC.

On July 14, 2021, AIG and Blackstone Real Estate Income Trust (BREIT), a long-term, perpetual capital vehicle affiliated with Blackstone, announced that they have reached a definitive agreement for BREIT to acquire AIG's interests in a U.S. affordable housing portfolio for approximately \$5.1 billion, subject to certain adjustments, in an all cash transaction. This transaction is subject to customary closing conditions and is expected to close in the fourth quarter of 2021.

Debt Cash Tender Offers

In the second quarter of 2021, we repurchased, through cash tender offers, and canceled approximately \$254 million aggregate principal amount of certain notes and debentures issued or guaranteed by AIG for an aggregate purchase price of approximately \$359 million and wrote off \$4 million of unamortized debt issuance costs, resulting in a total loss on extinguishment of debt of approximately \$109 million.

Sale of Certain AIG Life and Retirement Retail Mutual Funds Business

On February 8, 2021, AIG announced the execution of a definitive agreement with Touchstone Investments (Touchstone), an indirect wholly-owned subsidiary of Western & Southern Financial Group, to sell certain assets of AIG Life and Retirement's Retail Mutual Funds business. As of June 30, 2021, AIG Life and Retirement's Retail Mutual Funds business managed \$7.1 billion in assets across eighteen funds. The transaction closed on July 16, 2021 at which time we received initial proceeds, and twelve retail mutual funds managed by SunAmerica Asset Management, LLC (SAAMCo), a member of AIG Life and Retirement, with \$6.8 billion in assets, were reorganized into Touchstone funds. Additional proceeds may be earned over a three-year period based on asset levels in certain reorganized funds. Six retail mutual funds managed by SAAMCo and not included in the transaction were liquidated. AIG Life and Retirement will retain its fund management platform and capabilities dedicated to its variable insurance products.

Sale of Fortitude Holdings

On June 2, 2020, we completed the sale of a majority of the interests in Fortitude Group Holdings, LLC (Fortitude Holdings) to Carlyle FRL, L.P. (Carlyle FRL), an investment fund advised by an affiliate of The Carlyle Group Inc. (Carlyle), and T&D United Capital Co., Ltd. (T&D), a subsidiary of T&D Holdings, Inc., under the terms of a membership interest purchase agreement entered into on November 25, 2019 by and among AIG, Fortitude Holdings, Carlyle FRL, Carlyle, T&D and T&D Holdings, Inc. (the Majority Interest Fortitude Sale). AIG established Fortitude Re, a wholly owned subsidiary of Fortitude Holdings, in 2018 in a series of reinsurance transactions related to AIG's Run-Off portfolio. As of June 30, 2021, approximately \$30.1 billion of reserves from AIG's Life and Retirement Run-Off Lines and approximately \$4.0 billion of reserves from AIG's General Insurance Run-Off Lines, related to business written by multiple wholly-owned AIG subsidiaries, had been ceded to Fortitude Re under these reinsurance transactions. As of closing of the Majority Interest Fortitude Sale, these reinsurance transactions are no longer considered affiliated transactions and Fortitude Re is the reinsurer of the majority of AIG's Run-Off operations. As these reinsurance transactions are structured as modified coinsurance and loss portfolio transfers with funds withheld, following the closing of the Majority Interest Fortitude Sale, AIG continues to reflect the invested assets, which consist mostly of available for sale securities, supporting Fortitude Re's obligations, in AIG's financial statements.

AIG sold a 19.9 percent ownership interest in Fortitude Holdings to TC Group Cayman Investments Holdings, L.P., an affiliate of Carlyle, in November 2018. As a result of completion of the Majority Interest Fortitude Sale, Carlyle FRL purchased from AIG a 51.6 percent ownership interest in Fortitude Holdings and T&D purchased from AIG a 25 percent ownership interest in Fortitude Holdings; AIG retained a 3.5 percent ownership interest in Fortitude Holdings and one seat on its Board of Managers. The \$2.2 billion of proceeds received by AIG at closing included (i) the \$1.8 billion under the Majority Interest Fortitude Sale, subject to a post-closing purchase price adjustment pursuant to which AIG would pay Fortitude Re for certain adverse development in property casualty related reserves, based on an agreed methodology, that may occur through December 31, 2023, up to a maximum payment of \$500 million; and (ii) a \$383 million purchase price adjustment from Carlyle FRL and T&D, corresponding to their respective portions of a proposed \$500 million non-pro rata distribution from Fortitude Holdings that was not received by AIG prior to the closing. Effective in the second quarter of 2021, AIG, Fortitude Holdings, Carlyle FRL, T&D and Carlyle amended the purchase agreement to finalize the post-closing purchase price adjustment for adverse reserve development. As a result of this amendment, during the three months ended June 30, 2021, AIG recorded a \$21 million benefit through Policyholder benefits and losses incurred and eliminated further net exposure to adverse development on the reserves ceded to Fortitude Re.

For further discussion on the sale of Fortitude Holdings see Note 7 to the Condensed Consolidated Financial Statements.

AIG'S OPERATING STRUCTURE

AIG reports the results of its businesses through three segments – General Insurance, Life and Retirement and Other Operations. General Insurance consists of two operating segments – North America and International. Life and Retirement consists of four operating segments – Individual Retirement, Group Retirement, Life Insurance and Institutional Markets. Other Operations is primarily comprised of corporate, our institutional asset management business and consolidation and eliminations. On October 26, 2020, AIG announced its intention to separate its Life and Retirement business from AIG.

Consistent with how we manage our business, our General Insurance North America operating segment primarily includes insurance businesses in the United States, Canada and Bermuda, and our global reinsurance business, AIG Re. Our General Insurance International operating segment includes regional insurance businesses in Japan, the United Kingdom, Europe, Middle East and Africa (EMEA region), Asia Pacific, Latin America and Caribbean, and China. International also includes the results of Talbot Holdings, Ltd. as well as AIG's global specialty business.

For further discussion on our business segments see Note 3 to the Condensed Consolidated Financial Statements, and for further discussion on the separation of Life and Retirement see Note 1 to the Condensed Consolidated Financial Statements.

Business Segments

General Insurance

General Insurance is a leading provider of insurance products and services for commercial and personal insurance customers. It includes one of the world's most far-reaching property casualty networks. General Insurance offers a broad range of products to customers through a diversified, multichannel distribution network. Customers value General Insurance's strong capital position, extensive risk management and claims experience and its ability to be a market leader in critical lines of the insurance business.

General Insurance includes the following major operating companies: National Union Fire Insurance Company of Pittsburgh, Pa. (National Union); American Home Assurance Company (American Home); Lexington Insurance Company (Lexington); AIG General Insurance Company, Ltd. (AIG Sonpo); AIG Asia Pacific Insurance, Pte, Ltd.; AIG Europe S.A.; American International Group UK Ltd.; Validus Reinsurance, Ltd. (Validus Re); Talbot Holdings Ltd. (Talbot); Western World Insurance Group, Inc. and Glatfelter Insurance Group (Glatfelter).

Life and Retirement

Life and Retirement is a unique franchise that brings together a broad portfolio of life insurance, retirement and institutional products offered through an extensive, multichannel distribution network. It holds long-standing, leading market positions in many of the markets it serves in the U.S. With its strong capital position, customer-focused service, breadth of product expertise and deep distribution relationships across multiple channels, Life and Retirement is well positioned to serve growing market needs.

Life and Retirement includes the following major operating companies: American General Life Insurance Company (AGL); The Variable Annuity Life Insurance Company (VALIC); The United States Life Insurance Company in the City of New York (U.S. Life); Laya Healthcare Limited and AIG Life Limited.

Other Operations

Other Operations primarily consists of income from assets held by AIG Parent and other corporate subsidiaries, deferred tax assets related to tax attributes, corporate expenses and intercompany eliminations, our institutional asset management business and results of our consolidated investment entities, General Insurance portfolios in run-off as well as the historical results of our legacy insurance lines ceded to Fortitude Re.

FINANCIAL PERFORMANCE SUMMARY

Net Income (Loss) Attributable to AIG Common Shareholders

Three Months Ended June 30,

(in millions)

2021 and 2020 Quarterly Comparison

Net income attributable to AIG Common Shareholders increased \$8.0 billion due to the following, on a pre-tax basis:

- the recognition of an \$8.4 billion loss on the closing of the Majority Interest Fortitude Sale in 2020;
- \$406 million lower net realized losses, as lower derivative losses on variable annuity embedded derivatives, net of related hedges (\$957 million) and other derivative and hedge activity (\$318 million) were offset by a larger mark-to-market net realized loss on the Fortitude Re embedded derivative (\$1.2 billion), with remaining impacts driven primarily by other changes in realized gains across our investment portfolio;
- \$309 million higher returns in our investment portfolio due primarily to Private Equity income compared to losses in the prior year period, partially offset by lower gains on fair value option bonds;
- General Insurance loss ratio improvement of 11.3 points primarily driven by change in business mix along with strong rate improvement, focused risk selection, improved terms and conditions and significantly lower catastrophe losses (9.8 points or \$556 million); and
- General Insurance expense ratio improvement of 2.2 points primarily driven by change in business mix, ongoing expense discipline and a higher premium base.

These pre-tax increases were partially offset by \$1.9 billion higher income tax expense with \$1.7 billion attributable to the tax benefit on the deconsolidation of Fortitude Holdings in 2020.

For further discussion see Consolidated Results of Operations.

Net Income (Loss) Attributable to AIG Common Shareholders
Six Months Ended June 30,
(in millions)

2021 and 2020 Year-to-Date Comparison

Net income attributable to AIG Common Shareholders increased \$10.2 billion due to the following, on a pre-tax basis:

- the recognition of an \$8.4 billion loss on the closing of the Majority Interest Fortitude Sale in 2020;
- \$1.5 billion higher returns in our investment portfolio due primarily to higher income on our alternative investments and fair value option equity securities gains, which was driven primarily by positive returns achieved in equity markets. This compares to the prior year where we experienced losses on our alternative investments and fair value option equity securities, which were driven by the equity market downturn associated with the onset of the COVID-19 pandemic, partially offset by declines in fair value option and available for sale bonds;
- \$137 million higher net realized gains, due to the favorable change in net realized gains on the Fortitude Re embedded derivative mark-to-market (\$1.2 billion), a reduction in the allowance for credit losses on fixed maturity securities (\$296 million) and other favorable changes in realized gains across our investment portfolio, largely offset by lower derivative gains on variable annuity embedded derivatives, net of related hedges (\$1.1 billion) and other derivative and hedge activity (\$1.0 billion);
- General Insurance loss ratio improvement of 6.2 points primarily driven by change in business mix along with strong rate improvement, focused risk selection, improved terms and conditions and significantly lower catastrophe losses (4.7 points or \$542 million); and
- General Insurance expense ratio improvement of 2.0 points primarily due to change in business mix, ongoing expense discipline and a higher premium base.

These pre-tax increases were partially offset by \$1.8 billion higher income tax expense with \$1.7 billion attributable to the tax benefit on the deconsolidation of Fortitude Holdings in 2020.

For further discussion see Consolidated Results of Operations.

Adjusted Pre-Tax Income*
Three Months Ended June 30,
(in millions)

2021 and 2020 Quarterly Comparison

Adjusted pre-tax income increased \$917 million primarily due to:

- General Insurance loss ratio improvement of 11.3 points primarily driven by change in business mix along with strong rate improvement, focused risk selection, improved terms and conditions and significantly lower catastrophe losses (9.8 points or \$556 million); and
- General Insurance expense ratio improvement of 2.2 points primarily driven by change in business mix, ongoing expense discipline and a higher premium base.

Adjusted Pre-Tax Income*
Six Months Ended June 30,
(in millions)

2021 and 2020 Year-to-Date Comparison

Adjusted pre-tax income increased \$2.0 billion primarily due to:

- \$476 million higher returns in our investment portfolio due primarily to higher income on our alternative investments, which was driven by positive returns achieved in equity markets. This compares to the prior year where we experienced losses on our alternative investments due to the equity market downturn associated with the onset of the COVID-19 pandemic;
- General Insurance loss ratio improvement of 6.2 points primarily driven by change in business mix along with strong rate improvement, focused risk selection, improved terms and conditions and significantly lower catastrophe losses (4.7 points or \$542 million); and
- General Insurance expense ratio improvement of 2.0 points primarily due to change in business mix, ongoing expense discipline and a higher premium base.

* Non-GAAP measure – for reconciliation of Non-GAAP to GAAP measures see Consolidated Results of Operations.

General Operating and Other Expenses
Three Months Ended June 30,
(in millions)

2021 and 2020 Quarterly Comparison

General operating and other expenses increased \$131 million primarily due to increases in performance-based employee costs (\$73 million) and transaction costs (\$31 million) partially offset by decreases in restructuring and other costs.

General operating and other expenses in the three-month periods ended June 30, 2021 and 2020 included approximately \$126 million and \$134 million of pre-tax restructuring and other costs, respectively, which were primarily comprised of employee severance charges and other costs related to organizational simplification, operational efficiency, and business rationalization.

General Operating and Other Expenses
Six Months Ended June 30,
(in millions)

2021 and 2020 Year-to-Date Comparison

General operating and other expenses increased \$66 million primarily due to increases in performance-based employee costs (\$73 million).

General operating and other expenses in the six-month periods ended June 30, 2021 and 2020 included approximately \$200 million and \$224 million of pre-tax restructuring and other costs, respectively, which were primarily comprised of employee severance charges and other costs related to organizational simplification, operational efficiency, and business rationalization.

AIG'S OUTLOOK – INDUSTRY AND ECONOMIC FACTORS

Our business is affected by industry and economic factors such as interest rates, currency exchange rates, credit and equity market conditions, catastrophic claims events, regulation, tax policy, competition, and general economic, market and political conditions. We continued to operate under challenging market conditions in the first six months of 2021, characterized by factors such as the impact of COVID-19 and the related governmental and societal responses, interest rate volatility, inflationary pressures, an uneven global economic recovery, global trade tensions and Brexit. Brexit has also affected the U.S. dollar/British pound exchange rate and increased the volatility of exchange rates among the Euro, British pound and the Japanese yen (the Major Currencies), which may continue for some time.

On October 26, 2020, AIG announced its intention to separate its Life and Retirement business from AIG. On July 14, 2021, AIG and Blackstone announced that they have reached a definitive agreement for Blackstone to acquire a 9.9 percent equity stake in SAFG, which is the holding company for AIG's Life and Retirement business, for \$2.2 billion in an all cash transaction, subject to adjustment if the final pro forma adjusted book value is greater or lesser than the target pro forma adjusted book value. The transaction contemplates that most of AIG's investment operations would be transferred to SAFG or its subsidiaries as part of the separation. As part of this agreement, AIG also agreed to enter into a long-term strategic asset management relationship with Blackstone to manage an initial \$50 billion of Life and Retirement's existing investment portfolio upon closing of the equity investment, with that amount increasing by increments of \$8.5 billion per year for the next five years beginning in the third or fourth quarter of 2022, for an aggregate of \$92.5 billion. These transactions are subject to customary closing conditions, including the expiration or termination of the waiting period under the HSR Act, and are expected to close in the third quarter of 2021. While we currently believe an initial public offering is the next step in the separation of the Life and Retirement business from AIG, no assurance can be given regarding the form that a separation transaction may take or the specific terms or timing thereof, or that a separation will in fact occur. Any separation transaction will be subject to the satisfaction of various conditions and approvals, including approval by the AIG Board of Directors, receipt of insurance and other required regulatory approvals, and satisfaction of any applicable requirements of the SEC.

On July 14, 2021, AIG and BREIT, a long-term, perpetual capital vehicle affiliated with Blackstone, announced that they have reached a definitive agreement for BREIT to acquire AIG's interests in a U.S. affordable housing portfolio for approximately \$5.1 billion, subject to certain adjustments, in an all cash transaction. This transaction is subject to customary closing conditions and is expected to close in the fourth quarter of 2021.

For additional information on the separation of AIG's Life and Retirement business, please see the 2020 Annual Report, Part I, Item 1A. Risk Factors – Business and Operations – No assurances can be given that the separation of our Life and Retirement business will occur or as to the specific terms or timing thereof. In addition, the separation could cause the emergence or exacerbate the effects of other risks to which AIG is exposed and Executive Summary – Overview.

Impact of COVID-19

We are continually assessing the impact on our business, operations and investments of COVID-19 and the resulting ongoing economic and societal disruption. These impacts initially included a global economic contraction, disruptions in financial markets, increased market volatility and declines in certain equity and other asset prices that had negative effects on our investments, our access to liquidity, our ability to generate new sales and the costs associated with claims. While many of the major global economies continue to recover and global financial markets appear to have largely stabilized, there remains a risk that the disruptions previously experienced could return as COVID-19 persists or new variants arise. In addition, in response to the crisis, new governmental, legislative and regulatory actions have been taken and continue to be developed that have resulted and could continue to result in additional restrictions and requirements, or court decisions rendered, relating to or otherwise affecting our policies that may have a negative impact on our business, operations and capital.

General Insurance offers numerous products for which we are monitoring claims activity and assessing adverse impact on future new and renewal business in relation to the COVID-19 crisis. We are continually reassessing our exposures in light of unfolding developments in the U.S. and globally and evaluating coverage by our reinsurance arrangements.

In our Life and Retirement business, the most significant impacts relating to COVID-19 have been the impact of interest rate and equity market levels on spread and fee income, deferred acquisition cost amortization and adverse mortality. We are actively monitoring our claims activity and the potential direct and indirect impacts that COVID-19 may have across our portfolio of Life and Retirement businesses.

We have a diverse investment portfolio with material exposures to various forms of credit risk. The far-reaching economic impacts of COVID-19 have been largely offset, to date, by intervention taken by governments and monetary authorities and equity market rebound resulting in a minimal impact on the value of the portfolio. At this point in time, uncertainty surrounding the duration and severity of the COVID-19 crisis makes the long-term financial impact difficult to quantify.

For additional information please see the 2020 Annual Report, Part I, Item 1A. Risk Factors – Market Conditions – COVID-19 is adversely affecting, and is expected to continue to adversely affect, our global business, financial condition and results of operations, and its ultimate impact will depend on future developments that are uncertain and cannot be predicted, including the scope, severity and duration of the crisis, and the governmental, legislative and regulatory actions taken and court decisions rendered in response thereto.

Impact of Changes in the Interest Rate Environment

Key U.S. benchmark rates initially rose sharply in the first three months of 2021 but subsequently fell reflecting concerns over future economic growth. The low interest rate environment negatively affects sales of interest rate sensitive products in our industry and negatively impacts the profitability of our existing business as we reinvest cash flows from investments, including increased calls and prepayments of fixed maturity securities and mortgage loans, at rates below the average yield of our existing portfolios. We actively manage our exposure to the interest rate environment through portfolio selection and asset-liability management, including spread management strategies for our investment-oriented products and economic hedging of interest rate risk from guarantee features in our variable and fixed index annuities. We may not be able to fully mitigate our interest rate risk by matching exposure of our assets relative to our liabilities. A low interest rate environment could also impair our ability to earn the returns assumed in the pricing and the reserving of our products at the time they were sold and issued.

Additionally, sustained low interest rates may result in higher pension expense due to the impact on discounting of projected benefit cash flows.

Annuity Sales and Surrenders

The interest rate environment has a significant impact on the annuity industry. Low long-term interest rates put pressure on investment returns, which may negatively affect sales of interest rate sensitive products and reduce future profits on certain existing fixed rate products. However, our disciplined rate setting has helped to mitigate some of the pressure on investment spreads. Rapidly rising interest rates could create the potential for increased sales, but may also drive higher surrenders. Fixed annuities have surrender charge periods, generally in the three-to-five year range, which may help mitigate increased early surrenders in a rising rate environment. In addition, older contracts that have higher minimum interest rates and continue to be attractive to the contract holders have driven better than expected persistency in fixed annuities, although the reserves for such contracts have continued to decrease over time in amount and as a percentage of the total annuity portfolio. We closely monitor surrenders of fixed annuities as contracts with lower minimum interest rates come out of the surrender charge period. Changes in interest rates significantly impact the valuation of our liabilities for annuities with guaranteed income features and the value of the related hedging portfolio.

Reinvestment and Spread Management

We actively monitor fixed income markets, including the level of interest rates, credit spreads and the shape of the yield curve. We also frequently review our interest rate assumptions and actively manage the crediting rates used for new and in-force business. Business strategies continue to evolve to maintain profitability of the overall business in light of the interest rate environment. A low interest rate environment puts margin pressure on pricing of new business and on existing products, due to the challenge of investing new money or recurring premiums and deposits, and reinvesting investment portfolio cash flows, in the low interest rate environment. In addition, there is investment risk associated with future premium receipts from certain in-force business. Specifically, the investment of these future premium receipts may be at a yield below that required to meet future policy liabilities.

The contractual provisions for renewal of crediting rates and guaranteed minimum crediting rates included in products may reduce spreads in a sustained low interest rate environment and thus reduce future profitability. Although this interest rate risk is partially mitigated through the asset-liability management process, product design elements and crediting rate strategies, a sustained low interest rate environment may negatively affect future profitability.

For additional information on our investment and asset-liability management strategies see Investments.

For investment-oriented products, for example universal life, and variable, fixed and fixed indexed annuities, in our Individual Retirement, Group Retirement, Life Insurance and Institutional Markets businesses, our spread management strategies include disciplined pricing and product design for new business, modifying or limiting the sale of products that do not achieve targeted spreads, using asset-liability management to match assets to liabilities to the extent practicable, and actively managing crediting rates to help mitigate some of the pressure on investment spreads. Renewal crediting rate management is done under contractual provisions that were designed to allow crediting rates to be reset at pre-established intervals in accordance with state and federal laws and subject to minimum crediting rate guarantees. We will continue to adjust crediting rates on in-force business to mitigate the pressure on spreads from declining base yields, but our ability to lower crediting rates may be limited by the competitive environment, contractual minimum crediting rates, and provisions that allow rates to be reset only at pre-established intervals. As interest rates begin to rise again, we may need to raise crediting rates on in-force business for competitive and other reasons, potentially offsetting a portion of the additional investment income resulting from investing in a higher interest rate environment.

Of the aggregate fixed account values of our Individual Retirement and Group Retirement annuity products, 68 percent were crediting at the contractual minimum guaranteed interest rate at June 30, 2021. The percentage of fixed account values of our annuity products that are currently crediting at rates above one percent was 59 percent at both June 30, 2021 and December 31, 2020. These businesses continue to focus on pricing discipline and strategies to manage the minimum guaranteed interest crediting rates offered on new sales in the context of regulatory requirements and competitive positioning. In the universal life products in our Life Insurance business, 67 percent of the account values were crediting at the contractual minimum guaranteed interest rate at June 30, 2021.

The following table presents fixed annuity and universal life account values of our Individual Retirement, Group Retirement and Life Insurance operating segments by contractual minimum guaranteed interest rate and current crediting rates, excluding balances ceded to Fortitude Re:

* Individual Retirement and Group Retirement amounts shown include fixed options within variable annuity products.

General Insurance

The impact of low interest rates on our General Insurance segment is primarily on our long-tail casualty line of business. We currently expect limited impacts on our existing long-tail casualty business as the duration of our assets is slightly longer than that of our liabilities. Sustained low interest rates would potentially impact new and renewal business for the long-tail casualty line as we may not be able to adjust our future pricing consistent with our profitability objectives to fully offset the impact of investing at lower rates. However, we will continue to be disciplined in pricing and risk selection.

In addition, for our General Insurance segment, sustained low interest rates may unfavorably affect the net loss reserve discount for workers' compensation, and to a lesser extent could favorably impact assumptions about future medical costs, the combined net effect of which could result in higher net loss reserves.

Standard of Care Developments

In our Life and Retirement business, we and our distributors are subject to laws and regulations regarding the standard of care applicable to sales of our products and the provision of advice to our customers. In recent years, many of these laws and regulations have been revised or reexamined while others have been newly adopted. We continue to closely follow these legislative and regulatory activities. *For additional information regarding these legislative and regulatory activities, see Item 1. Business – Regulation – U.S. Regulation – Standard of Care Developments in the 2020 Annual Report.* Changes in standard of care requirements or new standards issued by governmental authorities, such as the Department of Labor, the SEC, the National Association of Insurance Commissioners (NAIC) or state regulators and/or legislators, may affect our businesses, results of operations and financial condition. While we cannot predict the long-term impact of these legislative and regulatory developments on our Life and Retirement businesses, we believe our diverse product offerings and distribution relationships position us to compete effectively in this evolving marketplace.

Impact of Currency Volatility

Currency volatility remains acute. Such volatility affected line item components of income for those businesses with substantial international operations. In particular, growth trends in net premiums written reported in U.S. dollars can differ significantly from those measured in original currencies. The net effect on underwriting results, however, is significantly mitigated, as both revenues and expenses are similarly affected.

These currencies may continue to fluctuate, in either direction, especially as a result of the UK's exit from the European Union (EU), and such fluctuations will affect net premiums written growth trends reported in U.S. dollars, as well as financial statement line item comparability.

General Insurance businesses are transacted in most major foreign currencies. The following table presents the average of the quarterly weighted average exchange rates of the Major Currencies, which have the most significant impact on our businesses:

Rate for 1 USD	Three Months Ended		Percentage Change	Six Months Ended		Percentage Change
	June 30, 2021	2020		June 30, 2021	2020	
Currency:						
GBP	0.72	0.81	(11)%	0.73	0.79	(8)%
EUR	0.83	0.91	(9)%	0.83	0.91	(9)%
JPY	108.95	107.57	1 %	106.62	108.51	(2)%

Unless otherwise noted, references to the effects of foreign exchange in the General Insurance discussion of results of operations are with respect to movements in the Major Currencies included in the preceding table.

Consolidated Results of Operations

The following section provides a comparative discussion of our consolidated results of operations on a reported basis for the three- and six-month periods ended June 30, 2021 and 2020. Factors that relate primarily to a specific business are discussed in more detail within the business segment operations section.

For a discussion of the Critical Accounting Estimates that affect our results of operations see Critical Accounting Estimates in this MD&A and Part II, Item 7. MD&A – Critical Accounting Estimates in the 2020 Annual Report.

The following table presents our consolidated results of operations and other key financial metrics:

	Three Months Ended				Six Months Ended		
	June 30,			Percentage	June 30,		Percentage

(a) Six months ended June 30, 2021 includes the recent completion of audit activity by the Internal Revenue Service (IRS).

(b) Six months ended June 30, 2021 includes an increase in the valuation allowance against a portion of certain tax attribute carryforwards of AIG's U.S. federal consolidated income tax group, as well as net valuation allowance release in certain foreign jurisdictions.

(c) Includes all net realized gains and losses except earned income (periodic settlements and changes in settlement accruals) on derivative instruments used for non-qualifying (economic) hedging or for asset replication and net realized gains and losses on Fortitude Re funds withheld assets.

(d) Prior to June 2, 2020, noncontrolling interests was primarily due to the 19.9 percent investment in Fortitude Holdings by an affiliate of Carlyle, which occurred in the fourth quarter of 2018. Carlyle was allocated 19.9 percent of Fortitude Holdings' standalone financial results through the June 2, 2020 closing date of the Majority Interest Fortitude Sale. Fortitude Holdings' results were mostly eliminated in AIG's consolidated income from continuing operations given that its results arose from intercompany transactions. Noncontrolling interests was calculated based on the standalone financial results of Fortitude Holdings. The most significant component of Fortitude Holdings' standalone results was the change in fair value of the embedded derivatives which changes with movements in interest rates and credit spreads, and which was recorded in net realized gains and losses of Fortitude Holdings. In accordance with AIG's adjusted after-tax income definition, realized gains and losses are excluded from noncontrolling interests. Subsequent to the Majority Interest Fortitude Sale, AIG owns 3.5 percent of Fortitude Holdings and no longer consolidates Fortitude Holdings in its financial statements as of such date. The minority interest in Fortitude Holdings is carried at cost within AIG's Other invested assets, which was \$100 million as of June 30, 2021.

Fortitude Holdings' summarized financial information (standalone results), prior to the Majority Interest Fortitude Sale on June 2, 2020 is presented below:

	Three Months Ended June 30, 2020		Six Months Ended June 30, 2020	
	Fortitude Holdings	AIG Noncontrolling Interest	Fortitude Holdings	AIG Noncontrolling Interest
<i>(in millions)</i>				
Revenues	\$ 423	\$ 84	\$ 653	\$ 130
Expenses	244	49	702	140
Adjusted pre-tax income (loss)	179	35	(49)	(10)
Taxes (benefit) expense	38	8	(10)	(2)
Adjusted after-tax income (loss)	141	27	(39)	(8)
Net realized gains and other charges	872	174	383	77
Taxes on net realized gains and other charges	184	36	81	16
Net realized gains and other charges - after-tax	688	138	302	61
Net income	\$ 829	\$ 165	\$ 263	\$ 53

(e) For the three- and six-month periods ended June 30, 2020, because we reported net losses attributable to AIG common shareholders, all common stock equivalents are anti-dilutive and are therefore excluded from the calculation of diluted shares and diluted per share amounts. However, because we reported adjusted after-tax income attributable to AIG common shareholders, the calculation of adjusted after-tax income per diluted share attributable to AIG common shareholders includes 3,226,882 dilutive shares and 3,939,732 dilutive shares for the three- and six-month periods ended June 30, 2020, respectively.

QUARTERLY PRE-TAX INCOME (LOSS) COMPARISON FOR 2021 AND 2020

Pre-tax income of \$147 million in the three-month period ended June 30, 2021 compared to pre-tax loss of \$9.7 billion in the same period in 2020 primarily due to:

- the recognition of an \$8.4 billion loss on the closing of the Majority Interest Fortitude Sale in 2020;
- \$406 million decrease in net realized losses primarily due to:
 - Life and Retirement guaranteed living benefits, net of hedges, reflecting lower net realized losses in 2021 compared to the same period in the prior year, primarily due to changes in the movement in the non-performance risk adjustment (NPA), which is not hedged as part of our economic hedging program (see *Insurance Reserves – Life and Annuity Future Policy Benefits, Policyholder Contract Deposits and DAC – Variable Annuity Guaranteed Benefits and Hedging Results*); and
 - other derivative and hedge activity (\$318 million) and other changes in realized gains across our investment portfolio.
 - Partially offset by a larger mark-to-market net realized loss on the Fortitude Re embedded derivative (\$1.2 billion).
- \$309 million higher returns in our investment portfolio due primarily to Private Equity income compared to losses in the prior year period, partially offset by lower gains on fair value option bonds;
- General Insurance loss ratio improvement of 11.3 points primarily driven by change in business mix along with strong rate improvement, focused risk selection, improved terms and conditions and significantly lower catastrophe losses (9.8 points or \$556 million); and
- General Insurance expense ratio improvement of 2.2 points primarily driven by change in business mix, ongoing expense discipline and a higher premium base.

YEAR-TO-DATE PRE-TAX INCOME (LOSS) COMPARISON FOR 2021 AND 2020

Pre-tax income of \$4.9 billion in the six-month period ended June 30, 2021 compared to pre-tax loss of \$7.1 billion in the same period in 2020 primarily due to:

- the recognition of an \$8.4 billion loss on the closing of the Majority Interest Fortitude Sale in 2020;
- \$1.5 billion higher returns in our investment portfolio due primarily to higher income on our alternative investments and fair value option equity securities gains, which was driven primarily by positive returns achieved in equity markets. This compares to the prior year where we experienced losses on our alternative investments and fair value option equity securities, which were driven by the equity market downturn associated with the onset of the COVID-19 pandemic, partially offset by declines in fair value option and available for sale bonds;
- \$137 million increase in net realized gains primarily due to:
 - favorable change in net realized gains on the Fortitude Re embedded derivative mark-to-market (\$1.2 billion); and
 - a reduction in the allowance for credit losses on fixed maturity securities (\$296 million) and other favorable changes in realized gains across our investment portfolio.

These gains were largely offset by:

- Life and Retirement guaranteed living benefits, net of hedges, reflecting lower net realized gains in 2021 compared to the same period in the prior year, primarily due to changes in the movement in the NPA, which is not hedged as part of our economic hedging program (see *Insurance Reserves – Life and Annuity Future Policy Benefits, Policyholder Contract Deposits and DAC – Variable Annuity Guaranteed Benefits and Hedging Results*).
- Other derivative and hedge activity (\$1.0 billion).
- General Insurance loss ratio improvement of 6.2 points primarily driven by change in business mix along with strong rate improvement, focused risk selection, improved terms and conditions and significantly lower catastrophe losses (4.7 points or \$542 million); and
- General Insurance expense ratio improvement of 2.0 points primarily due to change in business mix, ongoing expense discipline and a higher premium base.

U.S. TAX LAW CHANGES

On December 22, 2017, the U.S. enacted the Tax Act. The Tax Act includes provisions for Global Intangible Low-Taxed Income (GILTI) under which taxes are imposed on the excess of a deemed return on tangible assets of certain foreign subsidiaries and for Base Erosion and Anti-Abuse Tax (BEAT) under which taxes are imposed on certain base eroding payments to affiliated foreign companies. While the U.S. tax authorities issued formal guidance, including recently issued regulations for BEAT and other provisions of the Tax Act, there are still certain aspects of the Tax Act that remain unclear and subject to substantial uncertainties. Additional guidance is expected in future periods. Such guidance may result in changes to the interpretations and assumptions we made and actions we may take, which may impact amounts recorded with respect to international provisions of the Tax Act, possibly materially. Consistent with accounting guidance, we treat BEAT as a period tax charge in the period the tax is incurred and have made an accounting policy election to treat GILTI taxes in a similar manner.

On March 27, 2020, the U.S. enacted the Coronavirus Aid, Relief, and Economic Security (CARES) Act to mitigate the economic impacts of the COVID-19 crisis. The tax provisions of the CARES Act have not had and are currently not expected to have a material impact on AIG's U.S. federal tax liabilities.

Repatriation Assumptions

For 2021, we consider our foreign earnings with respect to certain operations in Canada, South Africa, the Far East, Latin America, Bermuda as well as the European, Asia Pacific and Middle East regions to be indefinitely reinvested. These earnings relate to ongoing operations and have been reinvested in active business operations. Deferred taxes, if necessary, have been provided on earnings of non-U.S. affiliates whose earnings are not indefinitely reinvested.

INTERIM TAX CALCULATION METHOD

We use the estimated annual effective tax rate method in computing our interim tax provision. Certain items, including those deemed to be unusual, infrequent or that cannot be reliably estimated, are excluded from the estimated annual effective tax rate. In these cases, the actual tax expense or benefit is reported in the same period as the related item. Certain tax effects are also not reflected in the estimated annual effective tax rate, primarily certain changes in uncertain tax positions and realizability of deferred tax assets, and are recorded in the period in which the change occurs. While certain impacts of the Tax Act are included in our annual effective tax rate, we continue to refine our calculations as additional information becomes available, which may result in changes to the estimated annual effective tax rate. As of June 30, 2021, the annual effective tax rate includes the tax effects of actual and projected COVID-19 related losses and market developments.

INCOME TAX EXPENSE ANALYSIS

For the three-month period ended June 30, 2021, the effective tax rate on income from continuing operations was (2.0) percent. The effective tax rate on income from continuing operations differs from the statutory tax rate of 21 percent primarily due to tax benefits associated with the release of reserves for uncertain tax positions and interest related to a New York State tax settlement based on the completion of recent audit activity, tax exempt income, remeasurement of deferred taxes as a result of the increase in the UK corporate statutory income tax rate, and reclassifications from AOCI to income from continuing operations related to the disposal of available for sale securities. These tax benefits were partially offset by tax charges associated with the effect of foreign operations, state and local income taxes, and non-deductible transfer pricing charges. We also recognized a tax charge associated with reduction of net operating loss deferred tax assets in certain foreign jurisdictions, with a corresponding decrease in the related deferred tax asset valuation allowance. The effect of foreign operations is primarily related to income of our foreign operations taxed at statutory tax rates higher than 21 percent, other foreign taxes, and foreign income subject to U.S. taxation.

For the six-month period ended June 30, 2021, the effective tax rate on income from continuing operations was 16.3 percent. The effective tax rate on income from continuing operations differs from the statutory tax rate of 21 percent primarily due to tax benefits associated with the release of reserves for uncertain tax positions, penalties and interest related to the recent completion of audit activity by the IRS, release of reserves for uncertain tax positions and interest related to a New York State tax settlement based on the completion of recent audit activity, tax exempt income, remeasurement of deferred taxes as a result of an increase in the UK corporate income tax rate enacted during the second quarter, and reclassifications from AOCI to income from continuing operations related to the disposal of available for sale securities. These tax benefits were partially offset by tax charges associated with the establishment of U.S. federal valuation allowance related to certain tax attribute carryforwards, the effect of foreign operations, excess tax charges related to share based compensation payments recorded through the income statement, state and local income taxes, and non-deductible transfer pricing charges. We also recognized a tax charge associated with reduction of net operating loss deferred tax assets in certain foreign jurisdictions, with a corresponding decrease in the related deferred tax asset valuation allowance. The effect of foreign operations is primarily related to income of our foreign operations taxed at statutory tax rates higher than 21 percent, other foreign taxes, and foreign income subject to U.S. taxation.

For the three-month period ended June 30, 2020, the effective tax rate on loss from continuing operations was 19.6 percent. The effective tax rate on loss from continuing operations differs from the statutory tax rate of 21 percent primarily due to tax effects of the Majority Interest Fortitude Sale, tax charges associated with the increase of U.S. federal valuation allowance related to certain tax attribute carryforwards, accrual of interest associated with IRS and other tax authority matters, the effect of foreign operations, state and local income taxes, and non-deductible transfer pricing charges, partially offset by tax benefits associated with tax exempt income, and reclassifications from AOCI to income from continuing operations related to the disposal of available for sale securities. The effect of foreign operations is primarily related to income in our foreign operations taxed at statutory tax rates higher than 21 percent, other foreign taxes, and foreign income subject to U.S. taxation.

For the six-month period ended June 30, 2020, the effective tax rate on loss from continuing operations was 14.0 percent. The effective tax rate on loss from continuing operations differs from the statutory tax rate of 21 percent primarily due to tax effects of the Majority Interest Fortitude Sale, tax charges associated with the establishment of U.S. federal valuation allowance related to certain tax attribute carryforwards, accrual of interest associated with IRS and other tax authority matters, excess tax charges related to share based compensation payments recorded through the income statement, the effect of foreign operations, state and local income taxes, and non-deductible transfer pricing charges, partially offset by tax benefits associated with tax exempt income, and reclassifications from AOCI to income from continuing operations related to the disposal of available for sale securities. The effect of foreign operations is primarily related to income in our foreign operations taxed at statutory tax rates higher than 21 percent, other foreign taxes, and foreign income subject to U.S. taxation.

Business Segment Operations

Our business operations consist of General Insurance, Life and Retirement, and Other Operations.

General Insurance consists of two operating segments: North America and International. Life and Retirement consists of four operating segments: Individual Retirement, Group Retirement, Life Insurance and Institutional Markets. Other Operations is primarily comprised of corporate, our institutional asset management business and consolidation and eliminations.

On October 26, 2020, AIG announced its intention to separate its Life and Retirement business from AIG. *For further discussion on the separation of Life and Retirement see Note 1 to the Condensed Consolidated Financial Statements.*

The following table summarizes Adjusted pre-tax income (loss) from our business segment operations. See also Note 3 to the Condensed Consolidated Financial Statements.

General Insurance

General Insurance is managed by our geographic markets of North America and International. Our global presence is reflected in our multinational capabilities to provide our Commercial Lines and Personal Insurance products within these geographic markets.

PRODUCTS AND DISTRIBUTION

Liability: Products include general liability, environmental, commercial automobile liability, workers' compensation, excess casualty and crisis management insurance products. Casualty also includes risk-sharing and other customized structured programs for large corporate and multinational customers.

Financial Lines: Products include professional liability insurance for a range of businesses and risks, including directors and officers, mergers and acquisitions, fidelity, employment practices, fiduciary liability, cyber risk, kidnap and ransom, and errors and omissions insurance.

Property: Products include commercial and industrial property as well as package insurance products and services that cover exposures to man-made and natural disasters, including business interruption.

Global Specialty: Products include aerospace, political risk, trade credit, portfolio solutions, energy-related property insurance products and marine.

Crop Risk Services: Products include hailstorm and multi-peril insurance.

Personal Lines: Products include personal auto and property in selected markets and insurance for high net-worth individuals offered through AIG's Private Client Group (PCG) in the U.S. that covers auto, homeowners, umbrella, yacht, fine art and collections. In addition, we offer extended warranty insurance and services covering electronics, appliances, and HVAC.

Accident & Health: Products include voluntary and sponsor-paid personal accident and supplemental health products for individuals, employees, associations and other organizations, as well as a broad range of travel insurance products and services for leisure and business travelers.

General Insurance products in North America and International markets are distributed through various channels, including captive and independent agents, brokers, affinity partners, airlines and travel agents, and retailers. Our global platform enables writing multinational and cross-border risks in both Commercial Lines and Personal Insurance.

BUSINESS STRATEGY

Profitable Growth: Deploy capital efficiently to act opportunistically and optimize diversity within the portfolio to grow in profitable lines, geographies and customer segments, while taking a disciplined approach in reducing exposure where terms and conditions do not meet our risk/return appetite. Look to inorganic growth opportunities in profitable markets and segments to expand our capabilities and footprint.

Reinsurance Optimization: Strategically partner with reinsurers to effectively manage exposure to losses arising from frequency of large catastrophic events and severity from individual risk losses. We strive to optimize our reinsurance program to manage volatility and protect the balance sheet from tail events and unpredictable net losses in support of our profitable growth objectives.

Underwriting Excellence: Empower and increase accountability of the underwriter and continue to integrate underwriting, claims and actuarial to enable better decision making. Focus on enhancing risk selection, driving consistent underwriting best practices and building robust monitoring standards to improve underwriting results.

COMPETITION AND CHALLENGES

Operating in a highly competitive industry, General Insurance competes against several hundred companies, specialty insurance organizations, mutual companies and other underwriting organizations in the U.S. In international markets, we compete against foreign insurance operations of large global insurance groups and local companies in specific market areas and product types. Insurance companies compete through a combination of risk acceptance criteria, product pricing, service and terms and conditions. General Insurance seeks to distinguish itself in the insurance industry primarily based on its well-established brand, global franchise, multinational capabilities, financial and capital strength, innovative products, claims handling expertise, expertise in providing specialized coverages and customer service.

We serve our business and individual customers on a global basis – from the largest multinational corporations to local businesses and individuals. Our clients benefit from our substantial underwriting expertise.

Our challenges include:

- long-tail Commercial Lines exposures that create added challenges to pricing and risk management;
- over-capacity in certain lines of business that creates downward market pressure on pricing;
- tort environment volatility in certain jurisdictions and lines of business; and
- volatility in claims arising from natural and man-made catastrophes, including public health events, such as the COVID-19 crisis.

OUTLOOK—INDUSTRY AND ECONOMIC FACTORS

Below is a discussion of the industry and economic factors impacting our operating segments:

The worldwide health and economic impact of COVID-19 continues to evolve, influenced by the scope, severity and duration of the crisis as well as the actions of governments, judiciaries, legislative bodies, regulators and other third parties in response, all of which are subject to continuing uncertainty. While production in certain lines of business continues to remain near or below pre-COVID-19 levels, although uneven, the global economic recovery is having a positive impact on consumer and business demand across our Commercial Line and Personal Insurance businesses. The overall results of General Insurance for the six months ended June 30, 2021 reflect continued strong performance from our Commercial Lines portfolio and positive momentum within Personal Insurance. Across our North America and International Commercial Lines of business we have seen increased demand for our insurance products with improvement in rates as well as terms and conditions. We continue to monitor potential inflationary impacts resulting from central bank stimulus, sharp increases in demand and supply chain disruptions on rate adequacy and loss cost trends. While the global economic outlook continues to improve, the ultimate impact of COVID-19 on our business will depend upon the speed at which government-mandated safety precautions can be fully lifted, the distribution and effectiveness of vaccinations, and the manner and speed with which economic activity sustainably rebounds.

General Insurance – North America

The North America business remains in a firm market with common drivers being higher industry-wide claims severity trends driven by social and economic inflation, higher natural catastrophe losses over recent years and the uncertain impact of COVID-19. While market discipline continues to support price increases across most lines (outside of Workers' Compensation), we are beginning to see capacity move back into the market given the improved conditions. Despite the higher rates, we have focused on retaining our best accounts which has led to improving retention across the portfolio. These retention rates are often coupled with an exposure limit management strategy to reduce volatility within the portfolio. We continue to proactively identify and prioritize targeted businesses to grow as market conditions warrant through effective portfolio management.

Personal Insurance growth prospects are supported by the need for full life cycle products and coverage, increases in personal wealth accumulation, and awareness of insurance protection and risk management. We compete in the high net-worth market, accident and health insurance, travel insurance, and warranty services and will continue to expand our innovative products and services to distribution partners and clients.

During the first quarter of 2021, AIG amended a distribution agreement with one of its largest travel insurance distributors. Following the effectiveness of the amendments, the revised agreement no longer represents a risk transfer transaction and as such will be accounted for under deposit accounting.

General Insurance – International

We believe our global presence provides Commercial Lines and Personal Insurance a competitive advantage, as the demand for multinational cross-border coverage and services increases due to the growing number of international customers, while giving us the ability to respond quickly to local market conditions and build client relationships.

We are continuing to pursue growth in our most profitable lines of business and diversify our portfolio across all regions by expanding key business lines (i.e. Financial Lines and Accident & Health) while remaining a market leader in key developed and developing markets. Overall, Commercial Lines continue to show positive rate increases, particularly in our Global Specialty, Financial Lines and Property portfolio and across international markets where market events or withdrawal of capability and capacity have favorably impacted pricing. We are maintaining our underwriting discipline, reducing gross and net limits, increasing use of reinsurance to reduce volatility, as well as continuing our risk selection strategy to improve profitability.

Personal Insurance focuses on individual customers, as well as group and corporate clients. Although market competition within Personal Insurance has increased, we continue to benefit from the underwriting quality, portfolio diversity, and generally low volatility of the short-tailed risk in these business lines, although some product classes are exposed to catastrophe losses.

Reinstatement premiums			2	19	21
Total catastrophe-related charges	11	\$	684	\$	1,114

(a) Natural catastrophe losses are generally weather or seismic events having a net impact on AIG in excess of \$10 million each and man-made catastrophe losses, such as terrorism and civil disorders that exceed the \$10 million threshold.

(b) Geography: North America primarily includes insurance businesses in the United States, Canada and Bermuda, and our global reinsurance business, AIG Re. International includes regional insurance businesses in Japan, the United Kingdom, EMEA region, Asia Pacific, Latin America and Caribbean, and China. International also includes the results of Talbot as well as AIG's global specialty business.

(c) As COVID-19 continues to evolve, impacting many lines of business, the number of events is yet to be determined.

Business and Financial Highlights

The North America General Insurance business continues to make progress in strengthening our underwriting, actively managing our portfolio to improve business mix and articulating our revised risk appetite to the marketplace. We are at the forefront of the industry across multiple lines in terms of driving rate momentum while simultaneously increasing the level of business retained in targeted lines. As we see disruption in the marketplace, we are well placed to capitalize on opportunities.

During the second quarter of 2020, AIG entered into a series of quota share reinsurance agreements, including with Lloyd's Syndicate 2019, a Lloyd's syndicate managed by Talbot Underwriting Ltd., and with PCG 2019 Corporate Member Ltd., both of which are wholly-owned subsidiaries of AIG, to cede PCG business written by our General Insurance operations to third parties. Overall, these ceded reinsurance transactions, accounted for under ASC 944 Financial Services – Insurance, further AIG's continued optimization of its General Insurance portfolio, create additional products for clients and diversify AIG's capital base. We consolidate our interest in Syndicate 2019 and account for the reinsurance transactions in a manner consistent with other third-party reinsurance arrangements.

Underwriting income of \$169 million in the three-month period ended June 30, 2021 compared to an underwriting loss of \$439 million in the same period in the prior year primarily due to significantly lower catastrophe losses, improvement in the accident year loss ratio, as adjusted and lower general operating expense ratio.

Underwriting loss decreased by \$509 million in the six-month period ended June 30, 2021 compared to the same period in the prior year primarily due to significantly lower catastrophe losses, improvement in the accident year loss ratio, lower acquisition ratio driven by changes in business mix including the impact of COVID-19 as well as favorable prior year reserve development.

Net premiums written increased in the three- and six-month periods ended June 30, 2021 compared to the same periods in the prior year by \$1.0 billion and \$1.2 billion, respectively, primarily due to growth in Commercial lines driven by strong rate improvement, higher renewal retentions, and strong new business production. While net premiums written increased across most Commercial Lines, it was particularly strong within our AIG Re, Property and Financial Lines businesses. Lower ceded premiums due to 2020 quota share reinsurance agreements, and growth in Travel and Warranty businesses driven by recovery in Travel activity and consumer spending also drove the increase in Personal Lines net premiums written. The increase in the six-month period ended June 30, 2021 was partially offset by lower production in Personal Lines due to the impact of COVID-19.

For a discussion of 2021 reinsurance programs see Part II, Item 7. MD&A – Enterprise Risk Management in the 2020 Annual Report.

North America Underwriting Income (Loss)

Three Months Ended June 30,

(in millions)

Quarterly 2021 and 2020 Comparison

Underwriting income of \$169 million in 2021 compared to an underwriting loss of \$439 million in 2020 primarily reflected:

- significantly lower catastrophe losses (\$417 million), notably due to the impact of COVID-19 in 2020;
- improvement in the accident year loss ratio, as adjusted (4.4 points) primarily driven by change in business mix along with strong rate improvement, focused risk selection and improved terms and conditions;
- higher favorable prior year reserve development (0.6 points or \$25 million), primarily driven by favorable development in PCG;
- lower general operating expense ratio (1.4 points) resulting from ongoing expense discipline and a higher premium base; and
- lower acquisition ratio (0.4 points) primarily driven by changes in business mix.

North America Underwriting Income (Loss)

Six Months Ended June 30,

(in millions)

Year-to-Date 2021 and 2020 Comparison

Underwriting loss decreased by \$509 million primarily due to:

- significantly lower catastrophe losses (\$235 million), notably due to the impact of COVID-19 in 2020 and lower natural catastrophe losses;
- improvement in the accident year loss ratio, as adjusted (1.9 points) primarily driven by change in business mix along with strong rate improvement, focused risk selection and improved terms and conditions;
- lower acquisition ratio (2.0 points) primarily driven by changes in business mix including the impact of COVID-19 most notably in Travel; and
- higher favorable prior year reserve development (1.2 points or \$58 million), primarily driven by favorable development in PCG.

North America Net Premiums Written
Three Months Ended June 30,
(in millions)

Quarterly 2021 and 2020 Comparison

Net premiums written increased by \$1.0 billion primarily due to:

- increased PCG net premiums written resulting from changes in our reinsurance program (\$510 million);
- growth in Commercial Lines (\$352 million), particularly within our AIG Re business, Casualty, Property, and Financial Lines businesses driven by strong rate improvement, higher renewal retentions and strong new business production; and
- growth in Personal Lines (\$142 million) particularly from our Travel and Warranty businesses driven by a rebound in travel activity and increased consumer spending.

North America Net Premiums Written
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

Net premiums written increased by \$1.2 billion primarily due to:

- growth in Commercial Lines (\$985 million), particularly within our AIG Re business, Casualty, Property, and Financial Lines businesses, driven by strong rate improvement, higher renewal retentions and strong new business production as well as higher Crop business driven by higher commodity prices;
- increased PCG net premiums written resulting from changes in our reinsurance program (\$249 million); and
- growth in Personal Lines in our Warranty business driven by increased consumer spending was offset by lower production in Travel due to the change in business mix and impact of COVID-19.

North America Combined Ratios Three Months Ended June 30,

Quarterly 2021 and 2020 Comparison

The decrease in the calendar year combined ratio of 24.1 points reflected a decrease in both the loss ratio (22.3 points) and the expense ratio (1.8 points).

The decrease in the loss ratio by 22.3 points reflected:

- significantly lower catastrophe losses (17.3 points);
- improvement in the accident year loss ratio, as adjusted (4.4 points) primarily driven by change in business mix along with strong rate improvement, focused risk selection and improved terms and conditions; and
- higher favorable prior year reserve development (0.6 points), primarily driven by favorable development in PCG.

The decrease in the expense ratio by 1.8 points reflected a lower general operating expense ratio (1.4 points) driven by higher premiums and impact of ongoing expense discipline and lower acquisition ratio (0.4 points) primarily driven by changes in business mix.

North America Combined Ratios Six Months Ended June 30,

Year-to-Date 2021 and 2020 Comparison

The decrease in the calendar year combined ratio of 9.7 points reflected a decrease in both the loss ratio (7.5 points) and the expense ratio (2.2 points).

The decrease in the loss ratio of 7.5 points reflected:

- significantly lower catastrophe losses (4.3 points), notably due to the impact of COVID-19 in 2020 and lower natural catastrophe losses;
- improvement in the accident year loss ratio, as adjusted (1.9 points) primarily driven by change in business mix along with strong rate improvement, focused risk selection and improved terms and conditions; and
- higher favorable prior year reserve development (1.2 points), primarily driven by favorable development in PCG.

The decrease in the expense ratio of 2.2 points reflected a lower acquisition ratio (2.0 points) primarily driven by changes in business mix including the impact of COVID-19 most notably in Travel.

Business and Financial Highlights

The International General Insurance business is focused on underwriting profits, driving operational efficiency, further improving underwriting margins, and growing profitably in businesses and geographies that support our growth strategy.

Underwriting income increased in the three- and six-month periods ended June 30, 2021 compared to the same periods in the prior year by \$198 million and \$457 million respectively, primarily due to significantly lower catastrophe losses, lower expense ratio partially offset by unfavorable prior year reserve development compared to favorable prior year reserve development in prior year.

Underwriting income in the six-month period ended June 30, 2021 compared to the same period in the prior year also increased due to improved accident year loss ratio, as adjusted.

Net premiums written, excluding the impact of foreign exchange, increased in the three- and six-month periods ended June 30, 2021 compared to the same periods in the prior year by \$156 million and \$287 million, respectively, primarily due to growth across most Commercial Lines, in particular Financial Lines, Global Specialty and Talbot driven by strong rate improvement, higher renewal retentions and strong new business production, partially offset by lower production in Personal Lines driven by underwriting actions taken to strengthen our portfolio and to maintain pricing discipline.

The increase in the six-month period ended June 30, 2021 was partially offset by lower production in Personal Lines due to the impact of COVID-19.

For a discussion of 2021 reinsurance programs see Part II, Item 7 MD&A – Enterprise Risk Management in the 2020 Annual Report.

International Underwriting Income (Loss)
Three Months Ended June 30,
(in millions)

Quarterly 2021 and 2020 Comparison

Underwriting income increased by \$198 million primarily due to:

- significantly lower catastrophe losses (\$139 million), notably due to the impact of COVID-19 in 2020; and
- a lower expense ratio by 2.3 points reflected a lower acquisition ratio (1.2 points) primarily driven by lower acquisition expenses as well as change in business mix and a lower general operating expense ratio (1.1 points) resulting from ongoing expense discipline and a higher premium base.

These increases were partially offset by:

- change in prior year reserve development against 2020 (0.8 points or \$48 million), primarily due to favorable development in Property and Global Specialty in prior year.

International Underwriting Income (Loss)
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

Underwriting income increased by \$457 million primarily due to:

- significantly lower catastrophe losses (\$307 million); notably due to the impact of COVID-19 in 2020;
- a lower expense ratio by 1.9 points reflected a lower acquisition ratio (1.1 points) primarily driven by lower acquisition cost as well as change in business mix and a lower general operating expense ratio (0.8 points) resulting from ongoing expense discipline and a higher premium base; and
- lower accident year loss ratio, as adjusted (0.9 points) primarily driven by change in business mix along with strong rate improvement, focused risk selection and improved terms and conditions.

These increases were partially offset by:

- change in prior year reserve development against 2020 (1.0 points or \$85 million), primarily due to favorable development in Casualty, Global Specialty and Property in prior year.

International Net Premiums Written
Three Months Ended June 30,
(in millions)

Quarterly 2021 and 2020 Comparison

Net premiums written, excluding the impact of foreign exchange, increased by \$156 million due to:

- growth across most Commercial Lines (\$182 million), notably in Financial Lines, Global Specialty and Talbot driven by strong rate improvement, higher renewal retentions and strong new business production.

This increase was partially offset by lower production in Personal Lines (\$26 million) driven by underwriting actions taken to strengthen our portfolio and to maintain pricing discipline, partially offset by growth in Warranty.

International Net Premiums Written
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

Net premiums written, excluding the impact of foreign exchange, increased by \$287 million due to:

- growth across most Commercial Lines (\$413 million), notably in Financial Lines, Property, Global Specialty and Talbot driven by strong rate improvement, higher renewal retentions and strong new business production.

These increases were partially offset by lower production in Personal Lines (\$126 million) driven by underwriting actions taken to strengthen our portfolio and to maintain pricing discipline as well as due to the impact of COVID-19, partially offset by growth in Warranty.

International Combined Ratios Three Months Ended June 30,

Quarterly 2021 and 2020 Comparison

The decrease in the calendar year combined ratio of 5.3 points reflected a decrease in both the loss ratio (3.0 points) and the expense ratio (2.3 points).

The decrease in the loss ratio by 3.0 points reflected:

- significantly lower catastrophe losses (4.2 points); partially offset by
- change in prior year reserve development against 2020 (0.8 points), primarily due to favorable development in Property and Global Specialty in prior year.

The decrease in the expense ratio by 2.3 points reflected:

- lower acquisition ratio (1.2 points) primarily driven by lower acquisition costs as well as change in business mix; and
- lower general operating expense ratio (1.1 points) resulting from ongoing expense discipline and a higher premium base.

International Combined Ratios Six Months Ended June 30,

Year-to-Date 2021 and 2020 Comparison

The decrease in the calendar year combined ratio of 6.5 points reflected a decrease in both the loss ratio (4.6 points) and the expense ratio (1.9 points).

The decrease in the loss ratio by 4.6 points reflected:

- significantly lower catastrophe losses (4.7 points), notably due to the impact of COVID-19 in 2020; and
- lower accident year loss ratio, as adjusted (0.9 points) primarily driven by change in business mix along with strong rate improvement, focused risk selection and improved terms and conditions.

These decreases were partially offset by change in prior year reserve development against 2020 (1.0 points), primarily due to favorable development in Casualty, Global Specialty and Property in prior year.

The decrease in the expense ratio by 1.9 points reflected:

- lower acquisition ratio (1.1 points) primarily driven by lower acquisition costs, change in business mix and changes in 2021 reinsurance program; and
- lower general operating expense ratio (0.8 points) due to ongoing expense discipline and a higher premium base.

Life and Retirement

Life and Retirement consists of four operating segments: Individual Retirement, Group Retirement, Life Insurance and Institutional Markets. We offer a broad portfolio of products in the U.S. through a multichannel distribution network and life and health products in the UK and Ireland.

PRODUCTS AND DISTRIBUTION

Variable Annuities: Products include variable annuities that offer a combination of growth potential, death benefit features and income protection features. Variable annuities are distributed primarily through banks, wirehouses, and regional and independent broker-dealers.

Index Annuities: Products include fixed index annuities that provide growth potential based in part on the performance of a market index as well as optional living guaranteed features that provide lifetime income protection. Fixed index annuities are distributed primarily through banks, broker-dealers, independent marketing organizations and independent insurance agents.

Fixed Annuities: Products include single premium fixed annuities, immediate annuities and deferred income annuities. Certain fixed deferred annuity products offer optional income protection features. The fixed annuities product line maintains an industry-leading position in the U.S. bank distribution channel by designing products collaboratively with banks and offering an efficient and flexible administration platform.

Retail Mutual Funds: Includes our mutual fund offerings and related administration and servicing operations. Retail Mutual Funds are distributed primarily through broker-dealers. *For further details on the Sale of Certain Assets of the Retail Mutual Funds Business, see Executive Summary – Overview.*

Group Retirement: Products and services consist of group mutual funds, group annuities, individual annuity and investment products, financial planning and advisory services, and plan administrative and compliance services.

AIG Retirement Services offers its products and services through The Variable Annuity Life Insurance Company and its subsidiaries, VALIC Financial Advisors, Inc. and VALIC Retirement Services Company.

AIG Retirement Services career financial advisors and independent financial advisors provide retirement plan participants with enrollment support and comprehensive financial planning services.

Life Insurance: In the U.S., products primarily include term life and universal life insurance distributed through independent marketing organizations, independent insurance agents, financial advisors and direct marketing. International operations include the distribution of life and health products in the UK and Ireland.

Institutional Markets: Products primarily include stable value wrap products, structured settlement and pension risk transfer annuities (direct and assumed reinsurance), corporate- and bank-owned life insurance, high net worth products and guaranteed investment contracts (GICs). Institutional Markets products are primarily distributed through specialized marketing and consulting firms and structured settlement brokers.

FHLB Funding Agreements are issued through our Individual Retirement, Group Retirement and Institutional Markets operating segments. Funding agreements are issued by our U.S. Life and Retirement companies to FHLBs in their respective districts at fixed or floating rates over specified periods, which can be prepaid at our discretion. Proceeds are generally invested in fixed income securities and other suitable investments to generate spread income. These investment contracts do not have mortality or morbidity risk and are similar to GICs.

BUSINESS STRATEGY

Deliver client-centric solutions through our unique franchise by bringing together a broad portfolio of life insurance, retirement and institutional products offered through an extensive, multichannel distribution network. Life and Retirement focuses on ease of doing business, offering valuable solutions, and expanding and deepening its distribution relationships across multiple channels.

Position market leading businesses to serve growing needs by continually enhancing product solutions, service delivery and digital capabilities while using data and analytics in an innovative manner to improve customer experience.

Individual Retirement will continue to capitalize on the opportunity to meet consumer demand for guaranteed income by maintaining innovative variable and index annuity products, while also managing risk from guarantee features through risk-mitigating product design and well-developed economic hedging capabilities.

Our fixed annuity products provide diversity in our annuity product suite by offering stable returns for retirement savings.

Group Retirement continues to enhance its technology platform to improve the customer experience for plan sponsors and individual participants. AIG Retirement Services' self-service tools paired with its career financial advisors provide a compelling service platform. Group Retirement's strategy also involves providing financial planning services for its clients and meeting their need for income in retirement. In this advisory role, Group Retirement's clients may invest in assets in which AIG or a third-party is custodian.

Life Insurance in the U.S. will continue to position itself for growth and changing market dynamics while continuing to execute strategies to enhance returns. Our focus is on materializing success from a multi-year effort of building state-of-the-art platforms and underwriting innovations, which are expected to bring process improvements and cost efficiencies.

In the UK, AIG Life Insurance will continue to focus on growing the business organically and through potential acquisition opportunities.

Institutional Markets continues to grow its assets under management across multiple product lines, including stable value wrap, GICs and pension risk transfer annuities. Our growth strategy is opportunistic and allows us to pursue select transactions that meet our risk-adjusted return requirements.

Enhance Operational Effectiveness by simplifying processes and operating environments to increase competitiveness, improve service and product capabilities and facilitate delivery of our target customer experience. We continue to invest in technology to improve operating efficiency and ease of doing business for our distribution partners and customers. We believe that simplifying our operating models will enhance productivity and support further profitable growth.

Manage our Balance Sheet through a rigorous approach to our products and portfolio. We match our product design and high-quality investments with our asset and liability exposures to support our cash and liquidity needs under various operating scenarios.

Deliver Value Creation and Manage Capital by striving to deliver solid earnings and returns on capital through disciplined pricing, sustainable underwriting improvements, expense efficiency, and diversification of risk, while optimizing capital allocation and efficiency within insurance entities to enhance return on common equity.

COMPETITION AND CHALLENGES

Life and Retirement operates in the highly competitive insurance and financial services industry in the U.S. and select international markets, competing against various financial services companies, including banks and other life insurance and mutual fund companies. Competition is primarily based on product pricing and design, distribution, financial strength, customer service and ease of doing business.

Our business remains competitive due to its long-standing market leading positions, innovative products, distribution relationships across multiple channels, customer-focused service and strong financial ratings.

Our primary challenges include:

- a low interest rate environment, which makes it difficult to profitably price new products and puts margin pressure on existing business due to lower reinvestment yields;
- increased competition in our primary markets, including aggressive pricing of annuities by private equity-backed annuity writers, increased competition and consolidation of employer groups in the group retirement planning market, and competitors with different profitability targets in the pension risk transfer space as well as other product lines;
- increasingly complex new and proposed regulatory requirements, which have affected industry growth and costs;
- upgrading our technology and underwriting processes while managing general operating expenses; and
- decreased premiums and deposits and adverse mortality experience due to COVID-19.

OUTLOOK—INDUSTRY AND ECONOMIC FACTORS

Below is a discussion of the industry and economic factors impacting our specific operating segments:

The worldwide health and economic impact of COVID-19 continues to evolve, influenced by the scope, severity and duration of the crisis as well as the actions of governments, judiciaries, legislative bodies, regulators and other third parties in response, as well as the distribution and effectiveness of vaccinations, all of which are subject to continuing uncertainty. The impact on the results for the first six months of 2021 with respect to COVID-19 is primarily but not limited to COVID-19-related mortality.

On October 26, 2020, AIG announced its intention to separate its Life and Retirement business from AIG. On July 14, 2021, AIG and Blackstone announced that they have reached a definitive agreement for Blackstone to acquire a 9.9 percent equity stake in SAFG, which is the holding company for AIG's Life and Retirement business, for \$2.2 billion in an all cash transaction, subject to adjustment if the final pro forma adjusted book value is greater or lesser than the target pro forma adjusted book value. The transaction contemplates that most of AIG's investment operations would be transferred to SAFG or its subsidiaries as part of the separation. As part of this agreement, AIG also agreed to enter into a long-term strategic asset management relationship with Blackstone to manage an initial \$50 billion of Life and Retirement's existing investment portfolio upon closing of the equity investment, with that amount increasing by increments of \$8.5 billion per year for the next five years beginning in the third or fourth quarter of 2022, for an aggregate of \$92.5 billion. These transactions are subject to customary closing conditions, including the expiration or termination of the waiting period under the HSR Act, and are expected to close in the third quarter of 2021. While we currently believe an initial public offering is the next step in the separation of the Life and Retirement business from AIG, no assurance can be given regarding the form that a separation transaction may take or the specific terms or timing thereof, or that a separation will in fact occur. Any separation transaction will be subject to the satisfaction of various conditions and approvals, including approval by the AIG Board of Directors, receipt of insurance and other required regulatory approvals, and satisfaction of any applicable requirements of the SEC.

On July 14, 2021, AIG and BREIT, a long-term, perpetual capital vehicle affiliated with Blackstone, announced that they have reached a definitive agreement for BREIT to acquire AIG's interests in a U.S. affordable housing portfolio for approximately \$5.1 billion, subject to certain adjustments, in an all cash transaction. This transaction is subject to customary closing conditions and is expected to close in the fourth quarter of 2021.

On February 8, 2021, AIG announced the execution of a definitive agreement with Touchstone, an indirect wholly-owned subsidiary of Western & Southern Financial Group, to sell certain assets of AIG Life and Retirement's Retail Mutual Funds business. As of June 30, 2021, AIG Life and Retirement's Retail Mutual Funds business managed \$7.1 billion in assets across eighteen funds. The transaction closed on July 16, 2021 at which time we received initial proceeds, and twelve retail mutual funds managed by SAAMCo, a member of AIG Life and Retirement, with \$6.8 billion in assets, were reorganized into Touchstone funds. Additional proceeds may be earned over a three-year period based on asset levels in certain reorganized funds. Six retail mutual funds managed by SAAMCo and not included in the transaction were liquidated. AIG Life and Retirement will retain its fund management platform and capabilities dedicated to its variable insurance products.

For additional information regarding the separation of Life and Retirement please see Note 1 to the Condensed Consolidated Financial Statements and the 2020 Annual Report, Part I, Item 1A. Risk Factors – Business and Operations – No assurances can be given that the separation of our Life and Retirement business will occur or as to the specific terms or timing thereof. In addition, the separation could cause the emergence or exacerbate the effects of other risks to which AIG is exposed.

Individual Retirement

Increasing life expectancy and reduced expectations for traditional retirement income from defined benefit programs and fixed income securities are leading Americans to seek additional financial security as they approach retirement. The strong demand for individual index and fixed deferred annuities with guaranteed income features has attracted increased competition in this product space. In response to the low interest rate environment, which has added pressure to profit margins, we have developed guaranteed income benefits for variable, fixed index, and fixed deferred annuities with margins that are less sensitive to the level of interest rates.

Changes in the capital markets (interest rate environment, equity markets, volatility) can have a significant impact on sales, surrender rates, investment returns, guaranteed income features, and net investment spreads in the annuity industry.

Group Retirement

Group Retirement competes in the defined contribution market under the AIG Retirement Services brand. AIG Retirement Services is a leading retirement plan provider in the U.S. for K-12 schools and school districts, higher education, healthcare, government and other not-for-profit institutions. The defined contribution market is a highly efficient and competitive market that requires support for both plan sponsors and individual participants. To meet this challenge, AIG Retirement Services is investing in a client-focused technology platform to support improved compliance and self-service functionality. AIG Retirement Services' model pairs self-service tools with its career financial advisors who provide individual plan participants with enrollment support and comprehensive financial planning services.

Changes in the interest rate and equity market environment can have a significant impact on investment returns, fee income, advisory and other income, guaranteed income features, and net investment spreads, and a moderate impact on sales and surrender rates.

Life Insurance

Consumers have a significant need for life insurance, whether it is used for income replacement for their surviving family, estate planning or wealth transfer. Additionally, consumers use life insurance to provide living benefits in case of chronic, critical or terminal illnesses, and to supplement retirement income.

In response to consumer needs and a low interest rate environment, our Life Insurance product portfolio will continue to promote products with lower long-duration interest rate risk and mitigate exposure to products that have long-duration interest rate risk through sales levels and hedging strategies.

As life insurance ownership remains at historical lows in the U.S. and the UK, efforts to expand the reach and increase the affordability of life insurance are critical. The industry is investing in consumer-centric efforts to reduce traditional barriers to securing life protection by simplifying the sales and service experience. Digitally enabled processes and tools provide a fast, friendly and simple path to life insurance protection.

Institutional Markets

Institutional Markets serves a variety of needs for corporate clients. Demand is driven by a number of factors including the macroeconomic and regulatory environment. We expect to see continued growth in the pension risk transfer market (direct and assumed reinsurance) as corporate plan sponsors look to transfer asset or liability, longevity, administrative and operational risks associated with their defined benefit plans.

Changes in the interest rate environment can have a significant impact on investment returns and net investment spreads, as well as the tax efficiency associated with institutional life insurance products, impacting organic growth opportunities.

For additional discussion of the impact of market interest rate movement on our Life and Retirement business see Executive Summary – AIG's Outlook – Industry and Economic Factors – Impact of Changes in the Interest Rate Environment.

LIFE AND RETIREMENT RESULTS

Business and Financial Highlights

The market environment continues to reflect uncertainties in the annuity business resulting from a low interest rate environment as well as the COVID-19 crisis. Premiums and deposits increased \$2.2 billion and \$2.4 billion in the three- and six-month periods ended June 30, 2021, respectively, compared to the same periods in the prior year. Net flows improved \$1.4 billion and \$2.4 billion in the three- and six-month periods ended June 30, 2021, respectively, compared to the same periods in the prior year.

Adjusted pre-tax income increased \$68 million in the three-month period ended June 30, 2021 compared to the same period in the prior year, primarily due to higher net investment income (\$134 million) and higher policy and advisory fee income, net of expenses (\$55 million). Partially offsetting these increases was higher variable annuity DAC/SIA amortization and reserves (\$95 million) compared to the same period in the prior year.

Adjusted pre-tax income increased \$295 million in the six-month period ended June 30, 2021 compared to the same period in the prior year primarily due to higher net investment income (\$229 million) and higher policy and advisory fee income, net of expenses (\$85 million).

Individual Retirement Adjusted Pre-Tax Income (Loss) Three Months Ended June 30, (in millions)

Quarterly 2021 and 2020 Comparison

Adjusted pre-tax income increased \$68 million primarily due to:

- increase in net investment income (\$134 million) driven by higher private equity income (\$149 million) and higher gains on call and tender income (\$15 million) partially offset by lower gains on securities on which the fair value option was elected (\$14 million) and lower base portfolio income (\$11 million) primarily due to decreased reinvestment rates on the base portfolio; and
- higher policy and advisory fee income, net of expenses (\$55 million), mostly due to an increase in variable annuity separate account assets driven by strong equity market performance.

Partially offsetting these increases were:

- increase in variable annuity DAC/SIA amortization and reserves (\$95 million) mostly due to lower market returns (\$78 million); and
- higher non-deferrable commissions (\$6 million), and general operating expenses (\$7 million).

Individual Retirement Adjusted Pre-Tax Income (Loss)
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

Adjusted pre-tax income increased \$295 million primarily due to:

- increase in net investment income (\$229 million) driven by higher private equity (\$204 million) and hedge fund (\$16 million) income, higher call and tender income (\$45 million) and higher gains on securities for which the fair value option was elected (\$26 million), partially offset by lower base portfolio income resulting from decreased reinvestment rates on the base portfolio (\$68 million); and
- higher policy and advisory fee income, net of expenses (\$85 million), mostly due to an increase in variable annuity separate account assets driven by robust equity market performance.

Partially offsetting these increases were:

- higher non-deferrable commissions (\$15 million) and general operating expenses (\$11 million).

INDIVIDUAL RETIREMENT GAAP PREMIUMS, PREMIUMS AND DEPOSITS, SURRENDERS AND NET FLOWS

For Individual Retirement, premiums primarily represent amounts received on life-contingent payout annuities. Premiums decreased \$6 million and \$22 million in the three- and six-month periods ended June 30, 2021, respectively, compared to the same periods in the prior year. Premiums are generally not a significant driver of Individual Retirement results.

Premiums and deposits are a non-GAAP financial measure that includes, in addition to direct and assumed premiums, deposits received on investment-type annuity contracts, FHLB funding agreements and mutual funds under administration.

Net flows for annuity products in Individual Retirement represent premiums and deposits less death, surrender and other withdrawal benefits. Net flows for mutual funds represent deposits less withdrawals.

The following table presents a reconciliation of Individual Retirement GAAP premiums to premiums and deposits:

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
Premiums	\$ 32	\$ 38	\$ 57	\$ 79
Deposits	3,949	1,759	7,298	4,838
Other	(3)	(3)	(4)	(7)
Premiums and deposits	\$ 3,978	\$ 1,794	\$ 7,351	\$ 4,910

The following table presents surrenders as a percentage of average reserves:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
Surrenders as a percentage of average reserves				
Fixed annuities	8.0 %	4.8 %	7.5 %	5.7 %
Variable and index annuities	6.5	4.7	6.4	5.5
Variable annuities	7.3	5.1	7.1	6.1
Index annuities	4.6	3.5	4.7	3.8

The following table presents reserves for fixed annuities and variable and index annuities by surrender charge category:

(in millions)	June 30, 2021		December 31, 2020*	
	Fixed Annuities	Variable and Index Annuities	Fixed Annuities	Variable and Index Annuities
No surrender charge	\$ 27,006	\$ 33,996	\$ 27,110	\$ 30,954
Greater than 0% - 2%	1,730	12,139	2,298	11,647
Greater than 2% - 4%	3,006	15,061	2,758	15,361
Greater than 4%	15,980	33,937	16,163	32,261
Non-surrenderable	2,219	-	2,214	-
Total reserves	\$ 49,941	\$ 95,133	\$ 50,543	\$ 90,223

* Certain reclassifications have been made to the prior year amounts for consistency with the current year presentation.

Individual Retirement annuities are typically subject to a four- to seven-year surrender charge period, depending on the product. For fixed annuities, the proportion of reserves subject to surrender charge at June 30, 2021 decreased compared to December 31, 2020. The increase in reserves with no surrender charge for variable and index annuities at June 30, 2021 compared to December 31, 2020 was principally due to normal aging of business.

A discussion of the significant variances in premiums and deposits and net flows for each product line follows:

Individual Retirement Premiums and Deposits (P&D) and Net Flows
Three Months Ended June 30,
(in millions)

Quarterly 2021 and 2020 Comparison

- **Fixed Annuities** Net flows remained negative but improved (\$171 million) over the prior year, mostly due to higher premiums and deposits (\$551 million) due to improved interest rate environment and prior year impact from distribution channel disruptions related to COVID-19, offset by higher surrenders and withdrawals (\$381 million).
- **Variable Annuities** Net flows improved (\$367 million) primarily due to higher premium and deposits (\$885 million) driven by growth in independent and regional broker dealers in part due to prior year impact from distribution channel disruptions related to COVID-19, partially offset by higher surrenders and withdrawals (\$462 million) and death benefits (\$56 million).
- **Index Annuities** Net flows increased (\$702 million) primarily due to higher premiums and deposits (\$834 million) driven by growth in wirehouse and bank channels partially due to prior year impact from distribution channel disruptions related to COVID-19, partially offset by higher surrenders and withdrawals (\$114 million) and death benefits (\$18 million).
- **Retail Mutual Funds** Net flows remained negative but improved (\$184 million) due to lower surrenders and withdrawals (\$270 million) partially offset by lower premiums and deposits (\$86 million) due to investors' continued preference for passive, low-fee investment vehicles. See discussion regarding sale of certain AIG Life and Retirement Retail Mutual Funds business in Note 1 to the Condensed Consolidated Financial Statements.

Individual Retirement Premiums and Deposits (P&D) and Net Flows
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

- **Fixed Annuities** Net flows remained negative but improved (\$202 million) over the prior year, mostly due to higher premiums and deposits (\$542 million) due to improved interest rate environment and prior year impact from distribution channel disruptions related to COVID-19, and lower death benefits (\$97 million) partially offset by higher surrenders and withdrawals (\$437 million).
- **Variable Annuities** Variable annuity net flows improved (\$538 million) primarily due to higher premium and deposits (\$1.2 billion) driven by growth in independent and regional broker dealers in part due to prior year impact from distribution channel disruptions related to COVID-19, partially offset by higher surrenders and withdrawal (\$544 million) and death benefits (\$143 million).
- **Index Annuities** Net flows increased (\$634 million) primarily due to higher premiums and deposits (\$876 million) driven by growth in wirehouse and bank channels partially due to prior year impact from distribution channel disruptions related to COVID-19, partially offset by higher surrenders and withdrawal (\$201 million) and death benefits (\$41 million).
- **Retail Mutual Funds** Net flows remained negative but improved (\$1.1 billion) due to lower surrenders and withdrawals (\$1.3 billion) partially offset by lower premiums and deposits (\$201 million) due to investors' continued preference for passive, low-fee investment vehicles, and the distribution channel disruptions related to COVID-19. *See discussion regarding sale of certain AIG Life and Retirement Retail Mutual Funds business in Note 1 to the Condensed Consolidated Financial Statements.*

Business and Financial Highlights

Group Retirement is focused on implementing initiatives to grow its business. However, external factors, including increased competition and the consolidation of healthcare providers and other employers in target markets, continue to impact Group Retirement's customer retention. Premiums and deposits increased \$585 million and \$548 million in the three- and six-month periods ended June 30, 2021, respectively, compared to the same periods in the prior year. Net flows remained negative but improved \$14 million in the three-month period ended June 30, 2021 compared to the same period in the prior year. Net flows remained negative and deteriorated \$292 million in the six-month period ended June 30, 2021 compared to the same period in the prior year.

Adjusted pre-tax income increased \$133 million in the three-month period ended June 30, 2021 compared to the same period in the prior year primarily from higher net investment income (\$64 million), higher net policy and advisory fee income (\$42 million) and lower general operating expenses (\$26 million).

Adjusted pre-tax income increased \$297 million in the six-month period ended June 30, 2021 compared to the same period in the prior year primarily from higher net investment income (\$147 million), higher net policy and advisory fee income (\$66 million), lower general operating expenses (\$52 million) and decreases in variable annuity DAC amortization and reserves (\$31 million).

Group Retirement Adjusted Pre-Tax Income (Loss)
Three Months Ended June 30,
(in millions)

Quarterly 2021 and 2020 Comparison

Adjusted pre-tax income increased \$133 million primarily due to:

- higher net investment income (\$64 million), primarily driven by higher private equity returns (\$86 million) partially offset by lower yield enhancement income (\$26 million);
- higher policy and advisory fee income, net of expenses (\$42 million), due to an increase in separate account, mutual fund, and advisory average assets; and
- lower general operating expenses (\$26 million) primarily due to decreased regulatory expenses.

Partially offsetting these increases were:

- lower base net investment spread (\$11 million) resulting from decreased reinvestment rates on the base portfolio and lower average invested assets partially offset by crediting rate reductions.

Group Retirement Adjusted Pre-Tax Income (Loss)
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

Adjusted pre-tax income increased \$297 million primarily due to:

- higher net investment income (\$147 million), primarily driven by higher private equity returns (\$126 million) and higher gains on calls (\$26 million);
- higher policy and advisory fee income, net of expenses, (\$66 million) due to an increase in separate account, mutual fund, and advisory average assets;
- lower general operating expenses (\$52 million) primarily due to decreased regulatory expenses and savings from COVID-19 travel restrictions; and
- decreases in variable annuity DAC amortization and reserves (\$31 million) due to stronger equity market performance.

Partially offsetting these increases were:

- lower base net investment spread (\$25 million) resulting from decreased reinvestment rates on the base portfolio, partially offset by higher average invested assets and crediting rate reductions.

GROUP RETIREMENT GAAP PREMIUMS, PREMIUMS AND DEPOSITS, SURRENDERS AND NET FLOWS

For Group Retirement, premiums primarily represent amounts received on life-contingent payout annuities. Premiums in the three- and six-month periods ended June 30, 2021, which primarily represents immediate annuities, increased \$1 million and decreased \$1 million, respectively, compared to the same periods in the prior year. Premiums are not a significant driver of Group Retirement results.

Premiums and deposits are a non-GAAP financial measure that includes, in addition to direct and assumed premiums, deposits received on investment-type annuity contracts, FHLB funding agreements and mutual funds under administration.

Net flows for annuity products included in Group Retirement represent premiums and deposits less death, surrender and other withdrawal benefits. Net flows for mutual funds represent deposits less withdrawals.

The following table presents a reconciliation of Group Retirement GAAP premiums to premiums and deposits:

(in millions)	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2021	2020	2021	2020
Premiums	\$ 4	\$ 3	\$ 8	\$ 9
Deposits	2,251	1,667	4,065	3,516
Premiums and deposits	\$ 2,255	\$ 1,670	\$ 4,073	\$ 3,525

The following table presents Group Retirement surrenders as a percentage of average reserves and mutual funds under administration:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2021	2020	2021	2020
Surrenders as a percentage of average reserves and mutual funds	7.9 %	7.3 %	8.4 %	8.2 %

The following table presents reserves for Group Retirement annuities by surrender charge category:

(in millions)	June 30, 2021 ^(a)	December 31, 2020 ^(a)
No surrender charge ^(b)	\$ 80,763	\$ 77,507
Greater than 0% - 2%	694	565
Greater than 2% - 4%	848	829
Greater than 4%	6,186	6,119
Non-surrenderable	765	616
Total reserves	\$ 89,256	\$ 85,636

(a) Excludes mutual fund assets under administration of \$27.7 billion and \$25.0 billion at June 30, 2021 and December 31, 2020, respectively.

(b) Group Retirement amounts in this category include general account reserves of approximately \$6.4 billion and \$6.3 billion at June 30, 2021 and December 31, 2020 respectively, which are subject to 20 percent annual withdrawal limitations at the participant level and general account reserves of \$6.2 billion at June 30, 2021 and \$5.8 billion at December 31, 2020, respectively, which are subject to 20 percent annual withdrawal limitations at the plan level.

Group Retirement annuity deposits are typically subject to a five- to seven-year surrender charge period, depending on the product. At June 30, 2021, Group Retirement annuity reserves with no surrender charge increased compared to December 31, 2020 primarily due to growth in assets under management.

A discussion of the significant variances in premiums and deposits and net flows follows:

Group Retirement Premiums and Deposits and Net Flows
Three Months Ended June 30,
(in millions)

Quarterly 2021 and 2020 Comparison

Net flows remained negative but improved (\$14 million) due to higher deposits (\$585 million) partially offset by higher surrenders and withdrawals (\$529 million) and death benefits (\$42 million).

Group Retirement Premiums and Deposits and Net Flows
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

Net flows remained negative and deteriorated (\$292 million) due to higher surrenders (\$753 million) and death benefits (\$87 million) partially offset by higher deposits (\$548 million). Large plan acquisitions and surrenders also contributed to the period over period volatility. In the six-month period ended June 30, 2021, large group activity contributed to net positive flows of \$0.6 billion compared to the same period in the prior year. External factors including consolidation of healthcare providers and other employers in target markets continue to impact Group Retirement customer retention.

Business and Financial Highlights

Life Insurance is focused on selling profitable new products through strategic channels to enhance future returns. Adjusted pre-tax income increased \$18 million in the three-month period ended June 30, 2021 compared to the same period in the prior year primarily due to higher net investment income (\$54 million) and favorable general operating expenses (\$8 million) partially offset by higher mortality net of lower COVID-19 claims (\$45 million). Adjusted pre-tax loss in the six-month period ended June 30, 2021 compared to adjusted pre-tax income in the same period in the prior year decreased \$100 million primarily due to higher mortality (\$201 million) predominantly driven by COVID-19, and higher general operating expense (\$8 million), partially offset by higher net investment income (\$106 million).

Life Insurance Adjusted Pre-Tax Income (Loss)

Three Months Ended June 30,

(in millions)

Quarterly 2021 and 2020 Comparison

Adjusted pre-tax income increased \$18 million primarily due to:

- higher net investment income (\$54 million), primarily driven by higher private equity returns (\$60 million) due to stronger equity market performance; and
- lower general operating expenses (\$8 million).

Partially offsetting these increases were:

- higher mortality net of lower COVID-19 claims (\$45 million).

Life Insurance Adjusted Pre-Tax Income (Loss)
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

Adjusted pre-tax loss compared to adjusted pre-tax income decreased \$100 million primarily due to:

- higher mortality (\$201 million) predominantly driven by COVID-19; and
- higher general operating expenses (\$8 million).

Partially offsetting these decreases were:

- higher net investment income (\$106 million), primarily driven by higher private equity returns (\$83 million) due to stronger equity market performance and higher gains on calls (\$39 million) partially offset by lower base portfolio income (\$24 million) driven by reduced fixed asset income.

LIFE INSURANCE GAAP PREMIUMS AND PREMIUMS AND DEPOSITS

Premiums for Life Insurance represent amounts received on traditional life insurance policies, primarily term life and international life and health. Premiums, excluding the effect of foreign exchange, increased \$21 million and \$75 million in the three- and six-month periods ended June 30, 2021, respectively, compared to the same periods in the prior year. Premiums and deposits for Life Insurance is a non-GAAP financial measure that includes direct and assumed premiums as well as deposits received on universal life insurance.

The following table presents a reconciliation of Life Insurance GAAP premiums to premiums and deposits:

<i>(in millions)</i>	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2021	2020	2021	2020
Premiums	\$ 532	\$ 491	\$ 1,064	\$ 954
Deposits	409	421	806	824
Other	220	207	422	403
Premiums and deposits	\$ 1,161	\$ 1,119	\$ 2,292	\$ 2,181

A discussion of the significant variances in premiums and deposits follows:

Life Insurance Premiums and Deposits
Three Months Ended June 30,
(in millions)

Quarterly 2021 and 2020 Comparison

Premiums and deposits, excluding the effect of foreign exchange, increased \$14 million primarily due to growth in international life premiums.

Life Insurance Premiums and Deposits
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

Premiums and deposits, excluding the effect of foreign exchange, increased \$64 million primarily due to growth in international life premiums.

Business and Financial Highlights

Institutional Markets is focused on opportunities to grow its portfolio while maintaining pricing discipline. Product distribution continues to be strong. Growth in assets under management in recent years has partially driven higher net investment income and adjusted pre-tax income. Adjusted pre-tax income increased \$10 million and \$77 million in the three- and six-month periods ended June 30, 2021, respectively, compared to the same periods in the prior year.

Institutional Markets Adjusted Pre-Tax Income (Loss)

Three Months Ended June 30,

(in millions)

Quarterly 2021 and 2020 Comparison

Adjusted pre-tax income increased \$10 million primarily due to:

- higher private equity returns (\$55 million) and higher base portfolio income (\$19 million) driven by growth in average invested assets partially offset by lower yield enhancement income (\$50 million).

Partially offsetting these increases was:

- higher policyholder benefit and losses incurred (\$15 million).

Institutional Markets Adjusted Pre-Tax Income (Loss)**Six Months Ended June 30,***(in millions)***Year-to-Date 2021 and 2020 Comparison**

Adjusted pre-tax income increased \$77 million primarily due to:

- higher private equity returns (\$79 million) and higher base portfolio income (\$28 million) driven by growth in average invested assets partially offset by lower yield enhancement income (\$29 million).

INSTITUTIONAL MARKETS GAAP PREMIUMS AND PREMIUMS AND DEPOSITS

Premiums for Institutional Markets primarily represent amounts received on pension risk transfer or structured settlement annuities with life contingencies. Premiums decreased \$13 million in the three-month period ended June 30, 2021 compared to the same period in the prior year primarily driven by structured settlement annuities with life contingencies business. Premiums decreased \$731 million in the six-month period ended June 30, 2021 compared to the same period in the prior year primarily driven by pension risk transfer business (direct and assumed reinsurance) written in 2020, as well as structured settlement annuities with life contingencies business and high net worth business.

Premiums and deposits for Institutional Markets is a non-GAAP financial measure that includes direct and assumed premiums as well as deposits received on investment-type annuity contracts. Deposits include GICs and FHLB funding agreements.

The following table presents a reconciliation of Institutional Markets GAAP premiums to premiums and deposits:

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
Premiums	\$ 1,077	\$ 1,090	\$ 1,116	\$ 1,847
Deposits	559	39	593	250
Other	5	6	12	14
Premiums and deposits	\$ 1,641	\$ 1,135	\$ 1,721	\$ 2,111

A discussion of the significant variances in premiums and deposits follows:

Institutional Markets Premiums and Deposits
Three Months Ended June 30,
(in millions)

Quarterly 2021 and 2020 Comparison

Premiums and deposits increased (\$506 million) primarily due to higher deposits on GICs (\$550 million) and higher premium on pension risk transfer business (\$14 million), partially offset by lower premium and deposits on structured settlement annuities (\$55 million).

Institutional Markets Premiums and Deposits
Six Months Ended June 30,
(in millions)

Year-to-Date 2021 and 2020 Comparison

Premiums and deposits decreased (\$390 million) due to lower premiums on pension risk transfer (\$669 million), lower premium and deposits on structured settlement annuities (\$111 million), and lower deposits on high net worth products (\$37 million), partially offset by higher deposits on GICs (\$426 million).

Other Operations

Other Operations primarily consists of income from assets held by AIG Parent and other corporate subsidiaries, deferred tax assets related to tax attributes, corporate expenses and intercompany eliminations, our institutional asset management business and results of our consolidated investment entities, General Insurance portfolios in run-off as well as the historical results of our legacy insurance lines ceded to Fortitude Re.

* Interest – Asset Management primarily represents interest expense on consolidated investment entities of \$61 million and \$41 million in the three-month periods ended June 30, 2021 and 2020, respectively, and \$102 million and \$87 million in the six-month periods ended June 30, 2021 and 2020, respectively.

QUARTERLY 2021 AND 2020 COMPARISON

Adjusted pre-tax loss before consolidation and eliminations of \$516 million in 2021 compared to \$332 million in 2020, an increase of \$184 million, was primarily due to the sale of a majority of the interest in Fortitude Holdings on June 2, 2020, as prior period results included adjusted pre-tax income of \$96 million. Excluding the results of Fortitude Re, adjusted pre-tax loss increased \$88 million primarily due to:

- higher general operating expenses primarily driven by increases in performance-based employee costs of \$73 million; and
- higher underwriting loss attributable to net prior year development in 2021 of \$65 million within Other Operations Run-off, primarily attributable to Blackboard insurance companies.

The increase in adjusted pre-tax loss was partially offset by:

- higher net investment income associated with consolidated investment entities of \$195 million, partially offset by decline in net mark to market gains on CDO securities of \$124 million and losses on fair value option assets of \$17 million.

Adjusted pre-tax loss on consolidation and eliminations of \$94 million in 2021 compared to adjusted pre-tax income on consolidation and eliminations of \$53 million in 2020, was primarily due to the elimination of the insurance companies' net investment income on their investment in the consolidated investment entities of \$167 million.

YEAR-TO-DATE 2021 AND 2020 COMPARISON

Adjusted pre-tax loss before consolidation and eliminations of \$870 million in 2021 compared to \$1.2 billion in 2020, a decrease of \$297 million, was primarily due to the sale of a majority of the interest in Fortitude Holdings on June 2, 2020, as prior period results included adjusted pre-tax loss of \$233 million. Excluding the results of Fortitude Re, adjusted pre-tax loss decreased \$64 million primarily due to:

- higher net investment income associated with consolidated investment entities of \$357 million was partially offset by decline in net mark to market gains on CDO securities of \$124 million.

The decrease in adjusted pre-tax loss was partially offset by:

- higher underwriting loss attributable to net prior year development in 2021 of \$84 million within Other Operations Run-off, primarily attributable to Blackboard insurance companies; and
- higher general operating expenses primarily driven by increases in performance-based employee costs of \$73 million.

Adjusted pre-tax loss on consolidation and eliminations of \$270 million in 2021 compared to \$34 million in 2020, an increase of \$236 million, was primarily due to the elimination of the insurance companies' net investment income on their investment in the consolidated investment entities of \$216 million.

Investments

OVERVIEW

Our investment strategies are tailored to the specific business needs of each operating unit by targeting an asset allocation mix that supports estimated cash flows of our outstanding liabilities and provides diversification from an asset class, sector, issuer, and geographic perspective. The primary objectives are generation of investment income, preservation of capital, liquidity management and growth of surplus. The majority of assets backing our insurance liabilities consist of fixed maturity securities.

The worldwide health and economic impact of COVID-19 continues to evolve, influenced by the scope, severity and duration of the crisis as well as the actions of governments, judiciaries, legislative bodies, regulators and other third parties in response, including the distribution and effectiveness of vaccinations, all of which are subject to continuing uncertainty. Weak initial economic conditions resulting from COVID-19 have been met with intervention taken by governments and monetary authorities aimed at stimulating growth, resulting in a sharp recovery on our overall investment portfolio to pre-COVID-19 conditions. In certain segments of our diversified investment portfolio, there have been exposures to sectors of the economy significantly affected by the crisis, which has, in certain periods, resulted in the recognition of credit losses and increases in our allowance for credit losses. Further recognition of credit losses and increases in our allowances for credit losses could result if new business closures are imposed or economic conditions worsen in response to a future resurgence of the virus.

INVESTMENT HIGHLIGHTS IN THE SIX MONTHS ENDED JUNE 30, 2021

- A rise in interest rates resulted in a net unrealized loss movement in our investment portfolio. Net unrealized gains in our available for sale portfolio decreased to approximately \$21.4 billion as of June 30, 2021 from approximately \$27.4 billion as of December 31, 2020.
- We continued to make investments in structured securities and other fixed maturity securities with favorable risk compared to return characteristics to improve yields and increase net investment income.
- We experienced an increase in net investment income in the six-month period ended June 30, 2021 compared to the same period in the prior year due primarily to the higher income on our alternative investments and fair value option equity security holdings that directionally followed the positive returns achieved in equity markets. The same period in the prior year experienced significant volatility and declines in equity markets due to the onset of the COVID-19 crisis.
- Blended investment yields on new investments were lower than blended rates on investments that were sold, matured or called.

Change in Unrealized Gains and Losses on Investments

The change in net unrealized gains and losses on investments in the three- and six-month periods ended June 30, 2021 was primarily attributable to movements in interest rates and spreads. There was a drop in rates and narrowing spreads in the three-month period ended June 30, 2021 that resulted in unrealized gains of approximately \$5.9 billion on fixed maturity securities. For the six-month period ended June 30, 2021, net unrealized losses related to fixed maturity securities were by \$5.8 billion due primarily to an increase in interest rates.

The change in net unrealized gains and losses on investments in the three- and six-month periods ended June 30, 2020 was primarily attributable to increases in the fair value of fixed maturity securities. For the six-month period ended June 30, 2020, there were net unrealized gains related to fixed maturity securities of \$3.5 billion due primarily to lower rates partially offset by a widening of credit spreads.

For further discussion of our investment portfolio see Note 5 to the Condensed Consolidated Financial Statements.

Net Realized Gains and Losses

Lower net realized losses excluding Fortitude Re Funds Withheld Assets in the three-month period ended June 30, 2021 compared to the same period in the prior year were primarily due to higher foreign exchange gains and allowance releases in the prior year compared to allowance increases in the current year. Lower net realized gains excluding Fortitude Re Funds Withheld Assets in the six-month period ended June 30, 2021 compared to the same period in the prior year were primarily due to lower derivatives gains, which more than offset foreign exchange gains and allowance releases compared to losses and increases, respectively, in the prior year.

Variable annuity embedded derivatives, net of related hedges, reflected lower losses in the three-month period ended June 30, 2021 and lower gains in the six-month period ended June 30, 2021 compared to the same periods in the prior year. Fair value gains or losses in the hedging portfolio are typically not fully offset by increases or decreases in liabilities due to the non-performance or “own credit” risk adjustment used in the valuation of the variable annuities with guaranteed minimum withdrawal benefits (GMWB) embedded derivative, which are not hedged as part of our economic hedging program, and other risk margins used for valuation that cause the embedded derivatives to be less sensitive to changes in market rates than the hedge portfolio.

Net realized gains (losses) on Fortitude Re funds withheld assets primarily reflect changes in the valuation of the modified coinsurance and funds withheld assets. Increases in the valuation of these assets result in losses to AIG as the appreciation on the assets must under those reinsurance arrangements be transferred to Fortitude Re. Decreases in valuation of the assets result in gains to AIG as the depreciation on the assets under those reinsurance arrangements must be transferred to Fortitude Re. *For further details on the impact of the funds withheld arrangements with Fortitude Re see Note 7 to the Condensed Consolidated Financial Statements.*

For further details on net realized gains and losses, see – Net Realized Gains and Losses below.

For additional discussion of market risk management related to these product features see Part II, Item 7. MD&A – Enterprise Risk Management – Insurance Risks – Life and Retirement Companies’ Key Risks – Variable Annuity, Index Annuity and Universal Life Risk Management and Hedging Programs in the 2020 Annual Report. For more information on the economic hedging target and the impact to pre-tax income of this program see Insurance Reserves – Life and Annuity Future Policy Benefits, Policyholder Contract Deposits and DAC – Variable Annuity Guaranteed Benefits and Hedging Results in this MD&A.

For further discussion of our investment portfolio see Note 5 to the Condensed Consolidated Financial Statements.

INVESTMENT STRATEGIES

Investment strategies are assessed at the segment level and involve considerations that include local and general market conditions, duration and cash flow management, risk appetite and volatility constraints, rating agency and regulatory capital considerations, and tax and legal investment limitations.

Some of our key investment strategies are as follows:

- Our fundamental strategy across the portfolios is to seek investments with similar characteristics to the associated insurance liabilities to the extent practicable. AIG embeds Environmental, Social and Governance (ESG) considerations in its fundamental investment analysis of the companies or projects we invest in to ensure that they have sustainable earnings over the full term of our investment. AIG considers internal and external factors and evaluates changes in consumer behavior, industry trends related to ESG factors as well as the ability of the management of companies to respond appropriately to these changes in order to maintain their competitive advantage.
- We seek to originate investments that offer enhanced yield through illiquidity premiums, such as private placements and commercial mortgage loans, which also add portfolio diversification. These assets typically afford credit protections through covenants, ability to customize structures that meet our insurance liability needs, and deeper due diligence given information access.
- Given our global presence, we have access to assets that provide diversification from local markets. To the extent we purchase these investments, we generally hedge any currency risk using derivatives, which could provide opportunities to earn higher risk adjusted returns compared to assets in the functional currency.
- AIG Parent, included in Other Operations, actively manages its assets and liabilities, counterparties and duration. AIG Parent’s liquidity sources are held primarily in the form of cash, short-term investments and publicly traded, investment grade rated fixed maturity securities that can be readily monetized through sales or repurchase agreements. This strategy allows us to both diversify our sources of liquidity and reduce the cost of maintaining sufficient liquidity.

- Within the U.S., the Life and Retirement and General Insurance investments are generally split between reserve backing and surplus portfolios.
 - Insurance reserves are backed by mainly investment grade fixed maturity securities that meet our duration, risk-return, tax, liquidity, credit quality and diversification objectives. We assess asset classes based on their fundamental underlying risk factors, including credit (public and private), commercial real estate and residential real estate regardless of whether such investments are bonds, loans, or structured products.
 - Surplus investments seek to enhance portfolio returns and are generally comprised of a mix of fixed maturity investment grade and below investment grade securities and various alternative asset classes, including private equity, real estate equity, and hedge funds. Over the past few years, hedge fund investments have been reduced with more emphasis given to private equity, real estate and below investment grade credit.
- Outside of the U.S., fixed maturity securities held by insurance companies consist primarily of investment-grade securities generally denominated in the currencies of the countries in which we operate.

Asset Liability Management

The investment strategy within the General Insurance companies focuses on growth of surplus, maintenance of sufficient liquidity for unanticipated insurance claims, and preservation of capital. General Insurance invests primarily in fixed maturity securities issued by corporations, municipalities and other governmental agencies; structured securities collateralized by, among other assets, residential and commercial real estate; and commercial mortgage loans. Fixed maturity securities of the General Insurance companies' North America operations have an average duration of 3.9 years. Fixed maturity securities of the General Insurance companies' International operations have an average duration of 4.3 years.

While invested assets backing reserves of the General Insurance companies are primarily invested in conventional liquid fixed maturity securities, we have continued to allocate to asset classes that offer higher yields through structural and illiquidity premiums, particularly in our North America operations. In addition, we continue to invest in both fixed rate and floating rate asset-backed investments to manage our exposure to potential changes in interest rates and inflation. We seek to diversify the portfolio across asset classes, sectors and issuers to mitigate idiosyncratic portfolio risks.

In addition, a portion of the surplus of General Insurance is invested in a diversified portfolio of alternative investments that seek to balance liquidity, volatility and growth of surplus. There is a higher allocation to equity-oriented investments in General Insurance surplus relative to other AIG portfolios given the underlying inflation risks inherent in that business. Although these alternative investments are subject to periodic earnings fluctuations, they have historically achieved yields in excess of the fixed maturity portfolio yields and have provided added diversification to the broader portfolio.

The investment strategy of the Life and Retirement companies is to provide net investment income to back liabilities that result in stable distributable earnings and enhance portfolio value, subject to asset liability management, capital, liquidity and regulatory constraints.

The Life and Retirement companies use asset-liability management as a primary tool to monitor and manage risk in their businesses. The Life and Retirement companies maintain a diversified, high-to-medium quality portfolio of fixed maturity securities issued by corporations, municipalities and other governmental agencies; structured securities collateralized by, among other assets, residential and commercial real estate; and commercial mortgage loans that, to the extent practicable, match the duration characteristics of the liabilities. We seek to diversify the portfolio across asset classes, sectors, and issuers to mitigate idiosyncratic portfolio risks. The investment portfolio of each product line is tailored to the specific characteristics of its insurance liabilities, and as a result, duration varies between distinct portfolios. The interest rate environment has a direct impact on the asset-liability management profile of the businesses, and an extended low interest rate environment may result in a lengthening of liability durations from initial estimates, primarily due to lower lapses, which may require us to further extend the duration of the investment portfolio. A further lengthening of the portfolio will be assessed in the context of available market opportunities as longer duration markets may not provide similar diversification benefits as shorter duration markets.

Fixed maturity securities of the Life and Retirement companies' domestic operations have an average duration of 9 years.

In addition, the Life and Retirement companies seek to enhance surplus portfolio returns through investments in a diversified portfolio of alternative investments. Although these alternative investments are subject to periodic earnings fluctuations, they have historically achieved returns in excess of the fixed maturity portfolio returns.

NAIC Designations of Fixed Maturity Securities

The Securities Valuation Office (SVO) of the NAIC evaluates the investments of U.S. insurers for statutory reporting purposes and assigns fixed maturity securities to one of six categories called 'NAIC Designations.' In general, NAIC Designations of '1' highest quality, or '2' high quality, include fixed maturity securities considered investment grade, while NAIC Designations of '3' through '6' generally include fixed maturity securities referred to as below investment grade. NAIC Designations for non-agency RMBS and CMBS are calculated using third party modeling results provided through the NAIC. These methodologies result in an improved NAIC Designation for such securities compared to the rating typically assigned by the three major rating agencies. The following tables summarize the ratings distribution of AIG subsidiaries' fixed maturity security portfolio by NAIC Designation, and the distribution by composite AIG credit rating, which is generally based on ratings of the three major rating agencies.

For a full description of the composite AIG credit ratings see – Credit Ratings.

The following table presents the fixed maturity security portfolio categorized by NAIC Designation, at fair value:

June 30, 2021

(in millions)

NAIC Designation	1	2	Total Investment Grade	3	4	5	6	Total Below Investment Grade	Total
Other fixed maturity securities	\$ 103,618	\$ 90,354	\$ 193,972	\$ 9,409	\$ 8,217	\$ 1,300	\$ 132	\$ 19,058	\$ 213,030

* Excludes \$14 million of fixed maturity securities for which no NAIC Designation is available.

CREDIT RATINGS

At June 30, 2021, approximately 88 percent of our fixed maturity securities were held by our domestic entities. Approximately 89 percent of these securities were rated investment grade by one or more of the principal rating agencies. Our investment decision process relies primarily on internally generated fundamental analysis and internal risk ratings. Third-party rating services' ratings and opinions provide one source of independent perspective for consideration in the internal analysis.

Moody's Investors Service Inc. (Moody's), Standard & Poor's Financial Services LLC, a subsidiary of S&P Global Inc. (S&P), or similar foreign rating services rate a significant portion of our foreign entities' fixed maturity securities portfolio. Rating services are not available for some foreign-issued securities. Our Credit Risk Management department closely reviews the credit quality of the foreign portfolio's non-rated fixed maturity securities. At June 30, 2021, approximately 94 percent of such investments were either rated investment grade or, on the basis of our internal analysis, were equivalent from a credit standpoint to securities rated investment grade. Approximately 26 percent of the foreign entities' fixed maturity securities portfolio is comprised of sovereign fixed maturity securities supporting policy liabilities in the country of issuance.

Composite AIG Credit Ratings

With respect to our fixed maturity securities, the credit ratings in the table below and in subsequent tables reflect: (i) a composite of the ratings of the three major rating agencies, or when agency ratings are not available, the rating assigned by the NAIC SVO (99 percent of total fixed maturity securities), or (ii) our equivalent internal ratings when these investments have not been rated by any of the major rating agencies or the NAIC. The "Non-rated" category in those tables consists of fixed maturity securities that have not been rated by any of the major rating agencies, the NAIC or us.

For a discussion of credit risks associated with Investments see Part II, Item 7. MD&A – Enterprise Risk Management – Credit Risk Management in the 2020 Annual Report.

The following table presents the composite AIG credit ratings of our fixed maturity securities calculated on the basis of their fair value:

(in millions)	Available for Sale		Other		Total	
	June 30, 2021	December 31, 2020	June 30, 2021	December 31, 2020	June 30, 2021	December 31, 2020

All other states ^(a)	330	197	2,156	2,683	2,892
Total^{(b)(c)}	\$ 2,012	\$ 1,540	\$ 11,627	\$ 15,179	\$ 16,124

(a) We did not have material credit exposure to the government of Puerto Rico.

(b) Excludes certain university and not-for-profit entities that issue their bonds in the corporate debt market. Includes industrial revenue bonds.

(c) Includes \$545 million of pre-refunded municipal bonds.

Investments in Corporate Debt Securities

The following table presents the industry categories of our available for sale corporate debt securities:

Industry Category	Fair Value at June 30, 2021	Fair Value at December 31, 2020
(in millions)		
Financial institutions:		
Money center/Global bank groups	\$ 10,256	\$ 10,512
Regional banks – other	470	627
Life insurance	3,068	3,175
Securities firms and other finance companies	355	312
Insurance non-life	6,460	5,805
Regional banks – North America	7,481	7,505
Other financial institutions	16,728	15,581
Utilities	24,306	23,470
Communications	11,745	11,137
Consumer noncyclical	24,839	24,826
Capital goods	9,346	8,773
Energy	13,613	13,293
Consumer cyclical	13,625	13,213
Basic	6,232	5,894
Other	27,029	25,175
Total*	\$ 175,553	\$ 169,298

* At June 30, 2021 and December 31, 2020, approximately 90 percent of these investments were rated investment grade.

Our investments in the energy category, as a percentage of total investments in available-for-sale fixed maturities, was 5.0 percent and 4.9 percent, at June 30, 2021 and December 31, 2020, respectively. While the energy investments are primarily investment grade and are actively managed, the category continues to experience volatility that could adversely affect credit quality and fair value.

Investments in RMBS

The following table presents AIG's RMBS available for sale securities:

	Fair Value at June 30, 2021	Fair Value at December 31, 2020
<i>(in millions)</i>		
Agency RMBS	\$ 13,934	\$ 15,816
Alt-A RMBS	6,649	7,278
Subprime RMBS	2,396	2,575
Prime non-agency	3,583	3,847
Other housing related	2,022	1,949
Total RMBS^{(a)(b)}	\$ 28,584	\$ 31,465

(a) Includes approximately \$6.9 billion and \$7.6 billion at June 30, 2021 and December 31, 2020, respectively, of certain RMBS that had experienced deterioration in credit quality since their origination. For additional discussion on Purchased Credit Impaired Securities see Note 5 to the Condensed Consolidated Financial Statements.

(b) The weighted average expected life was five years at June 30, 2021 and December 31, 2020.

Our underwriting practices for investing in RMBS, other asset-backed securities (ABS) and CDOs take into consideration the quality of the originator, the manager, the servicer, security credit ratings, underlying characteristics of the mortgages, borrower characteristics, and the level of credit enhancement in the transaction.

Investments in CMBS

The following table presents our CMBS available for sale securities:

	Fair Value at June 30, 2021	Fair Value at December 31, 2020
<i>(in millions)</i>		
CMBS (traditional)	\$ 12,540	\$ 12,917
Agency	1,823	2,078
Other	1,101	1,138
Total	\$ 15,464	\$ 16,133

The fair value of CMBS holdings remained stable during the second quarter of 2021. The majority of our investments in CMBS are in tranches that contain substantial protection features through collateral subordination. The majority of CMBS holdings are traditional conduit transactions, broadly diversified across property types and geographical areas.

Investments in ABS/CDOs

The following table presents our ABS/CDO available for sale securities by collateral type:

	Fair value at June 30, 2021	Fair value at December 31, 2020
<i>(in millions)</i>		
Collateral Type:		
ABS	\$ 9,005	\$ 9,178
Bank loans (collateralized loan obligation)	8,743	9,793
Other	20	34
Total	\$ 17,768	\$ 19,005

Unrealized Losses of Fixed Maturity Securities

The following table shows the aging of the unrealized losses of fixed maturity securities, the extent to which the fair value is less than amortized cost or cost, and the number of respective items in each category:

June 30, 2021	Less Than or Equal to 20% of Cost ^(b)			Greater Than 20% to 50% of Cost ^(b)			Greater Than 50% of Cost ^(b)			Total		
Aging ^(a) (dollars in millions)	Unrealized			Unrealized			Unrealized			Unrealized		
	Cost ^(c)	Loss	Items ^(e)	Cost ^(c)	Loss	Items ^(e)	Cost ^(c)	Loss	Items ^(e)	Cost ^(c)	Loss ^(d)	Items ^(e)

Total	\$ 7,125	\$ 188	2,664	\$ 429	\$ 106	59	\$ 38	\$ 32	26	\$ 7,592	\$ 326	2,749
Total bonds												
0-6 months	\$ 32,114	\$ 646	7,071	\$ 24	\$ 9	15	\$ 18	\$ 16	15	\$ 32,156	\$ 671	7,101
7-11 months	5,668	271	858	103	26	16	1	1	2	5,772	298	876
12 months or more	7,668	334	1,399	394	94	40	23	18	18	8,085	446	1,457
Total^(e)	\$ 45,450	\$ 1,251	9,328	\$ 521	\$ 129	71	\$ 42	\$ 35	35	\$ 46,013	\$ 1,415	9,434

(a) Represents the number of consecutive months that fair value has been less than cost by any amount.

(b) Represents the percentage by which fair value is less than cost at June 30, 2021.

(c) For bonds, represents amortized cost net of allowance.

(d) The effect on Net income of unrealized losses after taxes will be mitigated upon realization because certain realized losses will result in current decreases in the amortization of certain DAC.

(e) Item count is by CUSIP by subsidiary.

The allowance for credit losses was \$4 million for investment grade bonds and \$94 million for below investment grade bonds as of June 30, 2021.

Change in Unrealized Gains and Losses on Investments

The change in net unrealized gains and losses on investments in the three- and six-month periods ended June 30, 2021 was primarily attributable to increases (decreases) in the fair value of fixed maturity securities. For the three-month period ended June 30, 2021, net unrealized gains related to fixed maturity securities increased by \$5.9 billion due primarily to a drop in rates and narrowing of credit spreads. For the six-month period ending June 30, 2021, net unrealized gains related to fixed maturities decreased by \$5.8 billion due primarily to an increase in interest rates.

The change in net unrealized gains and losses on investments in the three- and six-month periods ended June 30, 2020 was primarily attributable to increases in the fair value of fixed maturity securities. For the six-month period ended June 30, 2020, net unrealized gains related to fixed maturity securities increased by \$3.5 billion due primarily to lower rates partially offset by a widening of credit spreads.

For further discussion of our investment portfolio see Note 5 to the Condensed Consolidated Financial Statements.

Commercial Mortgage Loans

At June 30, 2021, we had direct commercial mortgage loan exposure of \$36.4 billion.

The following table presents the commercial mortgage loan exposure by location and class of loan based on amortized cost:

	Number of	Class						Percent of	
(dollars in millions)	Loans	Apartments	Offices	Retail	Industrial	Hotel	Others	Total	Total
June 30, 2021

Other	208	1	209	9	-	9
Net realized gains – excluding Fortitude Re funds withheld embedded derivative	652	346	998	1,928	96	2,024
Net realized gains (losses) on Fortitude Re funds withheld embedded derivative	-	326	326	-	(837)	(837)
Net realized gains (losses)	\$ 652	\$ 672	\$ 1,324	\$ 1,928	\$ (741)	\$ 1,187

Lower net realized losses excluding Fortitude Re Funds Withheld Assets in the three-month period ended June 30, 2021 compared to the same period in the prior year were primarily due to higher foreign exchange gains and allowance releases in the prior year compared to allowance increases in the current year. Lower net realized gains excluding Fortitude Re Funds Withheld Assets in the six-month period ended June 30, 2021 compared to the same period in the prior year were primarily due to lower derivatives gains, which more than offset foreign exchange gains and allowance releases compared to losses and increases, respectively, in the prior year.

Variable annuity embedded derivatives, net of related hedges, reflected lower losses in the three-month period ended June 30, 2021 and lower gains in the six-month period ended June 30, 2021 compared to the same periods in the prior year. Fair value gains or losses in the hedging portfolio are typically not fully offset by increases or decreases in liabilities due to the non-performance or “own credit” risk adjustment used in the valuation of the variable annuities with GMWB embedded derivative, which are not hedged as part of our economic hedging program, and other risk margins used for valuation that cause the embedded derivatives to be less sensitive to changes in market rates than the hedge portfolio.

Net realized gains (losses) on Fortitude Re funds withheld assets primarily reflect changes in the valuation of the modified coinsurance and funds withheld assets. Increases in the valuation of these assets result in losses to AIG as the appreciation on the assets must under those reinsurance arrangements be transferred to Fortitude Re. Decreases in valuation of the assets result in gains to AIG as the depreciation on the assets under those reinsurance arrangements must be transferred to Fortitude Re. *For further details on the impact of the funds withheld arrangements with Fortitude Re see Note 7 to the Condensed Consolidated Financial Statements.*

For additional discussion of market risk management related to these product features see Part II, Item 7. MD&A – Enterprise Risk Management – Insurance Risks – Life and Retirement Companies’ Key Risks – Variable Annuity, Index Annuity and Universal Life Risk Management and Hedging Programs in the 2020 Annual Report. For more information on the economic hedging target and the impact to pre-tax income of this program see Insurance Reserves – Life and Annuity Future Policy Benefits, Policyholder Contract Deposits and DAC – Variable Annuity Guaranteed Benefits and Hedging Results in this MD&A.

For further discussion of our investment portfolio see Note 5 to the Condensed Consolidated Financial Statements.

Insurance Reserves

LIABILITY FOR UNPAID LOSSES AND LOSS ADJUSTMENT EXPENSES (LOSS RESERVES)

The following table presents the components of our gross and net loss reserves by segment and major lines of business^(a):

	June 30, 2021			December 31, 2020		
	Net liability for unpaid losses and loss adjustment expenses	Reinsurance recoverable on unpaid losses and loss adjustment expenses	Gross liability for unpaid losses and loss adjustment expenses	Net liability for unpaid losses and loss adjustment expenses	Reinsurance recoverable on unpaid losses and loss adjustment expenses	Gross liability for unpaid losses and loss adjustment expenses

(a) Includes net loss reserve discount of \$791 million and \$725 million as of June 30, 2021 and December 31, 2020, respectively. *For discussion of loss reserve discount see Note 10 to the Condensed Consolidated Financial Statements.*

(b) Other product lines and Unallocated loss adjustment expenses includes \$3.7 billion and \$3.8 billion within Gross liability for unpaid losses and loss adjustment expense and Reinsurance recoverable on unpaid losses and loss adjustment expense as of June 30, 2021 and December 31, 2020, respectively, for the Fortitude Re reinsurance.

Prior Year Development

The following table summarizes incurred (favorable) unfavorable prior year development net of reinsurance by segment:

(in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
General Insurance:				
North America*	\$ (58)	\$ (33)	\$ (116)	\$ (58)
International	7	(41)	9	(76)
Total General Insurance	\$ (51)	\$ (74)	\$ (107)	\$ (134)
Other Operations Run-Off	65	(2)	84	(2)
Total prior year (favorable) unfavorable development	\$ 14	\$ (76)	\$ (23)	\$ (136)

* Includes the amortization attributed to the deferred gain at inception from the National Indemnity Company (NICO) adverse development reinsurance agreement of \$49 million and \$53 million for the three-month periods ended June 30, 2021 and 2020, respectively, and \$101 million and \$106 million for the six-month periods ended June 30, 2021 and 2020, respectively. Consistent with our definition of APTI, the amount excludes the portion of (favorable)/unfavorable prior year reserve development for which we have ceded the risk under the NICO reinsurance agreements of \$(92) million and \$(2) million for the three-month periods ended June 30, 2021 and 2020, respectively, and \$(91) million and \$4 million for the six-month periods ended June 30, 2021 and 2020, respectively. Also excludes the related changes in amortization of the deferred gain, which were \$(27) million and \$23 million for the three-month periods ended June 30, 2021 and 2020, respectively, and \$(7) million and \$45 million for the six-month periods ended June 30, 2021 and 2020, respectively.

Net Loss Development

In the three-month period ended June 30, 2021, we recognized adverse prior year loss reserve development of \$14 million. The key components of this development were:

North America

- Amortization of the deferred gain on the adverse development cover and favorable development on Workers Compensation partially offset by adverse development on U.S. Property, Special Risks and Financial Lines.

International

- Adverse development on Property and Other short-tail lines.

Other Operations

- Adverse development on the Blackboard insurance companies and other runoff companies due to increased severity on reported claims.

In the six-month period ended June 30, 2021, we recognized favorable prior year loss reserve development of \$(23) million. The key components of this development were:

North America

- Amortization of the deferred gain from the adverse development cover and favorable development on Workers Compensation partially offset by adverse development on Commercial Property and Financial Lines.

International

- Adverse development in Property and Other short-tailed lines.

Other Operations

- Adverse development on the Blackboard insurance companies and other runoff companies due to increased severity on reported claims.

In the three-month period ended June 30, 2020, we recognized favorable prior year loss reserve development of \$(76) million. The key components of this development were:

North America

- amortization of the deferred gain from the adverse development reinsurance agreement with NICO; and
- favorable development on North American Property;
- partially offset by adverse development in the Programs business driven by discontinued programs.

International

- favorable development in International Property and Special Risks businesses, largely driven by UK/Europe.

In the six-month period ended June 30, 2020, we recognized favorable prior year loss reserve development of \$(136) million. The key components of this development were:

North America

- amortization of the deferred gain from the adverse development reinsurance agreement with NICO; and
- favorable development on North American Property;
- partially offset by adverse development in the Programs business driven by discontinued programs, and in Personal Insurance.

International

- favorable development in International Casualty recoveries; and
- favorable development in International Property and Special Risks businesses, largely driven by UK/Europe.

The following tables summarize incurred (favorable) unfavorable prior year development net of reinsurance, by segment and major lines of business, and by accident year groupings:

We note that for certain categories of claims (e.g., construction defect claims and environmental claims) and for reinsurance recoverable, losses may sometimes be reclassified to an earlier or later accident year as more information about the date of occurrence becomes available to us.

Significant Reinsurance Agreements

In the first quarter of 2017, we entered into an adverse development reinsurance agreement with NICO, under which we transferred to NICO 80 percent of the reserve risk on substantially all of our U.S. Commercial long-tail exposures for accident years 2015 and prior. Under this agreement, we ceded to NICO 80 percent of the losses on subject business paid on or after January 1, 2016 in excess of \$25 billion of net paid losses, up to an aggregate limit of \$25 billion. We account for this transaction as retroactive reinsurance. This transaction resulted in a gain, which under GAAP retroactive reinsurance accounting is deferred and amortized into income over the settlement period. NICO created a collateral trust account as security for their claim payment obligations to us, into which they deposited the consideration paid under the agreement, and Berkshire Hathaway Inc. has provided a parental guarantee to secure NICO's obligations under the agreement.

For a description of AIG's catastrophe reinsurance protection for 2021, see Part II, Item 7. MD&A – Enterprise Risk Management – Insurance Risks – General Insurance Companies' Key Risks – Natural Catastrophe Risk in the 2020 Annual Report.

The table below shows the calculation of the deferred gain on the adverse development reinsurance agreement as of June 30, 2021 and as of December 31, 2020, showing the effect of discounting of loss reserves and amortization of the deferred gain.

<i>(in millions)</i>	June 30, 2021	December 31, 2020
Gross Covered Losses		
Covered reserves before discount	\$ 15,589	\$ 16,534
Inception to date losses paid	26,030	25,198
Attachment point	(25,000)	(25,000)
Covered losses above attachment point	\$ 16,619	\$ 16,732
Deferred Gain Development		
Covered losses above attachment ceded to NICO (80%)	\$ 13,295	\$ 13,386
Consideration paid including interest	(10,188)	(10,188)
Pre-tax deferred gain before discount and amortization	3,107	3,198
Discount on ceded losses ^(a)	(855)	(911)
Pre-tax deferred gain before amortization	2,252	2,287
Inception to date amortization of deferred gain at inception	(1,005)	(904)
Inception to date amortization attributed to changes in deferred gain ^(b)	(61)	(86)
Deferred gain liability reflected in AIG's balance sheet	\$ 1,186	\$ 1,297

(a) For the period from inception to June 30, 2021, the accretion of discount and a reduction in effective interest rates was offset by changes in estimates of the amount and timing of future recoveries under the adverse development reinsurance agreement.

(b) Excluded from our definition of APTI.

The following table presents the rollforward of activity in the deferred gain from the adverse development reinsurance agreement:

<i>(in millions)</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
Balance at beginning of year, net of discount	\$ 1,282	\$ 1,392	\$ 1,297	\$ 1,381
(Favorable) unfavorable prior year reserve development ceded to NICO ^(a)	(92)	(2)	(91)	4
Amortization attributed to deferred gain at inception ^(b)	(49)	(53)	(101)	(106)
Amortization attributed to changes in deferred gain ^(c)	28	(12)	25	(26)
Changes in discount on ceded loss reserves	17	(14)	56	58
Balance at end of period, net of discount	\$ 1,186	\$ 1,311	\$ 1,186	\$ 1,311

(a) Prior year reserve development ceded to NICO under the retroactive reinsurance agreement is deferred under GAAP.

(b) Represents amortization of the deferred gain recognized in APTI.

(c) Excluded from APTI and included in GAAP.

The lines of business subject to this agreement have been the source of the majority of the prior year adverse development charges over the past several years. The agreement has resulted in lower capital charges for reserve risks at our U.S. insurance subsidiaries. In addition, net investment income declined as a result of lower invested assets.

Fortitude Re was established during the first quarter of 2018 in a series of reinsurance transactions related to our Run-Off operations. Those reinsurance transactions were designed to consolidate most of our Insurance Run-Off Lines into a single legal entity. As of June 30, 2021, approximately \$30.1 billion of reserves from our Life and Retirement Run-Off Lines and approximately \$4.0 billion of reserves from our General Insurance Run-Off Lines related to business written by multiple wholly-owned AIG subsidiaries, had been ceded to Fortitude Re under these reinsurance transactions.

Of the Fortitude Re reinsurance agreements, the largest is the Amended and Restated Combination Coinsurance and Modified Coinsurance Agreement by and between our subsidiary AGL and Fortitude Re. Under this treaty, approximately \$23.0 billion of AGL reserves as of June 30, 2021 were ceded to Fortitude Re representing a mix of life and annuity risks. Fortitude Re provides 100 percent reinsurance of the ceded risks. AGL continues to administer the policies, including handling claims, although it is anticipated that much of the administration will move to a Fortitude Re administrative subsidiary over time, subject to regulatory approvals being obtained and the satisfaction of other conditions. Until such time, Fortitude Re has certain rights to consult on and participate in such administration, and AGL retains the risk of collection of any third party reinsurance covering the ceded business. At effectiveness of the treaty, an amount equal to the aggregate ceded reserves was deposited by AGL into a modified coinsurance account of AGL to

secure the obligations of Fortitude Re. Fortitude Re receives or makes quarterly payments that represent the net gain or loss under the treaty for the relevant quarter, including any net investment gain or loss on the assets in the modified coinsurance account. An AIG affiliate will serve as portfolio manager of assets in the modified coinsurance account for a minimum of three years after the June 2, 2020 closing of the Majority Interest Fortitude Sale.

For a summary of significant reinsurers see Part II, Item 7. MD&A – Enterprise Risk Management – Insurance Risks – Reinsurance Activities – Reinsurance Recoverable in the 2020 Annual Report.

LIFE AND ANNUITY FUTURE POLICY BENEFITS, POLICYHOLDER CONTRACT DEPOSITS AND DAC

The following section provides discussion of life and annuity future policy benefits, policyholder contract deposits and deferred policy acquisition costs.

Variable Annuity Guaranteed Benefits and Hedging Results

Our Individual Retirement and Group Retirement businesses offer variable annuity products with GMWB riders that provide guaranteed living benefit features. The liabilities for GMWB are accounted for as embedded derivatives measured at fair value. The fair value of the embedded derivatives may fluctuate significantly based on market interest rates, equity prices, credit spreads, market volatility, policyholder behavior and other factors.

In addition to risk-mitigating features in our variable annuity product design, we have an economic hedging program designed to manage market risk from GMWB, including exposures to changes in interest rates, equity prices, credit spreads and volatility. The hedging program utilizes derivative instruments, including but not limited to equity options, futures contracts and interest rate swap and swaption contracts, as well as fixed maturity securities with a fair value election.

For additional discussion of market risk management related to these product features see Part II, Item 7. MD&A – Enterprise Risk Management – Insurance Risks – Life and Retirement Companies' Key Risks – Variable Annuity, Index Annuity and Universal Life Risk Management and Hedging Programs in the 2020 Annual Report.

Differences in Valuation of Embedded Derivatives and Economic Hedge Target

The variable annuity hedging program utilizes an economic hedge target, which represents an estimate of the underlying economic risks in our GMWB riders. The economic hedge target differs from the GAAP valuation of the GMWB embedded derivatives primarily due to the following:

- The economic hedge target includes 100 percent of rider fees in present value calculations; the GAAP valuation reflects only those fees attributed to the embedded derivative such that the initial value at contract issue equals zero;
- The economic hedge target uses best estimate actuarial assumptions and excludes explicit risk margins used for GAAP valuation, such as margins for policyholder behavior, mortality, and volatility; and
- The economic hedge target excludes the non-performance or "own credit" risk adjustment used in the GAAP valuation, which reflects a market participant's view of our claims-paying ability by incorporating a different spread (the NPA spread) to the curve used to discount projected benefit cash flows. Because the discount rate includes the NPA spread and other explicit risk margins, the GAAP valuation is generally less sensitive to movements in interest rates and other market factors, and to changes from actuarial assumption updates, than the economic hedge target. *For more information on our valuation methodology for embedded derivatives within policyholder contract deposits see Note 4 to the Condensed Consolidated Financial Statements.*

The market value of the hedge portfolio compared to the economic hedge target at any point in time may be different and is not expected to be fully offsetting. In addition to the derivatives held in conjunction with the variable annuity hedging program, the Life and Retirement companies have cash and invested assets available to cover future claims payable under these guarantees. The primary sources of difference between the change in the fair value of the hedging portfolio and the economic hedge target include:

- Basis risk due to the variance between expected and actual fund returns, which may be either positive or negative;
- Realized volatility versus implied volatility;
- Actual versus expected changes in the hedge target driven by assumptions not subject to hedging, particularly policyholder behavior; and
- Risk exposures that we have elected not to explicitly or fully hedge.

The following table presents a reconciliation between the fair value of the GAAP embedded derivatives and the value of our economic hedge target:

	June 30, 2021	December 31, 2020
<i>(in millions)</i>		
Reconciliation of embedded derivatives and economic hedge target:		
Embedded derivative liability	\$ 2,484	\$ 3,572
Exclude non-performance risk adjustment	(2,501)	(2,958)
Embedded derivative liability, excluding NPA	4,985	6,530
Adjustments for risk margins and differences in valuation	(2,107)	(2,502)
Economic hedge target liability	\$ 2,878	\$ 4,028

Impact on Pre-tax Income (Loss)

The impact on our pre-tax income (loss) of the variable annuity guaranteed living benefits and related hedging results includes changes in the fair value of the GMWB embedded derivatives, and changes in the fair value of related derivative hedging instruments, both of which are recorded in Net realized gains (losses). Realized gains (losses), as well as net investment income from changes in the fair value of fixed maturity securities used in the hedging program, are excluded from adjusted pre-tax income of Individual Retirement and Group Retirement.

The change in the fair value of the embedded derivatives and the change in the value of the hedging portfolio are not expected to be fully offsetting, primarily due to the differences in valuation between the economic hedge target, the GAAP embedded derivatives and the fair value of the hedging portfolio, as discussed above. When corporate credit spreads widen, the change in the NPA spread generally reduces the fair value of the embedded derivative liabilities, resulting in a gain, and when corporate credit spreads narrow or tighten, the change in the NPA spread generally increases the fair value of the embedded derivative liabilities, resulting in a loss. In addition to changes driven by credit market-related movements in the NPA spread, the NPA balance also reflects changes in business activity and in the net amount at risk from the underlying guaranteed living benefits.

The following table presents the net increase (decrease) to consolidated pre-tax income (loss) from changes in the fair value of the GMWB embedded derivatives and related hedges, excluding related DAC amortization:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020
<i>(in millions)</i>				
Change in fair value of embedded derivatives, excluding NPA	\$ (762)	\$ 1,298	\$ 1,917	\$ (4,303)
Change in fair value of variable annuity hedging portfolio:				
Fixed maturity securities*	13	11	31	18
Interest rate derivative contracts	760	35	(644)	2,229
Equity derivative contracts	(390)	(891)	(780)	493
Change in fair value of variable annuity hedging portfolio	383	(845)	(1,393)	2,740
Change in fair value of embedded derivatives excluding NPA, net of hedging portfolio	(379)	453	524	(1,563)
Change in fair value of embedded derivatives due to NPA spread	18	(1,094)	(93)	1,552
Change in fair value of embedded derivatives due to change in NPA volume	321	(358)	(364)	1,211
Total change due to NPA	339	(1,452)	(457)	2,763
Net impact on pre-tax income (loss)	\$ (40)	\$ (999)	\$ 67	\$ 1,200
Impact to Consolidated Income Statement				
Net investment income, net of related interest credited to policyholder account balances	\$ 13	\$ 11	\$ 31	\$ 18
Net realized gains (losses)	(53)	(1,010)	36	1,182
Net impact on pre-tax income (loss)	\$ (40)	\$ (999)	\$ 67	\$ 1,200
Net change in value of economic hedge target and related hedges				
Net impact on economic gains (losses)	\$ 267	\$ (801)	\$ 77	\$ 1,167

* The change in fair value of available-for-sale fixed maturity securities recognized as a component of other comprehensive income were gains of \$105 million for the three-month period ended June 30, 2021, due to lower interest rates, and losses of \$111 million for the six-month period ended June 30, 2021, due to higher interest rates. The change in fair value of available-for-sale fixed maturity securities recognized as a component of other comprehensive income were gains of \$142 million and \$129 million for the three- and six-month periods ended June 30, 2020, respectively, due to lower interest rates.

The net impact on pre-tax loss of \$40 million from the GMWB embedded derivatives and related hedges in the three-month period ended June 30, 2021 (excluding related DAC amortization) was driven by losses from the impact of lower interest rates on the change in the fair value of embedded derivatives excluding NPA, offset by gains from higher equity markets, widening of credit spreads on the economic hedge target and the NPA spread, and impact of lower interest rates that resulted in NPA volume gains from higher expected GMWB payments, net of the hedging portfolio. The net impact on pre-tax income of \$67 million from the GMWB embedded derivatives and related hedges in the six-month period ended June 30, 2021 (excluding related DAC amortization) was driven by gains from higher equity markets, impact of higher interest rates on the change in the fair value of embedded derivatives excluding NPA, net of the hedging portfolio, offset by the tightening of NPA credit spreads and impact of higher interest rates that resulted in NPA volume losses from lower expected GMWB payments. The net impact on pre-tax loss of \$999 million from the GMWB embedded derivatives and related hedges in the three-month period ended June 30, 2020 (excluding related DAC amortization) was driven by tightening of credit spreads on the economic hedge target and NPA spread, and NPA volume losses from lower expected GMWB payments, partially offset by the impact of higher equity markets on the change in the fair value of embedded derivatives excluding NPA, net of the hedging portfolio. The net impact on pre-tax income of \$1.2 billion from the GMWB embedded derivatives and related hedges in the six-month period ended June 30, 2020 (excluding related DAC amortization) was driven by widening of credit spreads on the economic hedge target and the NPA spread, and impact of lower interest rates that resulted in NPA volume gains from higher expected GMWB payments, partially offset by the impact of lower interest rates on the change in the fair value of embedded derivatives excluding NPA, net of the hedging portfolio.

The change in the fair value of the GMWB embedded derivatives, excluding NPA, in the three-month period ended June 30, 2021 reflected losses from decreases in interest rates, partially offset by gains from higher equity markets. The change in the fair value of the GMWB embedded derivatives, excluding NPA, in the six-month period ended June 30, 2021 reflected gains from increases in interest rates and gains from higher equity markets. The change in the fair value of the GMWB embedded derivatives, excluding NPA, in the three-month period ended June 30, 2020 reflected gains from higher equity markets, offset by lower interest rates. The change in the fair value of the GMWB embedded derivatives, excluding NPA, in the six-month period ended June 30, 2020 reflected losses from decreases in interest rates and lower equity markets, offset by widening of credit spreads.

Fair value gains or losses in the hedging portfolio are typically not fully offset by increases or decreases in liabilities on a GAAP basis, due to the NPA and other risk margins used for GAAP valuation that cause the embedded derivatives to be less sensitive to changes in market rates than the hedge portfolio. On an economic basis, the changes in the fair value of the hedge portfolio were partially offset by the changes in the economic hedge target, as discussed below. In the three-month period ended June 30, 2021, we had a net mark to market gain of approximately \$267 million from our hedging activities related to our economic hedge target primarily driven by widening credit spreads. In the six-month period ended June 30, 2021, we had a net mark to market gain of approximately \$77 million from our hedging activities related to our economic hedge target primarily driven by widening credit spreads, and higher equity markets. In the three-month period ended June 30, 2020, we had a net mark to market loss of approximately \$801 million from our hedging activities related to our economic hedge target primarily driven by higher equity markets, offset by tightening credit spreads. In the six-month period ended June 30, 2020, we had a net mark to market gain of approximately \$1.2 billion, from our hedging activities related to our economic hedge target primarily driven by lower interest rates and equity markets, offset by widening credit spreads.

Change in Economic Hedge Target

The increase in the economic hedge target liability in the three-month period ended June 30, 2021 was primarily driven by the decrease in rates offset by higher equity markets. The decrease in the economic hedge target liability in the first half of 2021 was primarily due to higher interest rates and equity markets. The increase in the economic hedge target liability in the three-month period ended June 30, 2020 was primarily driven by the tightening of credit spreads and decrease in interest rates, offset by the increase in equity markets. The increase in the economic hedge target liability in the first half of 2020 was primarily due to lower interest rates and lower equity markets, offset by widening credit spreads.

Change in Fair Value of the Hedging Portfolio

The changes in the fair value of the economic hedge target and, to a lesser extent, the embedded derivative valuation under GAAP, were offset in part by the following changes in the fair value of the variable annuity hedging portfolio:

- Changes in the fair value of interest rate derivative contracts, which included swaps, swaptions and futures, resulted in gains driven by declining interest rates in the three-month period ended June 30, 2021 and losses driven by higher interest rates in the six-month period ended June 30, 2021 compared to gains due to lower interest rates in the three- and six-month periods ended June 30, 2020.
- Changes in the fair value of equity derivative contracts, which included futures and options, resulted in losses in the three- and six-month periods ended June 30, 2021 compared to losses in the three-month period ended June 30, 2020 and gains in the six-month period ended June 30, 2020, which varied based on the relative change in equity market returns in the respective periods.
- Changes in the fair value of fixed maturity securities, primarily corporate bonds, are used as a capital-efficient way to economically hedge interest rate and credit spread-related risk. The change in the fair value of the corporate bond hedging program in the three-month period ended June 30, 2021 reflected gains due to decreases in interest rates. The change in the fair value of the corporate bond hedging program in the six-month period ended June 30, 2021 reflected losses due to increases in interest rates, offset by tightening credit spreads. The change in the fair value of the corporate bond hedging program in the three-month period ended June 30, 2020 reflected gains due to decreases in interest rates and tightening of credit spreads, while in the six-month period ended June 30, 2020 reflected gains due to decreases in interest rates offset by widening credit spreads.

DAC

The following table summarizes the major components of the changes in DAC, including VOBA, within the Life and Retirement companies:

Six Months Ended June 30, (in millions)		2021	2020
Balance, beginning of year	\$	7,316	\$ 8,119
Initial allowance upon the adoption of the current expected credit loss accounting standard		-	15
Acquisition costs deferred		535	455
Amortization expense:			
Related to realized gains and losses		(78)	(287)
All other operating amortization		(393)	(445)
Increase (decrease) in DAC due to foreign exchange		6	(35)
Change related to unrealized depreciation (appreciation) of investments		603	(330)
Balance, end of period^(a)	\$	7,989	\$ 7,492

(a) DAC balance excluding the amount related to unrealized depreciation (appreciation) of investments was \$10.5 billion and \$9.8 billion at June 30, 2021 and 2020, respectively.

DAC and Reserves Related to Unrealized Appreciation of Investments

DAC and Reserves for universal life and investment-oriented products are adjusted at each balance sheet date to reflect the change in DAC, unearned revenue, and benefit reserves with an offset to Other comprehensive income (OCI) as if securities available for sale had been sold at their stated aggregate fair value and the proceeds reinvested at current yields (shadow Investment-Oriented Adjustments). Similarly, for long-duration traditional products, significant unrealized appreciation of investments in a sustained low interest rate environment may cause additional future policy benefit liabilities with an offset to OCI to be recorded.

Shadow adjustments to DAC and unearned revenue generally move in the opposite direction of the change in unrealized appreciation of the available for sale securities portfolio, reducing the reported DAC and unearned revenue balance when market interest rates decline. Conversely, shadow adjustments to benefit reserves generally move in the same direction as the change in unrealized appreciation of the available for sale securities portfolio, increasing reported future policy benefit liabilities balance when market interest rates decline.

Market conditions in the six-month period ended June 30, 2021 drove a \$4.9 billion decrease in the unrealized appreciation of fixed maturity securities held to support the Life and Retirement businesses at June 30, 2021 compared to December 31, 2020. At June 30, 2021, the shadow Investment-Oriented Adjustments reflected increases in amortized balances including DAC and unearned revenue reserves, while policyholder benefit liabilities including shadow loss recognition reserves decreased \$760 million from December 31, 2020.

Reserves

The following table presents a rollforward of insurance reserves by operating segments for Life and Retirement, including future policy benefits, policyholder contract deposits, other policyholder funds, and separate account liabilities, as well as Retail Mutual Funds and Group Retirement mutual fund assets under administration:

(in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2021	2020	2021	2020

Mutual fund assets	34,758	32,772
Total insurance reserves and mutual fund assets	\$ 353,825	\$ 343,333

* Excludes unearned revenue liability.

Liquidity and Capital Resources

OVERVIEW

Liquidity refers to the ability to generate sufficient cash resources to meet our payment obligations. It is defined as cash and unencumbered assets that can be monetized in a short period of time at a reasonable cost. We endeavor to manage our liquidity prudently through various risk committees, policies and procedures, and a stress testing and liquidity risk framework established by our Treasury group with oversight by Enterprise Risk Management (ERM). Our liquidity risk framework is designed to manage liquidity at both AIG Parent and its subsidiaries to meet our financial obligations for a minimum of six months under a liquidity stress scenario.

See Part II, Item 7. MD&A – Enterprise Risk Management – Risk Appetite, Limits, Identification and Measurement and Enterprise Risk Management – Liquidity Risk Management in the 2020 Annual Report for additional information.

Capital refers to the long-term financial resources available to support the operation of our businesses, fund business growth, and cover financial and operational needs that arise from adverse circumstances. Our primary source of ongoing capital generation is derived from the profitability of our insurance subsidiaries. We must comply with numerous constraints on our minimum capital positions. These constraints drive the requirements for capital adequacy at AIG and the individual businesses and are based on internally-defined risk tolerances, regulatory requirements, rating agency and creditor expectations and business needs. Actual capital levels are monitored on a regular basis, and using ERM's stress testing methodology, we evaluate the capital impact of potential macroeconomic, financial and insurance stresses in relation to the relevant capital constraints of both AIG and our insurance subsidiaries.

We believe that we have sufficient liquidity and capital resources to satisfy future requirements and meet our obligations to policyholders, customers, creditors and debt-holders, including those arising from reasonably foreseeable contingencies or events.

Nevertheless, some circumstances may cause our cash or capital needs to exceed projected liquidity or readily deployable capital resources. Additional collateral calls, deterioration in investment portfolios or reserve strengthening affecting statutory surplus, higher surrenders of annuities and other policies, downgrades in credit ratings, catastrophic losses or fluctuations in the capital markets generally may result in significant additional cash or capital needs and loss of sources of liquidity and capital. Other potential events that could cause a liquidity strain include an economic collapse of a nation or region significant to our operations, nationalization, catastrophic terrorist acts, pandemics or other events causing economic or political upheaval. In addition, regulatory and other legal restrictions could limit our ability to transfer funds freely, either to or from our subsidiaries.

For a discussion regarding risks associated with COVID-19, see the 2020 Annual Report, Part I, Item 1A. Risk Factors – Market Conditions – COVID-19 is adversely affecting, and is expected to continue to adversely affect, our global business, financial condition and results of operations, and its ultimate impact will depend on future developments that are uncertain and cannot be predicted, including the scope, severity and duration of the crisis, and the governmental, legislative and regulatory actions taken and court decisions rendered in response thereto.

Depending on market conditions, regulatory and rating agency considerations and other factors, we may take various liability and capital management actions. Liability management actions may include, but are not limited to, repurchasing or redeeming outstanding debt, issuing new debt or engaging in debt exchange offers. Capital management actions may include, but are not limited to, issuing preferred stock, paying dividends to our shareholders on the AIG Common Stock, par value \$2.50 per share (AIG Common Stock), paying dividends to the holders of our Series A 5.85% Non-Cumulative Perpetual Preferred Stock (Series A Preferred Stock), and repurchases of AIG Common Stock.

LIQUIDITY AND CAPITAL RESOURCES HIGHLIGHTS

SOURCES

Liquidity to AIG Parent from Subsidiaries

During the six-month period ended June 30, 2021, our General Insurance companies distributed cash and fixed maturity securities of \$855 million, and our Life and Retirement companies distributed cash of \$1.4 billion, to AIG Parent or applicable intermediate holding companies.

Warrant Exercises

In January 2021, we received aggregate proceeds of approximately \$92 million in connection with warrant exercises to purchase approximately 2 million shares of AIG Common Stock that occurred prior to the January 19, 2021 expiration of warrants to purchase shares of AIG Common Stock.

Tax Sharing Payment from Fortitude Re

In January 2021, we received \$109 million in tax sharing payments in the form of cash from Fortitude Re related to periods prior to the Majority Interest Fortitude Sale. The tax sharing payments from Fortitude Re may be subject to further adjustment in future periods.

USES

General Borrowings*

During the six-month period ended June 30, 2021, \$1.8 billion of debt categorized as general borrowings matured, was repaid or redeemed as follows:

- Redeemed \$1.5 billion aggregate principal amount of our 3.300% Notes Due 2021.
- Repurchased, through cash tender offers, \$254 million aggregate principal amount of certain notes and debentures issued or guaranteed by AIG for an aggregate purchase price of approximately \$359 million.

We made interest payments on our general borrowings totaling \$551 million during the six-month period ended June 30, 2021. Of this amount, AIG Parent made interest payments on AIG Parent-issued debt instruments totaling \$524 million during the six-month period ended June 30, 2021.

Dividends

We paid a cash dividend of \$365.625 per share on AIG's Series A Preferred Stock during each of the first and second quarters of 2021 totaling \$15 million.

We paid a cash dividend of \$0.32 per share on AIG Common Stock during each of the first and second quarters of 2021 totaling \$550 million.

Repurchases of Common Stock

During the six-month period ended June 30, 2021, we repurchased approximately 13 million shares of AIG Common Stock, for an aggregate purchase price of approximately \$592 million pursuant to Exchange Act Rule 10b5-1 repurchase plans. Approximately \$92 million of these share repurchases were funded with proceeds received from warrant exercises that occurred prior to the expiration of warrants to purchase shares of AIG Common Stock on January 19, 2021.

IRS Tax Prepayment

In June 2021, AIG Parent made a prepayment of approximately \$354 million to the U.S. Treasury in connection with certain settlement agreements described in Tax Matters below.

* On July 1, 2021, we repurchased through cash tender offers an additional \$8 million aggregate principal amount of certain notes and debentures issued or guaranteed by AIG for an aggregate purchase price of approximately \$10 million.

ANALYSIS OF SOURCES AND USES OF CASH

The following table presents selected data from AIG's Condensed Consolidated Statements of Cash Flows:

Six Months Ended June 30,		2021	2020
(in millions)			
Sources:			
Net cash provided by operating activities	\$	2,810	\$ -
Changes in policyholder contract balances		1,958	1,407
Issuance of long-term debt		54	4,139
Issuance of debt of consolidated investment entities		2,542	1,370
Total sources		7,364	6,916
Uses:			
Net cash used in operating activities		-	(239)
Net cash used in investing activities		(1,645)	(2,903)
Repayments of long-term debt		(1,839)	(513)
Repayments of debt of consolidated investment entities		(2,560)	(1,364)
Purchase of common stock		(592)	(500)
Dividends paid on preferred stock		(15)	(15)
Dividends paid on common stock		(550)	(551)
Net cash used in other financing activities		(298)	(269)
Total uses		(7,499)	(6,354)
Effect of exchange rate changes on cash and restricted cash		(34)	3
Increase (decrease) in cash and restricted cash	\$	(169)	\$ 565

The following table presents a summary of AIG's Condensed Consolidated Statements of Cash Flows:

Six Months Ended		2021	2020
(in millions)			
Summary:			
Net cash provided by (used in) operating activities	\$	2,810	\$ (239)
Net cash used in investing activities		(1,645)	(2,903)
Net cash provided by (used in) financing activities		(1,300)	3,704
Effect of exchange rate changes on cash and restricted cash		(34)	3
Net Increase (decrease) in cash and restricted cash		(169)	565
Cash and restricted cash at beginning of year		3,230	3,287
Cash and restricted cash at end of period	\$	3,061	\$ 3,852

Operating Cash Flow Activities

Insurance companies generally receive most premiums in advance of the payment of claims or policy benefits. The ability of insurance companies to generate positive cash flow is affected by the frequency and severity of losses under their insurance policies, policy retention rates and operating expenses.

Interest payments totaled \$592 million in the six-month period ended June 30, 2021 compared to \$581 million in the same period in the prior year. Excluding interest payments, AIG had operating cash inflows of \$3.4 billion in the six-month period ended June 30, 2021 compared to operating cash inflows of \$342 million in the same period in the prior year.

Investing Cash Flow Activities

Net cash used in investing activities in the six-month period ended June 30, 2021 was \$1.6 billion compared to net cash used in investing activities of \$2.9 billion in the same period in the prior year.

Financing Cash Flow Activities

Net cash used in financing activities in the six-month period ended June 30, 2021 reflected:

- approximately \$550 million in the aggregate to pay a dividend of \$0.32 per share on AIG Common Stock in each of the first and second quarters of 2021;
- approximately \$15 million in the aggregate to pay a dividend of \$365.625 per share on AIG's Series A Preferred Stock in each of the first and second quarters of 2021;
- approximately \$592 million in the aggregate to repurchase approximately 13 million shares of AIG Common Stock;
- approximately \$1.8 billion in net outflows from the issuance and repayment of long-term debt; and
- approximately \$18 million in net outflows from the issuance and repayment of debt of consolidated investment entities.

Net cash provided by financing activities in the six-month period ended June 30, 2020 reflected:

- approximately \$551 million in the aggregate to pay a dividend of \$0.32 per share on AIG Common Stock in each of the first and second quarters of 2020;
- approximately \$15 million in the aggregate to pay a dividend of \$365.625 per share on AIG's Series A Preferred Stock in each of the first and second quarters of 2020;
- \$500 million to repurchase approximately 12 million shares of AIG Common Stock;
- approximately \$3.6 billion in net inflows from the issuance and repayment of long-term debt; and
- approximately \$6 million in net inflows from the issuance and repayment of debt of consolidated investment entities.

LIQUIDITY AND CAPITAL RESOURCES OF AIG PARENT AND SUBSIDIARIES

AIG Parent

As of June 30, 2021, AIG Parent had approximately \$11.7 billion in liquidity sources. AIG Parent's liquidity sources are primarily held in the form of cash, short-term investments and publicly traded, investment grade rated fixed maturity securities and also include a committed, revolving syndicated credit facility. Fixed maturity securities primarily include U.S. government and government sponsored entity securities, U.S. agency mortgage-backed securities, corporate and municipal bonds and certain other highly rated securities. AIG Parent actively manages its assets and liabilities in terms of products, counterparties and duration. Based upon an assessment of funding needs, the liquidity sources can be readily monetized through sales or repurchase agreements or contributed as admitted assets to regulated insurance companies. AIG Parent liquidity is monitored through the use of various internal liquidity risk measures. AIG Parent's primary sources of liquidity are dividends, distributions, loans and other payments from subsidiaries and credit facilities. AIG Parent's primary uses of liquidity are for debt service, capital and liability management, and operating expenses.

We believe that we have sufficient liquidity and capital resources to satisfy our reasonably foreseeable future requirements and meet our obligations to our creditors, debt-holders and insurance company subsidiaries. We expect to access the debt and preferred equity markets from time to time to meet funding requirements as needed.

We utilize our capital resources to support our businesses, with the majority of capital allocated to our insurance operations. Should we have or generate more capital than is needed to support our business strategies (including organic growth or acquisition opportunities) or mitigate risks inherent to our business, we may develop plans to distribute such capital to shareholders via dividends or AIG Common Stock repurchase authorizations or deploy such capital towards liability management.

In the normal course, it is expected that a portion of the capital released by our insurance operations, by our other operations or through the utilization of AIG's deferred tax assets may be available to support our business strategies, for distribution to shareholders or for liability management.

In developing plans to distribute capital, AIG considers a number of factors, including, but not limited to: AIG's business and strategic plans, expectations for capital generation and utilization, AIG's funding capacity and capital resources in comparison to internal benchmarks, as well as rating agency expectations, regulatory requirements, bank creditor covenants and internal stress tests for capital.

The following table presents AIG Parent's liquidity sources:

<i>(in millions)</i>	As of June 30, 2021	As of December 31, 2020
Cash and short-term investments ^(a)	\$ 3,465	\$ 6,762
Unencumbered fixed maturity securities ^(b)	3,725	3,711
Total AIG Parent liquidity	7,190	10,473
Available capacity under committed, syndicated credit facility ^(c)	4,500	4,500
Total AIG Parent liquidity sources	\$ 11,690	\$ 14,973

(a) Cash and short-term investments include reverse repurchase agreements totaling \$2.0 billion and \$5.4 billion as of June 30, 2021 and December 31, 2020, respectively.

(b) Unencumbered securities consist of publicly traded, investment grade rated fixed maturity securities. Fixed maturity securities primarily include U.S. government and government sponsored entity securities, U.S. agency mortgage-backed securities, corporate and municipal bonds and certain other highly rated securities. Includes \$20 million of securities received as dividends in the six months ended June 30, 2021 with a forward settle date of July 14, 2021.

(c) For additional information relating to this committed, syndicated credit facility see – Credit Facilities below.

Insurance Companies

We expect that our insurance companies will be able to continue to satisfy reasonably foreseeable future liquidity requirements and meet their obligations, including those arising from reasonably foreseeable contingencies or events, through cash from operations and, to the extent necessary, monetization of invested assets. Our insurance companies' liquidity resources are primarily held in the form of cash, short-term investments and publicly traded, investment grade rated fixed maturity securities.

Each of our material insurance companies' liquidity is monitored through various internal liquidity risk measures. The primary sources of liquidity are premiums, fees, reinsurance recoverables and investment income and maturities. The primary uses of liquidity are paid losses, reinsurance payments, benefit claims, surrenders, withdrawals, interest payments, dividends, expenses, investment purchases and collateral requirements.

Our General Insurance companies may require additional funding to meet capital or liquidity needs under certain circumstances. Large catastrophes may require us to provide additional support to our affected operations. Downgrades in our credit ratings could put pressure on the insurer financial strength ratings of our subsidiaries, which could result in non-renewals or cancellations by policyholders and adversely affect a subsidiary's ability to meet its own obligations. Increases in market interest rates may adversely affect the financial strength ratings of our subsidiaries, as rating agency capital models may reduce the amount of available capital relative to required capital.

Management believes that because of the size and liquidity of our Life and Retirement companies' investment portfolios, normal deviations from projected claim or surrender experience would not create significant liquidity risk. Furthermore, our Life and Retirement companies' products contain certain features that mitigate surrender risk, including surrender charges. However, in times of extreme capital markets disruption or as a result of fluctuations in the capital markets generally, liquidity needs could outpace resources. As part of their risk management framework, our Life and Retirement companies continue to evaluate and, where appropriate, pursue strategies and programs to improve their liquidity position and facilitate their ability to maintain a fully invested asset portfolio.

Certain of our U.S. insurance companies are members of the FHLBs in their respective districts. Borrowings from FHLBs are used to supplement liquidity or for other uses deemed appropriate by management. Our U.S. General Insurance companies had no outstanding borrowings from FHLBs at both June 30, 2021 and December 31, 2020. Our U.S. Life and Retirement companies had \$3.6 billion which were due to FHLBs in their respective districts at both June 30, 2021 and December 31, 2020, under funding agreements issued through our Individual Retirement, Group Retirement and Institutional Markets operating segments, which were reported in Policyholder contract deposits. Proceeds from funding agreements are generally invested in fixed income securities and other investments intended to generate spread income. These investment contracts do not have mortality or morbidity risk and are similar to GICs. In addition, our U.S. Life and Retirement companies had no outstanding borrowings in the form of cash advances from FHLBs at both June 30, 2021 and December 31, 2020.

Certain of our U.S. Life and Retirement companies have programs, which began in 2012, that lend securities from their investment portfolio to supplement liquidity or for other uses as deemed appropriate by management. Under these programs, these U.S. Life and Retirement companies lend securities to financial institutions and receive cash as collateral equal to 102 percent of the fair value of the loaned securities. Cash collateral received is invested in short-term investments or partially used for short-term liquidity purposes. Additionally, the aggregate amount of securities that a Life and Retirement company is able to lend under its program at any time is limited to five percent of its general account statutory-basis admitted assets. Our U.S. Life and Retirement companies had \$3.4 billion of securities subject to these agreements at both June 30, 2021 and December 31, 2020, respectively, and \$3.4 billion and \$3.5 billion of liabilities to borrowers for collateral received at June 30, 2021 and December 31, 2020, respectively.

AIG generally manages capital between AIG Parent and our insurance companies through internal, Board-approved policies and limits, as well as management standards. In addition, AIG Parent has unconditional capital maintenance agreements (CMAs) in place with certain subsidiaries. Nevertheless, regulatory and other legal restrictions could limit our ability to transfer capital freely, either to or from our subsidiaries.

AIG Parent and/or certain subsidiaries are parties to several letter of credit agreements with various financial institutions, which issue letters of credit from time to time in support of our insurance companies. These letters of credit are subject to reimbursement by AIG Parent and/or certain subsidiaries in the event of a drawdown by our insurance companies. Letters of credit issued in support of the General Insurance companies totaled approximately \$4.0 billion at June 30, 2021. Letters of credit issued in support of the Life and Retirement companies totaled approximately \$613 million at June 30, 2021.

In the six-month period ended June 30, 2021, our General Insurance companies collectively paid to AIG Parent or applicable intermediate holding companies a total of approximately \$829 million in dividends in the form of cash and fixed maturity securities and \$26 million in tax sharing payments in the form of cash. The fixed maturity securities primarily included U.S. treasuries and securities issued by other U.S. agencies.

In the six-month period ended June 30, 2021, our Life and Retirement companies collectively paid to AIG Parent or applicable intermediate holding companies a total of approximately \$649 million in dividends in the form of cash and \$738 million in tax sharing payments in the form of cash.

Tax Matters

In October 2020, the Southern District of New York dismissed the case for the 1997 tax year related to the disallowance of foreign tax credits associated with cross border financing transactions based upon the settlement reached between AIG and the government. The settlement concluded our ongoing dispute related to the disallowance of foreign tax credits associated with cross border financing transactions for all years and as a result of the settlement, we will be required to make a payment to the U.S. Treasury. The amount we currently expect to pay based on settlement terms is approximately \$0.4 billion, including obligations of AIG Parent and subsidiaries. This amount is net of payments previously made with respect to cross border financing transactions from tax years 1997 through 2006 and other matters related to 2006 and prior, including prepayments of approximately \$548 million and \$354 million that AIG made to the U.S. Treasury in June 2020 and June 2021, respectively. The amount also includes interest that will become due after review of the interest calculations and will reflect benefits from the application of interest netting which AIG has requested. While we continue to finalize the interest calculations with the IRS, AIG expects to make the remaining payment as early as the third quarter of 2021.

For additional information regarding this matter see Note 15 to the Condensed Consolidated Financial Statements.

CREDIT FACILITIES

We maintain a committed, revolving syndicated credit facility (the Facility) as a potential source of liquidity for general corporate purposes. The Facility provides for aggregate commitments by the bank syndicate to provide unsecured revolving loans and/or standby letters of credit of up to \$4.5 billion without any limits on the type of borrowings and is scheduled to expire in June 2022.

As of June 30, 2021, a total of \$4.5 billion remains available under the Facility. Our ability to utilize the Facility is not contingent on our credit ratings. However, our ability to utilize the Facility is conditioned on the satisfaction of certain legal, operating, administrative and financial covenants and other requirements contained in the Facility. These include covenants relating to our maintenance of a specified total consolidated net worth and total consolidated debt to total consolidated capitalization. Failure to satisfy these and other requirements contained in the Facility would restrict our access to the Facility and could have a material adverse effect on our financial condition, results of operations and liquidity. We expect to utilize the Facility from time to time, and may use the proceeds for general corporate purposes.

CONTRACTUAL OBLIGATIONS

As of June 30, 2021, there have been no material changes in our contractual obligations from December 31, 2020, a description of which may be found in Part II, Item 7. MD&A – Liquidity and Capital Resources – Contractual Obligations in the 2020 Annual Report.

OFF-BALANCE SHEET ARRANGEMENTS AND COMMERCIAL COMMITMENTS

As of June 30, 2021, there have been no material changes in our off-balance sheet arrangements and commercial commitments from December 31, 2020, a description of which may be found in Part II, Item 7. MD&A – Liquidity and Capital Resources – Off-Balance Sheet Arrangements and Commercial Commitments in the 2020 Annual Report.

Arrangements with Variable Interest Entities

We enter into various arrangements with variable interest entities (VIEs) in the normal course of business, and we consolidate a VIE when we are the primary beneficiary of the entity.

For a further discussion of our involvement with VIEs see Note 8 to the Condensed Consolidated Financial Statements.

DEBT

The following table provides the rollforward of AIG's total debt outstanding:

Six Months Ended June 30, 2021 (in millions)	Balance at December 31, 2020	Issuances	Maturities and Repayments	Effect of Foreign Exchange	Other Changes	Balance at June 30, 2021
Debt issued or guaranteed by AIG:						
AIG general borrowings:						
Notes and bonds payable	\$ 23,068	\$ -	\$ (1,537)	\$ (60)	\$ 20	\$ 21,491
Junior subordinated debt	1,561	-	-	(5)	-	1,556
AIG Japan Holdings Kabushiki Kaisha	361	-	-	(18)	-	343
AIGLH notes and bonds payable	282	-	(82)	-	-	200
AIGLH junior subordinated debt	361	-	(135)	-	1	227
Validus notes and bonds payable	348	-	-	-	(2)	346
Total AIG general borrowings	25,981	-	(1,754)	(83)	19	24,163
AIG borrowings supported by assets:^(a)						
Series AIGFP matched notes and bonds payable	21	-	-	-	-	21
GIAs, at fair value	2,033	54	(121)	-	(62) ^(b)	1,904
Notes and bonds payable, at fair value	64	-	(4)	-	10 ^(b)	70
Total AIG borrowings supported by assets	2,118	54	(125)	-	(52)	1,995
Total debt issued or guaranteed by AIG	28,099	54	(1,879)	(83)	(33)	26,158
Other subsidiaries' notes, bonds, loans and mortgages payable - not guaranteed by AIG	4	-	(1)	-	-	3
Total long-term debt	28,103	54	(1,880)	(83)	(33)	26,161
Debt of consolidated investment entities - not guaranteed by AIG ^(c)	9,431	2,542	(2,560)	(4)	157 ^(d)	9,566
Total debt	\$ 37,534	\$ 2,596	\$ (4,440)	\$ (87)	\$ 124	\$ 35,727

(a) AIG Parent guarantees all such debt, except for Series AIGFP matched notes and bonds payable, which are direct obligations of AIG Parent. Collateral posted to third parties were \$1.4 billion at both June 30, 2021 and December 31, 2020. This collateral primarily consists of securities of the U.S. government and government sponsored entities and generally cannot be replighted or resold by the counterparties.

(b) Primarily represents adjustments to the fair value of debt.

(c) At June 30, 2021, includes debt of consolidated investment entities related to real estate investments of \$3.0 billion, affordable housing partnership investments of \$2.5 billion and other securitization vehicles of \$4.1 billion. At December 31, 2020, includes debt of consolidated investment entities related to real estate investments of \$3.1 billion, affordable housing partnership investments of \$2.3 billion and other securitization vehicles of \$4.0 billion.

(d) Includes the effect of consolidating previously unconsolidated partnerships.

TOTAL DEBT OUTSTANDING

(in millions)

**Debt Maturities**

The following table summarizes maturing long-term debt at June 30, 2021 of AIG for the next four quarters:

		Third Quarter 2021	Fourth Quarter 2021	First Quarter 2022	Second Quarter 2022	Total
(in millions)						
AIG general borrowings	\$	-	\$ -	\$ -	\$ 1,498	\$ 1,498
AIG borrowings supported by assets		54	35	-	20	109
Other subsidiaries' notes, bonds, loans and mortgages payable		1	-	-	-	1
Total	\$	55	\$ 35	\$ -	\$ 1,518	\$ 1,608

The following table presents maturities of long-term debt (including unamortized original issue discount, hedge accounting valuation adjustments and fair value adjustments, when applicable):

June 30, 2021	Remainder		Year Ending					
(in millions)	Total	of 2021	2022	2023	2024	2025	2026	Thereafter
Debt issued or guaranteed by AIG:								
AIG general borrowings:								
Notes and bonds payable	\$ 21,491	\$ -	\$ 1,515	\$ 1,668	\$ 999	\$ 2,751	\$ 1,545	\$ 13,013

Series AIGFP matched notes and bonds payable	21	-	-	-	-	-	-	21
GIAs, at fair value	1,904	89	52	127	147	579	102	808
Notes and bonds payable, at fair value	70	-	-	-	-	-	-	70
Total AIG borrowings supported by assets	1,995	89	52	127	147	579	102	899
Total debt issued or guaranteed by AIG	26,158	89	1,567	2,020	1,146	3,549	1,647	16,140
Debt not guaranteed by AIG:								
Other subsidiaries notes, bonds, loans and mortgages payable	3	1	1	1	-	-	-	-
Total debt not guaranteed by AIG	3	1	1	1	-	-	-	-
Total*	\$ 26,161	\$ 90	\$ 1,568	\$ 2,021	\$ 1,146	\$ 3,549	\$ 1,647	\$ 16,140

* Does not reflect \$9.6 billion of notes issued by consolidated investment entities, for which recourse is limited to the assets of the respective investment entities and for which there is no recourse to the general credit of AIG.

CREDIT RATINGS

Credit ratings estimate a company's ability to meet its obligations and may directly affect the cost and availability of financing to that company. The following table presents the credit ratings of AIG and certain of its subsidiaries as of the date of this filing. Figures in parentheses indicate the relative ranking of the ratings within the agency's rating categories; that ranking refers only to the major rating category and not to the modifiers assigned by the rating agencies.

	Short-Term Debt		Senior Long-Term Debt		
	Moody's	S&P	Moody's ^(a)	S&P ^(b)	Fitch ^(c)
American International Group, Inc.	P-2 (2nd of 3)	A-2 (2nd of 8)	Baa 2 (4th of 9) / Stable outlook	BBB+ (4th of 9) CreditWatch Negative	BBB+ (4th of 9) Rating Watch Negative
AIG Financial Products Corp. ^(d)	P-2	A-2	Baa 2 (4th of 9) / Stable outlook	BBB+ CreditWatch Negative	

(a) Moody's appends numerical modifiers 1, 2 and 3 to the generic rating categories to show relative position within the rating categories.

(b) S&P ratings may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

(c) Fitch Ratings Inc. (Fitch) ratings may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

(d) AIG guarantees all obligations of AIG Financial Products Corp.

These credit ratings are current opinions of the rating agencies. They may be changed, suspended or withdrawn at any time by the rating agencies as a result of changes in, or unavailability of, information or based on other circumstances. Ratings may also be withdrawn at our request. *For a discussion of rating agency actions in response to AIG's announced intention to separate its Life and Retirement business from AIG, see –Rating Agency Actions Related to the Announced Separation of Life and Retirement below.*

We are party to some agreements that contain "ratings triggers." Depending on the ratings maintained by one or more rating agencies, these triggers could result in (i) the termination or limitation of credit availability or a requirement for accelerated repayment, (ii) the termination of business contracts or (iii) a requirement to post collateral for the benefit of counterparties.

In the event of a downgrade of AIG's long-term senior debt ratings, AIG Financial Products Corp. and related subsidiaries (collectively AIGFP) and certain other AIG entities would be required to post additional collateral under some derivative and other transactions, or certain of the counterparties of AIGFP or of such other AIG entities would be permitted to terminate such transactions early.

The actual amount of collateral that we would be required to post to counterparties in the event of such downgrades, or the aggregate amount of payments that we could be required to make, depends on market conditions, the fair value of outstanding affected transactions and other factors prevailing at the time of the downgrade.

For a discussion of the effects of downgrades in our credit ratings see Note 9 to the Condensed Consolidated Financial Statements and Part I, Item 1A. Risk Factors – Liquidity, Capital and Credit in the 2020 Annual Report.

FINANCIAL STRENGTH RATINGS

Financial Strength ratings estimate an insurance company's ability to pay its obligations under an insurance policy. The following table presents the ratings of our significant insurance subsidiaries as of the date of this filing.

	A.M. Best	S&P	Fitch	Moody's
National Union Fire Insurance Company of Pittsburgh, Pa.	A	A+	A	A2
Lexington Insurance Company	A	A+	A	A2
American Home Assurance Company	A	A+	A	A2
American General Life Insurance Company	A	A+	A+	A2
The Variable Annuity Life Insurance Company	A	A+	A+	A2
United States Life Insurance Company in the City of New York	A	A+	A+	A2
AIG Europe S.A.	NR	A+	NR	A2
American International Group UK Ltd.	A	A+	NR	A2
AIG General Insurance Co. Ltd.	NR	A+	NR	NR
Validus Reinsurance, Ltd.	A	A+	NR	A2

These financial strength ratings are current opinions of the rating agencies. They may be changed, suspended or withdrawn at any time by the rating agencies as a result of changes in, or unavailability of, information or based on other circumstances.

For a discussion of the effects of downgrades in our financial strength ratings see Note 9 to the Condensed Consolidated Financial Statements and Part I, Item 1A. Risk Factors – Liquidity, Capital and Credit in the 2020 Annual Report.

RATING AGENCY ACTIONS RELATED TO THE ANNOUNCED SEPARATION OF LIFE AND RETIREMENT

On October 26, 2020, AIG announced its intention to separate its Life and Retirement business from AIG, and on July 14, 2021, AIG and Blackstone announced that they have reached a definitive agreement for Blackstone to acquire a 9.9 percent equity stake in AIG's Life and Retirement business. In response to such announcements, the rating agencies in the tables above took the following actions:

- On October 27, 2020, A.M. Best issued a comment stating that its financial strength and issuer credit ratings on AIG and subsidiaries are unchanged as a result of the announcement.
- On October 28, 2020, Fitch placed the credit ratings of AIG on "Rating Watch Negative." Fitch also affirmed the financial strength ratings and outlooks on AIG's insurance subsidiaries.
- On October 28, 2020, Moody's placed the debt ratings of AIG on review for downgrade. Moody's also affirmed the financial strength ratings and outlooks on AIG's insurance subsidiaries. On July 15, 2021, Moody's lowered its debt ratings of AIG to Baa2 from Baa1 and assigned a stable outlook. Moody's also revised the outlook on the A2 financial strength ratings of the Life and Retirement subsidiaries to negative from stable. The ratings of the General Insurance subsidiaries were unaffected by these announcements.
- On October 27, 2020, S&P placed the credit ratings of AIG and the financial strength ratings of most of the General Insurance subsidiaries on CreditWatch with negative implications. S&P also placed the financial strength ratings of the Life and Retirement subsidiaries on CreditWatch with developing implications.

REGULATION AND SUPERVISION

For a discussion of our regulation and supervision by different regulatory authorities in the United States and abroad, including with respect to our liquidity and capital resources see Part I, Item 1. Business – Regulation and Part I, Item 1A. Risk Factors – Regulation in the 2020 Annual Report, and Regulatory Environment below in this MD&A.

DIVIDENDS

On February 16, 2021, our Board of Directors declared a cash dividend on AIG Common Stock of \$0.32 per share, payable on March 30, 2021 to shareholders of record on March 16, 2021. On May 6, 2021, our Board of Directors declared a cash dividend on AIG Common Stock of \$0.32 per share, payable on June 29, 2021 to shareholders of record on June 15, 2021. On August 5, 2021, our Board of Directors declared a cash dividend on AIG Common Stock of \$0.32 per share, payable on September 30, 2021 to shareholders of record on September 16, 2021.

On February 16, 2021, our Board of Directors declared a cash dividend on AIG's Series A Preferred Stock of \$365.625 per share, payable on March 15, 2021 to holders of record on February 26, 2021. On May 6, 2021, our Board of Directors declared a cash dividend on AIG's Series A Preferred Stock of \$365.625 per share, payable on June 15, 2021 to holders of record on May 31, 2021. On August 5, 2021, our Board of Directors declared a cash dividend on AIG's Series A Preferred Stock of \$365.625 per share, payable on September 15, 2021 to holders of record on August 31, 2021.

The payment of any future dividends will be at the discretion of our Board of Directors and will depend on various factors, as discussed further in Note 12 to the Condensed Consolidated Financial Statements.

REPURCHASES OF AIG COMMON STOCK

Our Board of Directors has authorized the repurchase of shares of AIG Common Stock through a series of actions.

During the six-month period ended June 30, 2021, we repurchased approximately 13 million shares of AIG Common Stock for an aggregate purchase price of \$592 million pursuant to Exchange Act Rule 10b5-1 repurchase plans. As of June 30, 2021, approximately \$908 million remained under our then-existing share repurchase authorization.

On August 3, 2021, our Board of Directors authorized a share repurchase authorization of AIG Common Stock of \$6.0 billion (inclusive of the approximately \$908 million remaining under the Board's prior share repurchase authorization). As of August 5, 2021, \$6.0 billion remained under the authorization. Shares may be repurchased from time to time in the open market, private purchases, through forward, derivative, accelerated repurchase or automatic repurchase transactions or otherwise. Certain of our share repurchases have been and may from time to time be effected through the Exchange Act Rule 10b5-1 repurchase plans. The timing of any future share repurchases will depend on market conditions, our business and strategic plans, financial condition, results of operations, liquidity and other factors, as discussed further in Note 12 to the Condensed Consolidated Financial Statements.

DIVIDEND RESTRICTIONS

Payments of dividends to AIG by its insurance subsidiaries are subject to certain restrictions imposed by regulatory authorities.

For a discussion of restrictions on payments of dividends by our subsidiaries see Note 19 to the Consolidated Financial Statements in the 2020 Annual Report.

Enterprise Risk Management

Risk management includes the identification and measurement of various forms of risk, the establishment of risk thresholds and the creation of processes intended to maintain risks within these thresholds while optimizing returns. We consider risk management an integral part of managing our core businesses and a key element of our approach to corporate governance.

OVERVIEW

We have an integrated process for managing risks throughout our organization in accordance with our firm-wide risk appetite. Our Board of Directors has oversight responsibility for the management of risk. Our Enterprise Risk Management department supervises and integrates the risk management functions in each of our business units, providing senior management with a consolidated view of AIG's major risk positions. Within each business unit, senior leaders and executives approve targeted risk tolerances within the framework provided by ERM. ERM supports our businesses and management by embedding risk management in our key day-to-day business processes and in identifying, assessing, quantifying, monitoring, reporting, and mitigating the risks taken by our businesses and AIG overall. Nevertheless, our risk management efforts may not always be successful and material adverse effects on our business, results of operations, cash flows, liquidity or financial condition may occur.

AIG employs a Three Lines of Defense model. AIG's business leaders assume full accountability for the risks and controls in their operating units, and ERM performs a review, challenge and oversight function. The third line consists of our Internal Audit Group that provides independent assurance for AIG's Board.

For a further discussion of AIG's risk management program see Part II, Item 7. MD&A — Enterprise Risk Management in the 2020 Annual Report.

As of June 30, 2021, there have been no material changes in our economic exposure to market risk from December 31, 2020, a description of which may be found in Part II, Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the 2020 Annual Report. *See Part I, Item 1A. Risk Factors in the 2020 Annual Report on how difficult conditions in the financial markets and the economy generally may materially adversely affect our business and results of our operations.*

Regulatory Environment

OVERVIEW

Our operations around the world are subject to regulation by many different types of regulatory authorities, including insurance, securities, derivatives, investment advisory and thrift regulators in the United States and abroad. The insurance and financial services industries are generally subject to close regulatory scrutiny and supervision.

Our insurance subsidiaries are subject to regulation and supervision by the states and jurisdictions in which they do business. We expect that the domestic and international regulations applicable to us and our regulated entities will continue to evolve for the foreseeable future.

In particular, significant legislative and regulatory activity has occurred at both the U.S. federal and state levels, as well as globally, in response to COVID-19 and its impact on insurance consumers. For example, many jurisdictions have issued regulations and guidance advising or requiring insurers to offer accommodations to policyholders adversely impacted by COVID-19, including requirements to defer payment of, or refund, premiums, postpone policy lapses, and have sought information and data from insurers on a number of topics, including operational preparedness, policyholder data, claims data, and other matters. While some of these legislative and regulatory initiatives have expired, a resurgence of the COVID-19 virus may lead to a renewal of those initiatives. A number of U.S. states have also passed legislation or issued other guidance that creates a presumption of coverage under workers' compensation insurance for certain people impacted by COVID-19. In most cases, the presumption applies to first responders and medical professionals, but some states apply the scope of the presumption more broadly, and efforts are underway in other states to further expand the scope of the presumption. Members of the U.S. Congress have held discussions and sought information with respect to business interruption, travel and other insurance lines impacted by the COVID-19 crisis and legislators both in the U.S. and overseas are discussing a number of potential loss-sharing programs, some of which contemplate participation by insurers, including a proposed pandemic risk insurance bill relating to business interruption and event cancellation insurance. In the EU and UK, insurance regulators issued guidance in 2020 for insurance groups subject to their jurisdiction to carefully consider the prudential impact of dividend payments and share buybacks for the benefit of shareholders, and variable remuneration policies such as cash bonuses. In the UK, the Prudential Regulation Authority announced in December 2020 that they would not be extending these recommendations into 2021. In the EU, the European Insurance and Occupational Pensions Authority and the Luxembourg Commissariat aux Assurances guidance requiring disclosure to national regulators in advance of dividends being paid remain in place until September 2021. We cannot predict what form any further legal and regulatory responses to concerns about COVID-19 and related public health issues will take, or how such responses will impact our business. We continue to actively monitor these developments and to cooperate fully with all government and regulatory authorities as they further develop their responses.

In addition to the information set forth in this Quarterly Report on Form 10-Q, our regulatory status is also discussed in the 2020 Annual Report, Part I, Item 1A. Risk Factors – Market Conditions – COVID-19 is adversely affecting, and is expected to continue to adversely affect, our global business, financial condition and results of operations, and its ultimate impact will depend on future developments that are uncertain and cannot be predicted, including the scope, severity and duration of the crisis, and the governmental, legislative and regulatory actions taken and court decisions rendered in response thereto.

Glossary

Accident year The annual calendar accounting period in which loss events occurred, regardless of when the losses are actually reported, booked or paid.

Accident year combined ratio, as adjusted The combined ratio excluding catastrophe losses and related reinstatement premiums, prior year development, net of premium adjustments, and the impact of reserve discounting.

Accident year loss ratio, as adjusted The loss ratio excluding catastrophe losses and related reinstatement premiums, prior year development, net of premium adjustments, and the impact of reserve discounting.

Acquisition ratio Acquisition costs divided by net premiums earned. Acquisition costs are those costs incurred to acquire new and renewal insurance contracts and also include the amortization of VOBA and DAC. Acquisition costs vary with sales and include, but are not limited to, commissions, premium taxes, direct marketing costs and certain costs of personnel engaged in sales support activities such as underwriting.

Additional premium represents a premium on an insurance policy over and above the initial premium imposed at the beginning of the policy. An additional premium may be assessed if the insured's risk is found to have increased significantly.

Adjusted revenues exclude Net realized gains (losses), income from non-operating litigation settlements (included in Other income for GAAP purposes) and changes in fair value of securities used to hedge guaranteed living benefits (included in Net investment income for GAAP purposes). Adjusted revenues is a GAAP measure for our segments.

Assets under administration include assets under management and Retail Mutual Funds and Group Retirement mutual fund assets that we sell or administer.

Assets under management include assets in the general and separate accounts of our subsidiaries that support liabilities and surplus related to our life and annuity insurance products and the notional value of stable value wrap contracts.

Attritional losses are losses recorded in the current accident year, which are not catastrophe losses.

Base Spread Net investment income excluding income from alternative investments and other enhancements, less interest credited excluding amortization of sales inducement assets.

Base Yield Net investment income excluding income from alternative investments and other enhancements, as a percentage of average base invested asset portfolio, which excludes alternative investments, other bond securities and certain other investments for which the fair value option has been elected.

Book value per common share, excluding accumulated other comprehensive income (AOCI) adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets and deferred tax assets (DTA) (Adjusted book value per common share) is a non-GAAP measure and is used to show the amount of our net worth on a per-common share basis. Adjusted book value per common share is derived by dividing total AIG common shareholders' equity, excluding AOCI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets and DTA (Adjusted Common Shareholders' Equity), by total common shares outstanding.

Casualty insurance Insurance that is primarily associated with the losses caused by injuries to third persons, i.e., not the insured, and the legal liability imposed on the insured as a result.

Combined ratio Sum of the loss ratio and the acquisition and general operating expense ratios.

CSA Credit Support Annex A legal document generally associated with an ISDA Master Agreement that provides for collateral postings which could vary depending on ratings and threshold levels.

Credit Valuation Adjustment (CVA)/Non-Performance Risk Adjustment (NPA) The CVA/NPA adjusts the valuation of derivatives to account for nonperformance risk of our counterparty with respect to all net derivative assets positions. Also, the CVA/NPA reflects the fair value movement in AIGFP's asset portfolio that is attributable to credit movements only, without the impact of other market factors such as interest rates and foreign exchange rates. Finally, the CVA/NPA also accounts for our own credit risk in the fair value measurement of all derivative net liability positions and liabilities where AIG has elected the fair value option, when appropriate.

DAC Deferred Policy Acquisition Costs Deferred costs that are incremental and directly related to the successful acquisition of new business or renewal of existing business.

DAC Related to Unrealized Appreciation (Depreciation) of Investments An adjustment to DAC and Reserves for investment-oriented products, equal to the change in DAC and unearned revenue amortization that would have been recorded if fixed maturity securities available for sale and also, prior to 2018, equity securities at fair value had been sold at their stated aggregate fair value and the proceeds reinvested at current yields. An adjustment to benefit reserves for investment-oriented products is also recognized to reflect the application of the benefit ratio to the accumulated assessments that would have been recorded if fixed maturity securities available for sale and also, prior to 2018, equity securities at fair value had been sold at their stated aggregate fair value and the proceeds reinvested at current yields (collectively referred to as shadow Investment-Oriented Adjustments).

For long-duration traditional products, significant unrealized appreciation of investments in a sustained low interest rate environment may cause additional future policy benefit liabilities to be recorded (shadow loss reserves).

Deferred Gain on Retroactive Reinsurance Retroactive reinsurance is a reinsurance contract in which an assuming entity agrees to reimburse a ceding entity for liabilities incurred as a result of past insurable events. If the amount of premium paid by the ceding reinsurer is less than the related ceded loss reserves, the resulting gain is deferred and amortized over the settlement period of the reserves. Any related development on the ceded loss reserves recoverable under the contract would increase the deferred gain if unfavorable, or decrease the deferred gain if favorable.

Expense ratio Sum of acquisition expenses and general operating expenses, divided by net premiums earned.

General operating expense ratio General operating expenses divided by net premiums earned. General operating expenses are those costs that are generally attributed to the support infrastructure of the organization and include but are not limited to personnel costs, projects and bad debt expenses. General operating expenses exclude losses and loss adjustment expenses incurred, acquisition expenses, and investment expenses.

GIC/GIA *Guaranteed Investment Contract/Guaranteed Investment Agreement* A contract whereby the seller provides a guaranteed repayment of principal and a fixed or floating interest rate for a predetermined period of time.

IBNR *Incurred But Not Reported* Estimates of claims that have been incurred but not reported to us.

ISDA Master Agreement An agreement between two counterparties, which may have multiple derivative transactions with each other governed by such agreement, that generally provides for the net settlement of all or a specified group of these derivative transactions, as well as pledged collateral, through a single payment, in a single currency, in the event of a default on, or affecting any, one derivative transaction or a termination event affecting all, or a specified group of, derivative transactions.

LAE *Loss Adjustment Expenses* The expenses directly attributed to settling and paying claims of insureds and include, but are not limited to, legal fees, adjuster's fees and the portion of general expenses allocated to claim settlement costs.

Loan-to-Value Ratio Principal amount of loan amount divided by appraised value of collateral securing the loan.

Loss Ratio Losses and loss adjustment expenses incurred divided by net premiums earned.

Loss reserve development The increase or decrease in incurred losses and loss adjustment expenses related to prior years as a result of the re-estimation of loss reserves at successive valuation dates for a given group of claims.

Loss reserves Liability for unpaid losses and loss adjustment expenses. The estimated ultimate cost of settling claims relating to insured events that have occurred on or before the balance sheet date, whether or not reported to the insurer at that date.

Master netting agreement An agreement between two counterparties who have multiple derivative contracts with each other that provides for the net settlement of all contracts covered by such agreement, as well as pledged collateral, through a single payment, in a single currency, in the event of default on or upon termination of any one such contract.

Natural catastrophe losses are generally weather or seismic events having a net impact on AIG in excess of \$10 million each and man-made catastrophe losses, such as terrorism and civil disorders that exceed the \$10 million threshold.

Net premiums written represent the sales of an insurer, adjusted for reinsurance premiums assumed and ceded, during a given period. Net premiums earned are the revenue of an insurer for covering risk during a given period. Net premiums written are a measure of performance for a sales period, while net premiums earned are a measure of performance for a coverage period.

Noncontrolling interests The portion of equity ownership in a consolidated subsidiary not attributable to the controlling parent company.

Policy fees An amount added to a policy premium, or deducted from a policy cash value or contract holder account, to reflect the cost of issuing a policy, establishing the required records, sending premium notices and other related expenses.

Pool A reinsurance arrangement whereby all of the underwriting results of the pool members are combined and then shared by each member in accordance with its pool participation percentage.

Premiums and deposits – Life and Retirement includes direct and assumed amounts received and earned on traditional life insurance policies, group benefit policies and life-contingent payout annuities, as well as deposits received on universal life, investment-type annuity contracts, FHLB funding agreements and mutual funds.

Prior year development See *Loss reserve development*.

RBC Risk-Based Capital A formula designed to measure the adequacy of an insurer's statutory surplus compared to the risks inherent in its business.

Reinstatement premiums Additional premiums payable to reinsurers or receivable from insurers to restore coverage limits that have been reduced or exhausted as a result of reinsured losses under certain excess of loss reinsurance contracts.

Reinsurance The practice whereby one insurer, the reinsurer, in consideration of a premium paid to that insurer, agrees to indemnify another insurer, the ceding company, for part or all of the liability of the ceding company under one or more policies or contracts of insurance which it has issued.

Retroactive Reinsurance See *Deferred Gain on Retroactive Reinsurance*.

Return on common equity – Adjusted after-tax income excluding AOCI adjusted for the cumulative unrealized gains and losses related to Fortitude Re funds withheld assets and DTA (Adjusted return on common equity) is a non-GAAP measure and is used to show the rate of return on common shareholders' equity. Adjusted return on common equity is derived by dividing actual or annualized adjusted after-tax income attributable to AIG common shareholders by average Adjusted Common Shareholders' Equity.

Return premium represents amounts given back to the insured in the case of a cancellation, an adjustment to the rate or an overpayment of an advance premium.

SIA Sales Inducement Asset Represents enhanced crediting rates or bonus payments to contract holders on certain annuity and investment contract products that meet the criteria to be deferred and amortized over the life of the contract.

Solvency II Legislation in the European Union which reforms the insurance industry's solvency framework, including minimum capital and solvency requirements, governance requirements, risk management and public reporting standards. The Solvency II Directive (2009/138/EEC) was adopted on November 25, 2009 and became effective on January 1, 2016.

Subrogation The amount of recovery for claims we have paid our policyholders, generally from a negligent third party or such party's insurer.

Surrender charge A charge levied against an investor for the early withdrawal of funds from a life insurance or annuity contract, or for the cancellation of the agreement.

Surrender rate represents annualized surrenders and withdrawals as a percentage of average reserves and Group Retirement mutual fund assets under administration.

Unearned premium reserve Liabilities established by insurers and reinsurers to reflect unearned premiums, which are usually refundable to policyholders if an insurance or reinsurance contract is canceled prior to expiration of the contract term.

VOBA Value of Business Acquired Present value of projected future gross profits from in-force policies of acquired businesses.

ITEM 3 | Quantitative and Qualitative Disclosures About Market Risk

Included in Part I, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations – Enterprise Risk Management.

ITEM 4 | Controls and Procedures

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed or submitted under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures. In connection with the preparation of this Quarterly Report on Form 10-Q, an evaluation was carried out by American International Group, Inc. (AIG) management, with the participation of AIG's Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act), as of June 30, 2021. Based on this evaluation, AIG's Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2021.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f)) that have occurred during the quarter ended June 30, 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II – Other Information

ITEM 1 | Legal Proceedings

For a discussion of legal proceedings see Note 11 to the Condensed Consolidated Financial Statements, which is incorporated herein by reference.

ITEM 1A | Risk Factors

In addition to the other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the risk factors discussed in Part I, Item 1A. Risk Factors in the 2020 Annual Report.

ITEM 2 | Unregistered Sales of Equity Securities and Use of Proceeds

Period	Total Number of Shares Repurchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (in millions)
April 1 – 30	1,203,662	\$ 46.80	1,203,662	\$ 1,081
May 1 – 31	1,335,896	50.62	1,335,896	1,014
June 1 – 30	2,074,198	51.00	2,074,198	908
Total	4,613,756	\$ 49.79	4,613,756	\$ 908

During the three-month period ended June 30, 2021, we repurchased approximately 5 million shares of AIG Common Stock, par value \$2.50 per share (AIG Common Stock) for an aggregate purchase price of \$230 million pursuant to Exchange Act Rule 10b5-1 repurchase plans.

As of June 30, 2021, approximately \$908 million remained under our then-existing share repurchase authorization of AIG Common Stock. On August 3, 2021, our Board of Directors authorized a share repurchase authorization of AIG Common Stock of \$6.0 billion (inclusive of the approximately \$908 million remaining under the Board's prior share repurchase authorization). Shares may be repurchased from time to time in the open market, private purchases, through forward, derivative, accelerated repurchase or automatic repurchase transactions or otherwise. Certain of our share repurchases have been and may from time to time be effected through Exchange Act Rule 10b5-1 repurchase plans. The timing of any future share repurchases will depend on market conditions, our business and strategic plans, financial condition, results of operations, liquidity and other factors. The repurchase of AIG Common Stock is also subject to the terms of AIG's Series A 5.85% Non-Cumulative Preferred Stock (Series A Preferred Stock), pursuant to which AIG may not (other than in limited circumstances) purchase, redeem or otherwise acquire AIG Common Stock unless the full dividends for the latest completed dividend period on all outstanding shares of Series A Preferred Stock have been declared and paid or provided for.

ITEM 4 | Mine Safety Disclosures

Not applicable.

CERTIFICATIONS

I, Peter S. Zaffino, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of American International Group, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
